The SACCO Supervision Annual Report is a statutory publication of the Sacco Societies Regulatory Authority (SASRA). It documents the performance, activities, and operations of SACCO Societies in Kenya in compliance with the requirements of Section 22 of the Sacco Societies Act (Cap 490B) as read together with Regulation 92 of the Sacco Societies (Non-Deposit Taking Business) Regulations 2020.

All Rights Reserved

Disclaimer

This Report, is however, not an investment prospectus or legal opinion or advisory. Members of the public are advised to always undertake utmost due diligence and care before undertaking any financial transactions with any individual SACCO Society and/or other entity in respect of which this Report relates.

OUR VISION

A Financially Inclusive, Member Centric and Stable SACCO Industry

OUR LEGAL MANDATE	License SACCO Societies to carry out Deposit-Taking Business in Kenya	The Authority licenses qualifying SACCOs to undertake deposit-taking business pursuant to Section 23 of the SACCO Societies Act, as read with the SACCO Societies (Deposit Taking Business) Regulations, 2010 made thereunder.	OUR LEGAL MANDATE
	Regulate and Supervise SACCO Societies in Kenya	The Authority regulates and supervises the activities of qualifying SACCOs in accordance with Section 5 of the SACCO Societies Act and the Regulations made thereunder, including the Specified Non-Deposit taking SACCO business as prescribed under Section 3 of the SACCO Societies Act as read with the SACCO Societies (Non-Deposit Taking Business) Regulations, 2020.	
	Hold, manage and apply the General Fund of the Authority in accordance with the Act	The General Fund is the statutory fund created under Section 16 of the SACCO Societies Act and is managed by the Authority in accordance with Section 5(c) of the SACCO Societies Act	
	Do all such other things as may be lawfully directed by the Cabinet Secretary	The Cabinet Secretary has powers under Section 5(e) of the SACCO Societies Act and other written legislation to issue directions to the Authority to do any lawful thing with respect to supervision and regulation of SACCOs in Kenya	
	Perform such other functions as are conferred on it by the Act or by any other written law	The Authority performs any other functions that have been assigned to it under the Act or any other written law as provided in Section 5(f) of the SACCO Societies Act.	

OUR MISSION	To regulate, supervise and develop the SACCO industry through promotion of prudent practices to protect member's interests, enhance access to financial services and foster financial stability	OUR MISSION
-------------	---	-------------

OUR CORE VALUES	I	Integrity	We act with honesty and promote a culture of trust in the conduct of our business	OUR CORE VALUES
	I	Innovation	We foster learning and creatively adapt to the operating environment	
	M	Mutual Respect	We value and respect the diversity of our Board, employees, customers, and partners, and strive to create an inclusive environment	
	P	Professionalism	We strive to abide by the professional codes of ethics in our business including but not limited to those applicable to public service officers and respective professional bodies.	
	A	Accountability	We render a prompt account of our decisions, actions, and results to our stakeholders	
	C	Collaboration	We establish and nurture mutually beneficial partnerships with all our stakeholders	
	T	Transparency	We endeavour to be open and transparent in the conduct of our business and execution of our mandate

MESSAGE FROM THE BOARD OF DIRECTORS

CPA (Hon.) Jack Ranguma

The year 2024 marks an important epoch in the world of cooperative practice, because at the international stage, it heralded the commencement of celebrations to mark the *2025 United Nations International Year of Cooperatives* which was launched in December 2024 in New Delhi, India; while at the domestic level it marked a decade in the formal supervision and regulation of SACCO Societies in Kenya following the lapse of the transitional supervision period in June 2014.

Total Assets of the Regulated SACCO industry crossed the trillion mark to reach Kshs 1.076 trillion in 2024.

The Authority is very pleased to report that during this decade of formal supervision; the Regulated SACCO industry has been able to grow in leaps and bounds with all key financial parameters either doubling or tripling. For instance, the total assets more than tripled in the decade crossing the trillion mark for the first time to reach Kshs 1.076 trillion as at December 2024 from just about Kshs 301.54 billion in 2014. The industry's total assets' market share to the national nominal GDP on the other hand increased to 6.63% in 2024 from a proportion of just about 5.59% as at the lapse of transition period in 2014.

Regulated SACCOs Total Assets to National nominal GDP increased to 6.63% in 2024

The total membership being served by the Regulated SACCOs also more than doubled to 7.39 million members in 2024 from a paltry membership of just under 3.08 million members in 2014; while the total savings and deposits mobilized tripled to reach Kshs 749.43 billion in 2024 from Kshs 205.97 billion a decade ago, thereby underscoring the growing popularity of Regulated SACCOs in Kenya, as viable socio-economic investment vehicles.

Total Membership of Regulated SACCOs increased to 7.39 million in 2024

On the financial stability indicators front, the decade old formal supervision has seen the mainstreaming of the financial soundness indicators (FSIs) of Regulated SACCOs into the country's monetary financial statistics periodically reported to the national and international financial institutions for the assessment of the country's financial sector stability, thereby underscoring their critical role in the national economy. It is also important to note that during the

The Regulated SACCOs' Financial Soundness Indicators (FSIs) now mainstreamed to be part of the country's financial sector's FSIs reported at the

period, the key facets of financial soundness indicators (FSIs) have continued to grow and be maintained above the prescribed minimum thus underscoring the overall financial stability of the Regulated SACCO industry.

domestic and international stage

Consequently, the Authority is proud to present a much vibrant and stable Regulated SACCO industry in Kenya to the world during the celebrations of the *2025 United Nations International Year of Cooperatives*. In this regard, the Authority continues to embed in its supervisory and regulatory approaches, the four (4) pillars of the celebrations, dubbed the *New Delhi Action Agenda, 2024* which calls for –

The Authority is committed to the implementation of the New Delhi Action Agenda, 2024 as part of the celebrations to mark the 2025 United Nations International Year of Cooperatives

- a) Re-affirmation of the Cooperative identity through living the principles, cooperative educations, heritage and creativity, and showcasing their impact and contribution.
- b) Pursuit of enabling policy and entrepreneurial ecosystems for cooperatives to survive including supportive legal and policy frameworks, access to finance, educational partnerships and market access.
- c) Nurturing purposeful leadership in cooperative enterprises through inclusive leadership by incorporating youth, women and the marginalized; as well as knowledge sharing and strategic leadership development.
- d) Building a sustainable cooperative future through embedding sustainable solutions, technology integration, resilient networks and impactful partnerships.

Indeed, the spirit of the *New Delhi Action Agenda, 2024* and the attendant celebrations to mark the *2025 United Nations International Year of Cooperatives* has come at a time when the Kenya's cooperative sector is witnessing a renaissance following the publication of the *Cooperative Bill 2024*, which seeks to repeal the *Cooperative Societies Act*. The *Cooperative Bill 2024* which was passed by the National Assembly on 3rd December 2024 and forwarded to the Senate for consideration seeks to overhaul the entire framework for registration, governance and operations of Cooperatives in Kenya, including Regulated SACCOs.

The New Delhi Action Agenda 2024 are consistent with the Cooperative Bill, 2024 pending before the Senate

The Bill puts emphasis on the cooperative identity which distinguishes cooperative enterprises from the economic enterprises; identifies the typologies of cooperatives which may be registered including their distinct objects; strengthens the governance structures; expands the mandate of the *Cooperative Tribunal* among others. The Authority and indeed the entire stakeholders in the Cooperative sector look forward to the quick enactment of the Bill by the Senate in order to fast-track its implementation, which shall go a long way in strengthening the operating business environment of Regulated SACCOs.

Concurrently, the Authority has continued to establish itself as the continental centre of excellence in the supervision and regulation of SACCOs (Credit Unions); as well as show case the Regulated SACCO industry as a viable economic business model, thus attracting international delegations from across the continent and the globe for knowledge exchange and sharing, with the climax

Establishment of a Centre of Excellence for knowledge exchange and sharing on Credit Union Supervision and Regulations.

in 2024 being the hosting of the *2024 ICURN Annual Conference* which was held in Naivasha from 17th July 2024 to 19th July 2024. Other international delegations which visited the Authority for knowledge exchange and sharing during the period were policy makers and technical officers originating from the Central Banks and governmental Ministries from *Zambia, Ghana, Botswana, Tanzania, South Africa, Uganda, Zimbabwe, Malawi, and Nigeria* thereby earning the country a much-needed foreign exchange. The projected passage of the *Cooperative Bill 2024* into law will therefore spur a new wave of knowledge exchange with international delegates seeking to learn Kenya's domestic legal and policy frameworks.

Regulated SACCO industry looking forward to the quick enactment of the Cooperative Bill, 2024.

There is no doubt that the year 2023 and 2024 saw the Regulated SACCOs experiencing financial turbulence and uncertainties associated with the impairment of some of their financial investments which they had made in the securities of some unregulated entities. The impact of the impairment of these investments would have been seen in an increase in the financial expenses due to provisioning to cater for the impairments and/or a decrease in retained earnings where such reserves were utilized to write off the impairments. The aggregate analysis of financial expenses of Regulated SACCOs shows that the financial expenses increased to Kshs 5.40 billion in 2024 from Kshs 3.11 billion in 2023. On the other hand, the retained earnings increased by 21.69% in 2024 to reach Kshs 52.66 billion, thus showing that the Regulated SACCOs were resilient enough to absorb the said impairments.

Historical Investments in unregulated financial instruments are a threat to such investments and thus call for their regulation.

The lessons learnt during the turbulence however shows that it is no longer prudent to let Regulated SACCOs invest in unregulated instruments or securities, even where such investments are within the allowable prudential margins. To this extent therefore and in accordance with the Basel's framework for computation of regulatory capital, the Authority shall continue to require and impose regulatory adjustments on the capital of Regulated SACCOs, through deduction of any investment in an unregulated instrument or security, as well as requiring higher or additional capital for Regulated SACCOs with any investment in an unregulated financial instrument or security.

The Investments in unregulated financial Instruments will continue to be subjected to regulatory adjustments in computation of the regulatory capital of Regulated SACCOs.

Despite the foregoing, the Authority is very conscious that there is a very tight symbiotic relationship between Regulated SACCOs and the issuers of some of the unregulated investment instruments, while at the same time, a majority of the investments are historical and pre-date the Authority's supervisory framework. Consequently, the long-term solution for ensuring the safety of these investments is to ensure that the issuers of these instruments are also brought under formal prudential regulation, and these proposals have been submitted for legislative considerations.

With the maturity of the prudential supervisory framework, the Authority projects that the Regulated SACCOs shall continue to play their critical role in the socio-economic development of the country through provision of financial savings and affordable credit products. The foregoing notwithstanding, the prevailing micro and macro-economic factors in the national economy shall continue to have direct and indirect effects on the performance of Regulated SACCOs in the short,

Several Regulated SACCOs likely to be affected by policy changes and re-alignments at the global levels

medium and long term. In particular the Authority is already alert of the potential impact of the unravelling geo-political policy changes at the global stage, and which portends direct impact on Regulated SACCOs which draw their membership from donor funded projects, programs and institutions. The Regulated SACCOs likely to be affected by these changes have been identified and advised to take appropriate mitigation measures in their business models.

The Private Sector Based Regulated SACCOs, whose membership is largely drawn from the employees of private sector companies, have also been noted to be greatly pre-disposed to the negative effects of the macro-economic operating environment. The restructuring of these private sector companies, including those facing economic headwinds, have often resulted in loss of membership, increased loan defaults, as well as increased non-remittance of deductions, thus undermining the financial performance of the Regulated SACCOs associated with them. The Authority therefore calls upon these SACCOs to continuously scan their operating environments and devise early strategies to address the potential impacts of these eventualities, such as consolidation, mergers, expansion of common bonds, as well as joining the shared services initiatives which will enable them enjoy economies of scale.

The Performance of Private Sector Companies in the economy to continue shaping the Performance and Stability of Private Sector-Based Regulated SACCOs.

The non-remittance issue will equally continue to have negative impact on the performance and stability of Regulated SACCOs in the short to long term unless fully addressed, with the Authority continuing to monitor the trends, as well as providing legal, policy and administrative proposals on long term solutions. During the period ended December 2024, the total non-remitted funds owed to Regulated SACCOs increased sharply to Kshs 3.49 billion compared to Kshs 2.59 billion for the period ended December 2023.

Total Non-Remitted Funds owed by Employer-Institutions rose to Kshs 3.49 billion in 2024 thereby undermining the performance of 85-Regulated SACCOs.

The non-remitted funds in 2024 affected a total of 85-Regulated SACCOs (62-DT-SACCOs and 23-NWDT-SACCOs), involving a total of 55,602 members of Regulated SACCOs (consisting of 49,821 members of DT-SACCOs and 5,781 members of NWDT-SACCOs). The fact that the bulk of the non-remitted funds amounting to Kshs 3.10 billion (74.50% of the total non-remitted funds) were meant to repay loan and credit facilities issued to the affected members of the Regulated SACCOs means that these loan and credit facilities remain largely defaulted, and the liquidity and ability to meet financial obligations by these Regulated SACCOs remain severely undermined. Such non-remittances of loan repayment due has also led to conflicts between the SACCOs affected and their members such as contested listings in the Credit Reference Bureaus (CRBs), qualification for further and/or additional loans by the member among others.

Given that the bulk of the non-remitted funds were owed by the government and government owned institutions, the Authority continues to call for policy reforms to allow the recovery of such sums directly from their exchequer grants at the National Treasury. For instance, the County Governments and Assemblies owed over Kshs 1.61 billion (46.07%); followed by the public universities and tertiary colleges which owed Kshs 762.27 million (21.85%); while the State Corporations owed Kshs 164.76 million (4.72%). These monies can be easily deducted directly from the exchequer grants due to these governmental entities, instead of

County Governments and Assemblies owed the highest proportion in non-remitted funds amounting to Kshs 1.61 billion (46.07% of all non-remitted funds) in 2024.

following the lengthy and tedious legal recovery proceedings, while the affected SACCOs continue to suffer.

Despite these recurring setbacks the Authority looks forward to a financially stable and vibrant Regulated SACCO Industry and welcomes all stakeholders to prepare and actively participate in the *2025 United Nations International Year of Cooperatives* by observing and implementing the *New Delhi Action Agenda 2024*.

CPA (Hon.) Jack Ranguma
Chairman, Board of Directors

FOREWORD BY THE AG, CHIEF EXECUTIVE OFFICER

CPA (Mr.) David A. Sandagi

The SACCO Supervision Annual Report is a statutory publication of the Authority documenting the performance, operations and activities of Regulated SACCOs in Kenya. It is prepared pursuant to the provisions of section 22(2) of the Sacco Societies Act as read with the Reg. 92 of the Sacco Societies (Specified Non-Deposit Taking Business) Regulations 2020 which obligates the Authority to prepare and submit to the Cabinet Secretary a report on the performance and operations of Regulated SACCOs in Kenya, to be received within four (4) months after the end of the financial year. The SACCO Supervision Annual Report, 2024 therefore provides a report on the performance, operations and activities of the 355-Regulated SACCOs which were in operation in Kenya between 1st January 2024 and 31st December 2024.

*The Legal Basis of
the SACCO
Supervision Annual
Report.*

In accordance with its statutory mandate of licensing SACCOs to undertake deposit-taking SACCO business (DT-SACCOs) and authorize SACCOs to undertake specified non-deposit-taking SACCO business (NWD-T-SACCOs), the Authority reports that at the beginning of 2024 there were 176-DT-SACCOs but one (1) additional DT-SACCO was licensed in the course of the year 2024, bringing the number of SACCOs with valid deposit-taking licenses in 2024 to 177-DT-SACCOs in respect of which this report relates.

*There were 177-DT-
SACCOs in 2024
with valid deposit
taking licenses*

On the other hand, there were 181-NWD-T-SACCOs which had been authorized to operate specified non-deposit-taking SACCO business in accordance with the provisions of the Regulations 2020, but two (2) of them did not apply for renewal and thus had their authorizations revoked; while one (1) of them converted its business line to become a DT-SACCO. Consequently, there remained only 178-NWD-T-SACCOs in operation in 2024 and to which this report relates. The Authority continues to caution members of the public against dealing with or undertaking the regulated SACCO business with entities which

*There were 178-
NWD-T-SACCOs in
2024 with valid
authorizations*

are not licensed or authorized, in order to avoid exposure to risk of loss especially where mobilization of deposits is involved.

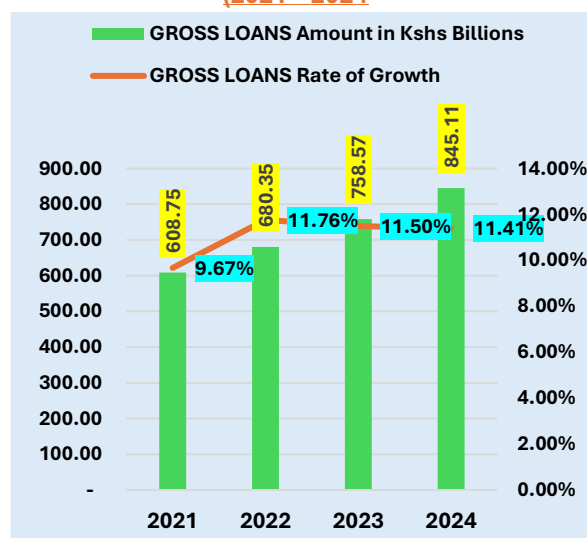

The financial performance of Regulated SACCOs measured and monitored on the basis of total assets, gross loans and total deposits, all recorded significant growths in 2024 with the total assets growing at an impressive 10.72% which was the highest recorded increase over the last five (5) years, to cross the trillion mark for the first time and reach Kshs 1.076 trillion from a total asset base of Kshs 971.96 billion in 2023 with a growth rate of just about 9.17%.

Total Assets of Regulated SACCOs grew by 10.72% to reach Kshs 1.076 trillion in 2024

Rate of Growth of Regulated SACCOs Total Assets (2021 – 2024)

Rate of Growth of Regulated SACCOs' Gross Loans (2021 – 2024)

The gross loans on the other hand grew at an average of 11.41% in 2024 to reach Kshs 845.11 billion from Kshs 758.57 billion reported in 2023 when the growth rate was recorded at 11.50%. The analysis largely shows a relatively stable rate of demand for loans and credit facilities issued by Regulated SACCOs in 2024 compared to 2023 with the loans to total assets ratio standing at 73.36% in 2024 compared to a proportion of 72.66% in 2023 and thus continuing to constitute the largest proportion of the Regulated SACCOs' total assets.

The Gross Loans increased by 11.41% to reach Kshs 845.11 billion in 2024.

A near similar scenario obtained with regard to the rate of growth in total deposits and savings mobilized in 2024 which increased by 9.86% to reach Kshs 749.43 billion from Kshs 682.95 billion representing 9.95% growth rate in 2023, even though the rate of demand for loans and credit facilities remained higher than the rate of mobilization of deposits to fund the same.

Total Deposits and Savings grew by 9.86% to reach Kshs 749.43 billion

There was equally a marked increase in the capital reserves and retained earnings which grew by 17.55% in 2024 to reach Kshs 197.54 billion from Kshs 168.05 billion representing a growth rate of just 6.92% in 2023. The sharp increase in the capital reserves and retained earnings was largely informed by increased retention of surpluses during the year which grew by 21.69% to reach Kshs 52.66 billion in 2024 compared to a decline of 0.10% recorded in 2023. The sharp increase in retention of surpluses is in consonance with the traditional cooperative philosophy of ensuring that the bulk of their capital is

Capital Reserves and Retained Earnings increased by 17.55% to reach Kshs 197.54 billion against the backdrop of

composed of institutional capital which is largely zero-cost, rather than share capital received from members and which is always very expensive if the returns on the share capital are to be taken into account. Additionally, the increase in capital reserves and retained earnings took place despite the utilization of the same by some Regulated SACCOs to cater for the impairments of some of their investments in unregulated instruments during the year 2024 and thus shows the overall resilience of Regulated SACCOs to absorb external shocks.

increased retention to build Institutional Capital

Rate of Growth of Regulated SACCOs Total deposits (2021 – 2024)

Rate of Growth of Regulated SACCOs Capital Reserves (2022 – 2024)

The Authority however continues to be concerned over the ever-increasing high concentration of the Regulated SACCO industry's total assets in just a few Regulated SACCOs, with a total of 60-Large-Tiered Regulated SACCOs controlling a market share of 77.07% of the industry's total assets amounting to Kshs 829.41 billion in 2024. This leaves the remaining 295-Regulated SACCOs consisting of the mid and small-tiered Regulated SACCOs to share the remaining proportion of 22.93% of the total assets. On the one hand, the high concentration of assets in a few Regulated SACCOs allows the Authority to deploy appropriate supervisory resources in their supervision and regulation in accordance with its Risk-Based Supervisory framework. On the other hand, however, the very many small sized Regulated SACCOs presents another regulatory challenge arising from their inability to generate sufficient revenues from their relatively small assets base capable of meeting their members' and operational needs, ward-off competition as well as cater for the associated compliance and regulatory costs.

There is a very high concentration of the industry's Total Assets and Total Deposits in just a few Regulated SACCOs.

60-Large-Tiered Regulated SACCOs controlled 77.07% of the Industry's Total Assets

Total Assets Market Share of Regulated SACCOs segmented by Number of Regulated SACCOs (2022-2024)

Similar concentration and concentration risks also remain apparent in the distribution of deposit liabilities among the Regulated SACCO industry with 40-Large-Tiered Regulated SACCOs controlling 65.83% of the industry's total deposits. The remaining 315-Regulated SACCOs shared the balance of the deposit proportion with 69-Regulated SACCOs controlling 23.20%, while the remaining 246-Regulated SACCOs shared the proportionate balance of 10.97% of the industry's total deposit liabilities.

40-Large-Tiered Regulated SACCOs controlling 65.83% of the industry's total deposits

Total Deposits' Market Share of Regulated SACCOs segmented by Number of Regulated SACCOs (2022-2024)

Financial stability and soundness remain the most critical cog in the Authority's supervisory and regulatory activities, as it is the fulcrum upon which the financial performance and growth of Regulated SACCOs are hinged. The DT-SACCOs segment, which is the most dominant in the industry given that it controls over 80% of the industry's total assets, deposits and loans largely registered increased capitalization in all the key capital adequacy ratios. The key capital to total assets ratio increased to 17.28% in 2024 against the prescribed minimum of 10% from a ratio of 16.07% in 2023, which was largely driven by increased retention during the reporting period. This is further evident in the increase in their institutional capital to total assets ratio to 11.97% in 2024 against the prescribed minimum of 8% from a ratio of 9.11% in 2023.

Significant increase recorded in all the key Capital Adequacy Parameters in 2024

DT-SACCOs' Core Capital to Total Assets increased to 17.28% in 2024 compared to 16.07% in 2023

DT-SACCOs level of Compliance with the Capital Adequacy Ratios

With regard to the NWDT-SACCOs' segment of the Regulated SACCO industry, their aggregate core capital to total assets ratio increased to 10.87% in 2024 against the prescribed minimum ratio of 8% from a core capital to total assets ratio of 10.40% recorded in 2023. Their core capital to total deposits ratio on the other hand increased to 14.26% in 2024 against the prescribed minimum of 5% compared to a ratio of 13.51% recorded in 2024. In addition, their retained earnings and disclosed reserves to core capital which should be maintained at not less than 50%, also increased to 66.89% in 2024 from 62.49% in 2023 against the backdrop of regulatory pressures and advocacy towards increased retention to ensure that the bulk of core capital of Regulated SACCOs is composed of institutional capital and not share capital which is often than not quite expensive.

NWDT-SACCOs' Core Capital to Total Assets increased to 10.87% in 2024 compared to 10.40% in 2023

NWDT-SACCOs level of Compliance with the Capital Adequacy Ratios

The quality of the asset portfolios of Regulated SACCOs, especially the quality of the loans and credit advances is another key international financial soundness indicator (FSI) utilized to assess and monitor the stability of Regulated SACCOs at individual and industry level. In accordance with the prescribed legal framework, the loans and credit advances issued by Regulated SACCOs are categorized into five (5) clusters depending on their performance, and appropriate provisions made in respect thereto.

The Performance of the Loans and Credit Advances issued by Regulated SACCOs

The overall analysis shows that there was a marked improvement in the quality of loans and credit advances issued by Regulated SACCOs in 2024 with 86.71% of the total loans performing in accordance with the contractual agreements compared to 86.33% of the loans which were reported as performing in accordance with the contractual agreements in 2023. The proportion of loans and credit advances which were classified under the watch category and thus deemed to be outstanding for between one (1) day and thirty (30) days also dropped to 4.90% in 2024 from 5.22% in 2023.

86.71% of the Loan Asset performing in accordance with the contractual agreements in 2024 up from 86.33% in 2023

The non-performing loans (NPL) ratio made up of the loans classified under the substandard, doubtful and loss category to gross loans for the Regulated SACCO industry registered a marginal improvement to 8.39% in 2024 compared to an NPL ratio of 8.45% in 2023. The NWDT-SACCOs' segment had a relatively better NPL ratio at 7.07% in 2024 compared to an NPL ratio of 7.12% in 2023; while the DT-SACCOs' segment recorded an NPL ratio of 8.56% in 2024 compared to an NPL ratio of 8.66% in 2023.

Average NPL for Regulated SACCOs improved to 8.39% in 2024 from an average of 8.45% in 2023.

Comparative Trends of NPL ratio in the Regulated SACCO industry

The usage of ICT driven financial services delivery channels is also gaining progressive traction in the Regulated SACCO industry, as part of their efforts to enhance efficient

Branch Networks increased to 652 in

accessibility of their services. Although the brick-and-mortar teller services cannot be done away with as evidenced by the increase in physical branch networks to 652 branches in 2024 compared to 626 branches in 2023, other alternative forms of financial delivery channels particularly the use of SACCO agency networks are becoming popular based on the low capital outlay associated with them. In particular the total number of SACCO agents increased to 4,247 agents in 2024 compared to 4,038 agents in 2023, while the number of Regulated SACCOs which had deployed the services of agents increased to 40-Regulated SACCOs in 2024 from 37-Regulated SACCOs in 2023.

2024 from 626 in 2023.

Regulated SACCOs progressively adopting the use of SACCO agents to conduct SACCO business.

The volume of transactions undertaken by the SACCOs agents increased to Kshs 31.65 billion in 2024 compared to Kshs 27.73 billion in 2023 despite the total number of transactions recording a minor decline to 7.69 million transactions in 2024 compared to 7.81 million transactions in 2023. The main transactions undertaken at the SACCO agency levels remain cash withdrawals and cash deposits, with a total of 4.78 million cash deposit transactions worth Kshs 17.46 billion; and a total of 5.20 million cash withdrawal transactions worth Kshs 15.32 billion being transacted by SACCO agents.

40-Regulated SACCOs deployed 4,247 SACCO agents in 2024 from 4,038 agents in 2023.

In addition to the use of SACCO agencies to deliver their financial services, Regulated SACCOs have equally invested heavily in the provision of digital loans either through the USSD code accessibility on feature phones, or internet enabled applications on smart phones. In particular, 93.22% of all DT-SACCOs and 44.94% of all NWDT-SACCOs had deployed USSD code enabled financial delivery channels in 2024 compared to 89.66% of DT-SACCOs and 39.34% of NWDT-SACCOs which had deployed the USSD code in 2023. And with regard to the internet enabled financial services delivery, 63.28% of DT-SACCOs had deployed the service up from 52.30% in 2023, while 33.15% of NWDT-SACCOs had deployed the internet enabled application financial service in 2024, up from 26.78% of the NWDT-SACCOs which had the internet enabled application service in 2023.

Many Regulated SACCOs deploying the use of USSD codes and Internet Application based financial services delivery channels

In conclusion, the Authority extends its appreciation to the Cabinet Secretary, Ministry of Cooperative & Micro, Small & Medium Enterprises (MSMEs) Development and the Principal Secretary for State Department for Co-operatives for the continued provision of policy guidance aimed at the realization of the Authority's legal mandate. The Authority also wishes to sincerely thank the members of the Board of Directors in setting the vision and mission for achieving the Authority's statutory mandate, as well as continued provision of resources and general oversight in the execution of the Authority's mandate.

Special recognition also goes to Management and Staff of the Authority whose support has been fundamental in realizing the Authority's set goals. The unwavering support and cooperation received during the year 2024 from the leadership of the Regulated SACCOs, as well as the entire co-operative movement also deserves a mention, even as the Authority looks forward to a fruitful year 2025.

**CPA (Mr.) David A. Sandagi
Ag, Chief Executive Officer**

CHAPTER I

GLOBAL PERSPECTIVES OF COOPERATIVES

1.0. THE COOPERATIVE BUSINESS MODEL

1.1. International Statement of the Cooperative Identity

The International Cooperative Alliance (ICA) is the worldwide apex body representing cooperatives as well as providing a global voice and forum for knowledge, expertise, and co-ordinated action for and about cooperatives. The ICA was founded in 1895 and is the custodian of the Statement on the Cooperative Identity which includes the definition of cooperatives, the cooperative ethical values and beliefs, and the seven (7) operational cooperative principles. The statement is the common denominator for all cooperatives in all sectors and all regions, and Cooperatives in Kenya, including SACCOs.

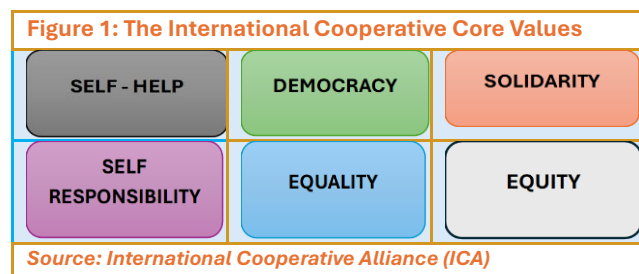

The universal definition of a cooperative as adopted by the ICA in the Statement on the Cooperative Identity is that a cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly owned and democratically controlled enterprise. Unlike other

corporate legal entities or unincorporated bodies, cooperatives are not for profit but are for service; they are people-centered enterprises owned and run by, and for the benefit of the members thereof in a democratic and equal way, based on the ‘one-member, one-vote rule’. The Authority continues to place a lot of premia on the significance of the Statement of Cooperative Identity and thus ensures that Regulated SACCOs as cooperative enterprises practices and observes the statement. This supervisory approach is consistent with the first pillar of the *New Delhi Action Agenda, 2024* which calls for stakeholders within the cooperative ecosystem to take measures towards reaffirming the cooperative identity through living the principles, cooperative education, heritage and creativity, and showcasing impact, as part of the celebrations to mark the *2025 United Nations International Year of Cooperatives* as discussed in chapter three of this report.

1.2. The Cooperative Values, Ethical Beliefs and Principles

The cooperative values encapsulated in the Statement of Cooperative Identity are self-help, self-responsibility, democracy, equality, equity, and solidarity, while the ethical beliefs are honesty,

openness, social responsibility and caring for others, all of which embodies the traditional values and beliefs of the founders of cooperatives. These are summarised in **Figure 1** and **Figure 2**.

On the other hand, the seven (7) Cooperative Principles adopted and applied by the ICA and thus applies uniformly to all Cooperative enterprises are voluntary and open membership; democratic member control; economic participation by members; autonomy and independence; education, training, and information; cooperation among

cooperatives, and concern for the community in general. The ICA has developed and issued Guidance Notes to the Cooperative Principles providing for their practical application in contemporary times of the 21st Century, a summary of which is provided in **Table 1.**

Table 1: Summary of the Cooperative Principles and their Application to Cooperative Enterprises		
	COOPERATIVE PRINCIPLE	PRACTICAL APPLICATION OF THE COOPERATIVE PRINCIPLE
1	VOLUNTARY AND OPEN MEMBERSHIP	Cooperatives are voluntary organisations, open to all persons able to use their services and willing to accept the responsibilities of membership, without gender, social, racial, political, or religious discrimination.
2	DEMOCRATIC MEMBER CONTROL	Cooperatives are democratic organisations controlled by their members, who actively participate in setting their policies and making decisions. Men and women serving as elected representatives are accountable to the membership. In primary cooperatives members have equal voting rights (one member, one vote) and cooperatives at other levels are also organised in a democratic manner.
3	MEMBER ECONOMIC PARTICIPATION	Members of cooperatives contribute equitably to, and democratically control, the capital of their cooperative. At least part of that capital is usually the common property of the cooperative. Members usually receive limited compensation, if any, on capital subscribed as a condition of membership. Members allocate surpluses for any or all of the following purposes: developing their cooperative, possibly by setting up reserves, part of which at least would be indivisible; benefiting members in proportion to their transactions with the cooperative; and supporting other activities approved by the membership.
4	AUTONOMY AND INDEPENDENCE	Cooperatives are autonomous, self-help organisations controlled by their members. If they enter into agreements with other organisations, including governments, or raise capital from external sources, they do so on terms that ensure democratic control by their members and maintain their cooperative autonomy.
5	EDUCATION, TRAINING, AND INFORMATION	Cooperatives provide education and training for their members, elected representatives, managers, and employees so they can contribute effectively to the development of their cooperatives. They inform the general public particularly young people and opinion leaders about the nature and benefits of cooperation.
6	COOPERATION AMONG COOPERATIVES	Cooperatives serve their members most effectively and strengthen the cooperative movement by working together through local, national, regional, and international structures.
7	CONCERN FOR COMMUNITY	Cooperatives work for the sustainable development of their communities through policies approved by their members.
Source: International Cooperative Alliance (ICA)		

In the Kenyan context, these principles have been incorporated in *section 4 of the Cooperative Societies Act* which mandatorily requires all Cooperatives to incorporate these principles in their respective By-Laws, and Regulated SACCOs are not an exception to this statutory requirement. The ICA opines that the statement of cooperative identity comprising the values and ethical beliefs are immutable, but the cooperatives principles can and have been reviewed and reformulated. The statement is also the central hallmark towards

legislative and regulatory recognition of the cooperative business model's unique character. To further deepen the integration of the cooperative values, ethical beliefs and principles, the Authority has in its *Guidance Note on Corporate Governance for Regulated SACCOs (SASRA/GG/2/2023) in 2023* specifically required all Regulated SACCOs to ensure that their individual By-Laws are amended to incorporate the same, and any Regulated SACCO whose By-Laws are not in conformity shall be required to amend the same accordingly.

1.3. The World Statistical Report on Credit Unions (SACCOs)

The World Council of Credit Unions (WOCCU) which is the international association of Credit Unions (SACCOs) around the globe and represents the national and regional Credit Union associations drawn from member countries publishes the annual Statistical Report on the performance of Credit Unions worldwide. **Table 2** provides a summary of the WOCCU Credit Union Statistical Report for the

financial year ended December 2023 and shows Kenya's Credit Union system (357-Regulated SACCOs in 2023) to be ranked 14th globally based on their total assets with the United States of America, Canada, India, Japan and Brazil taking the first five (5) largest countries in terms of Credit Unions' total assets.

Table 2: Global Country Performance of Credit Unions (SACCOs), 2023

RANKING	COUNTRY	ASSETS (USD BILLIONS)	LOANS (USD BILLIONS)	SAVINGS & SHARES (USD BILLIONS)	MEMBERS	NO. OF CREDIT UNIONS	PENETRATION	MEMBERSHIP PER CREDIT UNION
1	United States	2,278.00	1,618.00	1,900.00	140,626,000	4,699	64.90%	29,927

Source: WOCCU Credit Union Statistical Report, 2023.

*The Kenyan Statistical data have been adjusted to the verified data from the Authority's Annual SACCO Supervision Report, 2023. The statistics therefore excludes any unverified data for SACCOs which do not fall under the Authority's supervisory framework.

The Kenya's Credit Union penetration which measures the membership in the national Credit Union systems to the total adult working population in the country (population aged 18 years to 64 years old) was at 20.70%, meaning that out of every ten (10) working adult population in Kenya, two (2) of them are members of a Regulated SACCO. This makes Kenya among the top ten (10) countries in the world with high Credit Union penetration rates with an average of 19,166 members per Credit Union (Regulated SACCO) in 2023.

At the continent level, Kenya remains the country with the largest Credit Union system in terms of total assets, total deposits and gross loans in Africa during the period ended December 2023 as summarised in **Table 3**. Although Ethiopia reported very high numbers of membership and Credit Unions, their average total assets, deposits mobilised, loans and credit advances issued, and penetration rates remains quite low in comparison to Kenya.

Table 3: Africa Continental Country Performance of Credit Unions (SACCOs), 2023

RANKING	COUNTRY	ASSETS (USD BILLIONS)	LOANS (USD BILLIONS)	SAVINGS & SHARES (USD BILLIONS)	MEMBERS	CREDIT UNIONS	PENETRATION

**The Kenyan Statistical data have been adjusted to the verified data from the Authority's Annual SACCO Supervision Report, 2023. The statistics therefore excludes any unverified data for SACCOs which do not fall under the Authority's supervisory framework.*

2.0. THE NATIONAL COOPERATIVE ARCHITECTURE

2.1. The Organization of Cooperatives in Kenya

The Cooperative sector in Kenya is organised under the traditional vertical hierarchy of cooperatives consisting of primary cooperatives at the bottom of the vertex; followed by secondary cooperatives and tertiary cooperatives at the middle of the vertex; with the Apex Cooperative enterprise at the peak of the vertex. The vertical organization of cooperatives was and is meant to implement the cooperative principle of cooperation among cooperatives, so that individual cooperatives are able to enjoy economies of scale in operating together and is duly recognized under the provisions of the Cooperative Societies Act, albeit with some deficiencies.

The Apex Cooperative in Kenya is the Cooperative Alliance of Kenya (CAK) and brings together all the cooperative enterprises and organizations at the national cooperative. It also promotes cooperative development and represents the interests of cooperative societies locally and internationally. **Figure 3** presents a pictorial summary of the vertical organisation of cooperatives in Kenya with primary cooperatives consisting of individual natural person membership, and serving such membership being at the bottom of the vertex.

Figure 3: Vertical Classification of Cooperatives in Kenya		
	VERTICAL CLASSIFICATION OF THE COOPERATIVES	KEY CHARACTERISTICS
1	APEX COOPERATIVE	It is the national cooperative formed at the national level by the cooperative movement to promote cooperative development and represent the interests of cooperative societies locally and internationally. Currently, the Apex Cooperative Society in Kenya is the Cooperative Alliance of Kenya (CAK)
2	TERTIARY COOPERATIVES	The membership may comprise both primary and secondary cooperatives, and not individual persons. They serve those affiliate members and not individual persons.
3	SECONDARY COOPERATIVES (UNIONS)	The membership is restricted to two or more primary cooperatives. They are supposed to strictly serve their affiliate primary cooperatives only and should not serve individual person membership. They are also called Cooperative Unions and defined in Section 2 and 5 of the Cooperative Societies Act.
4	PRIMARY COOPERATIVES	Their membership is restricted to individual persons, and they serve the individual members. They are defined in Section 2 and 5 of the CSA. Both DT-SACCOs and NWDT-SACCOs are primary cooperatives. Section 16 of the CSA however allows corporate and unincorporated entities to join membership of primary cooperatives, subject to resolution of the general meeting.

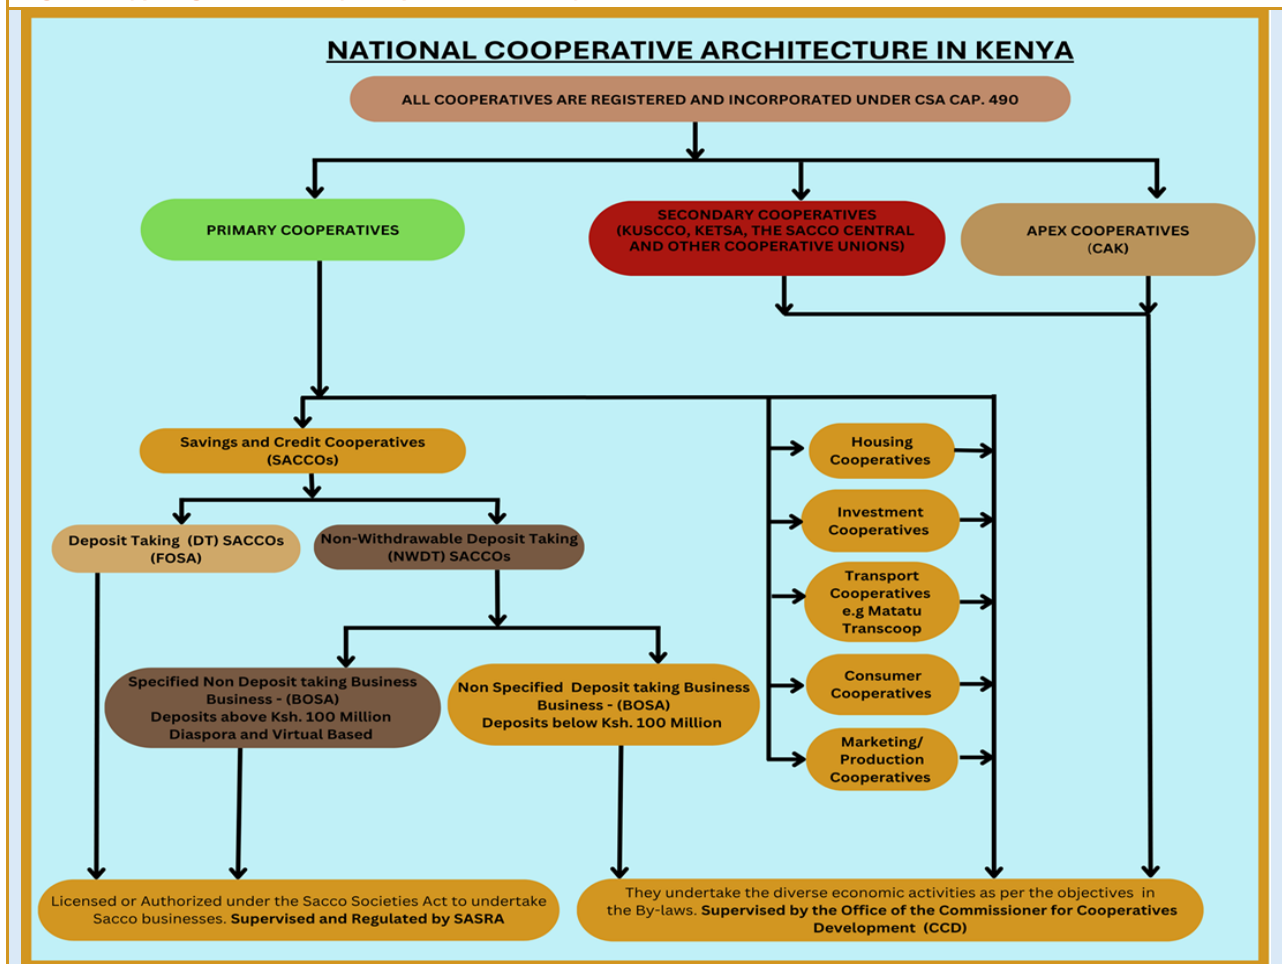

As discussed in *Chapter III of this Report*, the *Cooperatives Bill, 2024* (which seeks to repeal and replace the Cooperative Societies Act and which was passed by the National Assembly in 2024 and thereafter presented to the Senate for consideration) has sought to maintain this vertical structural organisation of Cooperatives in Kenya, but with fundamental changes in which tertiary cooperatives will be replaced with cooperative federations. The

Cooperative Bill 2024 also seeks to provide in clear terms the roles, responsibilities and functions of each cooperative enterprise at each point of the vertex, an issue which is missing in the current *Cooperative Societies Act*. The Authority and other industry players thus look forward to the enactment of the *Cooperative Bill 2024*, whose overall effect will be to streamline the operations of cooperative enterprises in Kenya.

2.2. The Typology of Cooperatives in Kenya

Figure 4 provides a pictorial outlook of the typologies of cooperatives in Kenya, and which have developed over the years largely by cooperative tradition and practice, and not through any legislative fiat. As shown in the presentation all Cooperatives in Kenya are registered and incorporated as legal entities pursuant to the provisions of the *Cooperative Societies Act* which has been in force since 1997, albeit with occasional amendments. The most common type of cooperative enterprises in Kenya are however the Savings and Credit Cooperatives (SACCOs) which in other jurisdictions are also known as Credit Unions or Cooperative Banks or Cooperative Financial Institutions.

Figure 4: Typologies of Primary Cooperatives in Kenya.

Source: SASRA Database

As cooperative enterprises SACCOs are registered and incorporated under the provisions of the Cooperative Societies Act, with the object of mobilizing savings and deposits from their members and intermediating the same as loans and credit advances through lending. This is the key distinction between SACCOs and other types of cooperative

enterprises such housing, investment, transport, consumer, marketing and production cooperative enterprises, which do not engage in any financial intermediation. It is for this reason that SACCOs collect demand deposits from their membership with the intention of intermediating the same as lending. The business of SACCOs is for all intents and

purposes the same as that of commercial banking institutions, with the exception that SACCOs transact business exclusively with the members, while commercial banking institutions transact business with the general public.

It is for these reasons that in addition to the general provisions of the Cooperative Societies Act pursuant to which they are incorporated, SACCOs are additionally required to be prudentially regulated in accordance with the provisions of the Sacco Societies Act and the Regulations made thereunder. In this respect, the Sacco Societies Act and Regulations made thereunder recognises two (2) sub-typologies of SACCOs namely the deposit taking SACCOs (DT-SACCOs) and the non-withdrawable deposit taking SACCOs (NWDT-SACCOs). The DT-SACCOs segment are regulated pursuant to the Sacco Societies Act as read with the Regulations 2010 made thereunder; while the NWDT-SACCOs are regulated and supervised pursuant to the Sacco Societies Act as read with the Regulations 2020 made thereunder (with the exclusion of those NWDT-SACCOs whose deposits are below Kshs 100 million and which are oversighted under the Cooperative

Societies Act like all other typologies of Cooperative enterprises).

Table 4 provides the distribution of all registered cooperative enterprises in Kenya for the period ended December 2024 as reported by the Ministry of Cooperatives and Micro, Small and Medium Enterprises and published in the National Economic Survey, 2025 by the Kenya National Bureau of Statistics (KNBS). The publication shows that there is a total of 30,726 cooperatives in Kenya, out of which 14,484 were registered as Savings and Credit Cooperatives (SACCOs) thus representing 47.14% of all registered cooperatives in Kenya; and includes the 355-Regulated SACCOs duly licensed and/or authorised by the Authority which are discussed in Chapter II of this report. The remaining SACCOs which are not under the prudential supervision of the Authority are those categorised as NWDT-SACCOs with deposits below Kshs 100 million and are oversighted pursuant to the provisions of the Cooperative Societies Act by the office of the Commissioner for Cooperative Development and various County Governments.

2.3. The Authority's Supervisory Structure

The Authority is a statutory government agency established under the provisions of the Sacco Societies Act and therefore implements the provisions of the said Act as read with the Regulations made thereunder namely, the Regulations 2010 which applies to DT-SACCOs and the Regulations 2020 which applies to the NWDT-SACCOs. In particular, the Authority is responsible for the licensing of SACCO Societies to undertake deposit-taking business, and to thereafter regulate and supervise such SACCO Societies in accordance

with the Act, the Regulations made thereunder and any other written law. The realm of supervision and regulation of SACCOs under the said Act, the Regulations made thereunder, and other written law encompasses prudential supervision and market conduct supervision of the Regulated SACCOs. To achieve its supervisory and regulatory mandate and ensure efficiency in delivery of its services, the Authority is structured into functional departments as summarised in **Figure 5**.

3.0. THE REGULATED SACCOs AND THE NATIONAL FINANCIAL SERVICES SECTOR

3.1. The Regulated SACCOs in the Context of the National Financial Services Sector

The Kenya national financial services sector consists of the financial services providers on the one hand and the public agencies responsible for policy, supervision and regulations of the financial services and providers on the other hand. The main financial services providers can be categorised as deposit-taking financial institutions; non-deposit-taking financial institutions; the financial markets infrastructures providers and the informal financial services providers.

The Regulated SACCO industry composed of DT-SACCOs and NWD-T-SACCOs fall within the deposit-taking financial institutions, because they take

deposits which they thereafter intermediate as loans and other credit advances to their members. Other deposit taking financial institutions in Kenya are the commercial banks and the micro-finance banking institutions. **Table 5** provides a comparative view of the financial performance of the Regulated SACCOs against other players within the deposit-taking financial institutions' segment. The comparative performance analysis shows that the commercial banks control the highest proportion of the segment's financial indicators of total assets; gross loans and advances, deposits mobilised and number of branch networks.

Table 5: Comparative Performance of Regulated SACCOs with other Deposit-Taking Financial Institutions

PARAMETERS	YEAR	TOTAL ASSETS (KSHS BILLION)	GROSS LOANS & ADVANCES (KSHS BILLION)	NET LOANS & ADVANCES (KSHS. BILLION)	NPL RATIO (%)	CUSTOMER DEPOSITS (KSHS. BILLION)	NO. OF INSTITUTIONS	NO. OF BRANCHES
DT-SACCOs	2021	691.09	522.25	488.20	8.86%	474.25	176	559
	2022	763.50	586.16	549.20	8.40%	522.59	176	596
	2023	832.89	652.27	603.15	8.66%	575.19	174	619
	2024	944.86	744.36	692.05	8.56%	649.32	177	645
NWD-T-SACCOs	2021	116.02	86.50	84.48	9.78%	90.64	185	4
	2022	126.80	94.19	94.19	7.99%	97.86	183	7
	2023	139.06	106.30	103.06	7.12%	107.00	183	7

Source: SASRA Database

*The data in respect of Commercial and Microfinance Banks were obtained from CBK's Statistical Reports.

The Regulated SACCO industry on the other hand had the highest number of deposit-taking financial institutions with 355-Regulated SACCOs consisting of 177-DT-SACCOs and 178-NWD-T-SACCOs, compared to 39 Commercial Banks and 14 Microfinance Banks in 2024. Taking cognizance of the spread of Regulated SACCOs and their branch networks within all but three (3) Counties, there is no doubt that Regulated SACCOs shall continue playing a critical role in attaining the financial inclusion

agenda in the country through deepening financial services accessibility to the local communities, despite their relatively small proportion of the deposit-taking industry's total assets, gross loans and deposits when compared to the commercial banks. It is also noteworthy that the Regulated SACCO industry's total assets, loans and advances, and deposits mobilised were much more than those of the Microfinance Banks, while at the same time the Regulated SACCO's NPL ratio stood at the lowest

level of 8.56% for DT-SACCOs and 7.07% for NWDT-SACCOs, compared to the NPL ratio for commercial banks which stood at 17.10% in 2024 and the NPL ratio for Microfinance Banks which stood at 33.60% during the same period.

Table 6 provides the comparative markets share of Regulated SACCOs total assets to the national nominal Gross Domestic Product (GDP) in comparison to the total assets of the other key financial services sectors namely the commercial banks, the microfinance banks, the insurance and

the pensions industry. The comparative analysis shows that the commercial banks still had the highest proportion of total assets to GDP at 46.65%, with the pensions industry coming second with a total assets proportion to GDP of 13.90%. The Regulated SACCO industry total assets proportion to the national GDP was 6.63% in 2024, which was a marginal increase from a total assets proportion to the national GDP of 6.43% in 2023, meaning that the Regulated SACCOs total assets grew at a faster rate than that of the national GDP.

Table 6: Share of Regulated SACCO Industry's Total Assets to Nominal Gross Domestic Product (GDP), 2024

YEAR	2021		2022		2023		2024

* The GDP data obtained from the KNBS. The GDP for the period ended December 2023 was however revised by KNBS in 2024 to Kshs 15,033.66 billion. **The data from commercial and microfinance banks obtained from CBK while the data from the Pensions and Insurance industries obtained from the RBA and IRA respectively.

Figure 6 depicts the trends in the total assets proportions of the financial services industry to the national GDP and shows that the Regulated SACCOs total assets to the GDP has been oscillating between 6.66% in 2022 and 6.63% in 2024 and thus demonstrating relative steady growth over the same

period. The commercial banks on the other hand have had the greatest changes in their total assets to GDP moving from a proportion of 49.29% in 2022, to a proportion of 50.90% in 2023 and then down to a proportion of 47.13% in 2024.

Figure 6: Comparative Trend Analysis of Regulated SACCOs Total Assets to National GDP

The GDP data obtained from the KNBS, while other data obtained from CBK, RBA and IRA.

3.2. Comparative Performance of Regulated SACCOs against Interest Rates

Regulated SACCOs being first and foremost Cooperative enterprises are service oriented entities and thus not for profit. Consequently, whenever surpluses are made, and subject to making the statutory retention from such surpluses, meeting the prescribed capital adequacy requirements, Regulated SACCOs are bound to pay out of their surpluses, interest on the members' deposits held and dividends on the members' share capital. **Figure 7** provides the comparative average interest rates paid by Regulated SACCOs on the members' deposits and the average dividends paid on the members' share capital. The analysis shows that there was a drop in the average rate of dividends paid by Regulated SACCOs on their members' share capital to 10.46% in 2024 compared to a dividend rate of 10.92% in 2023. The decline was largely as a

result of increased regulatory pressures on Regulated SACCOs towards retention of surpluses to build institutional capital, rather than increased payout, and indeed marks the first time in three years that the rate of dividends on members share capital was reducing.

The analysis further shows that NWDT-SACCOs paid the lowest rate in dividends on members share capital at 10.37% compared to the rate paid by DT-SACCOs which was at 10.54%. There was a reduction on the rate of dividends paid on members' share capital by both segments of Regulated SACCOs with DT-SACCOs paying a rate of 10.54% in 2024 compared to a rate of 10.79% in 2023, while the NWDT-SACCOs paid a rate of 10.37% in 2024 down from a rate of 11.06% in 2023.

Figure 7: Comparative Rates of interest on deposits and dividends on shares paid by Regulated SACCOs

Similar reduction scenario was also evident in the interest expenses on members deposits during the year, whereby the average interest rate on member deposits by Regulated SACCOs was paid at a rate of 7.14% in 2024 down from a rate of 7.45% in 2023. At the segmental level, both the DT-SACCOs and the

NWDT-SACCOs paid an average interest on their members' deposits at the same rate of 7.14% in 2024, but for the DT-SACCOs this was a drop from an interest rate on members' deposits of 7.70% paid in 2023, while for the NWDT-SACCOs, this was a drop from an interest rate on members' deposits of 7.20%

in 2023. The DT-SACCOs thus had the highest percentage drop in the interest paid on members' deposits in 2024 compared to 2023.

Figure 8 on the other hand provides a comparative view of the dividends and interest on deposits paid out by Regulated SACCOs to their membership in comparison to the Central Bank Rate (CBR); average lending rates by commercial banks and the average interest rate paid on customers' savings (deposits) by commercial banking institutions. The comparative analysis shows that on average the payments by

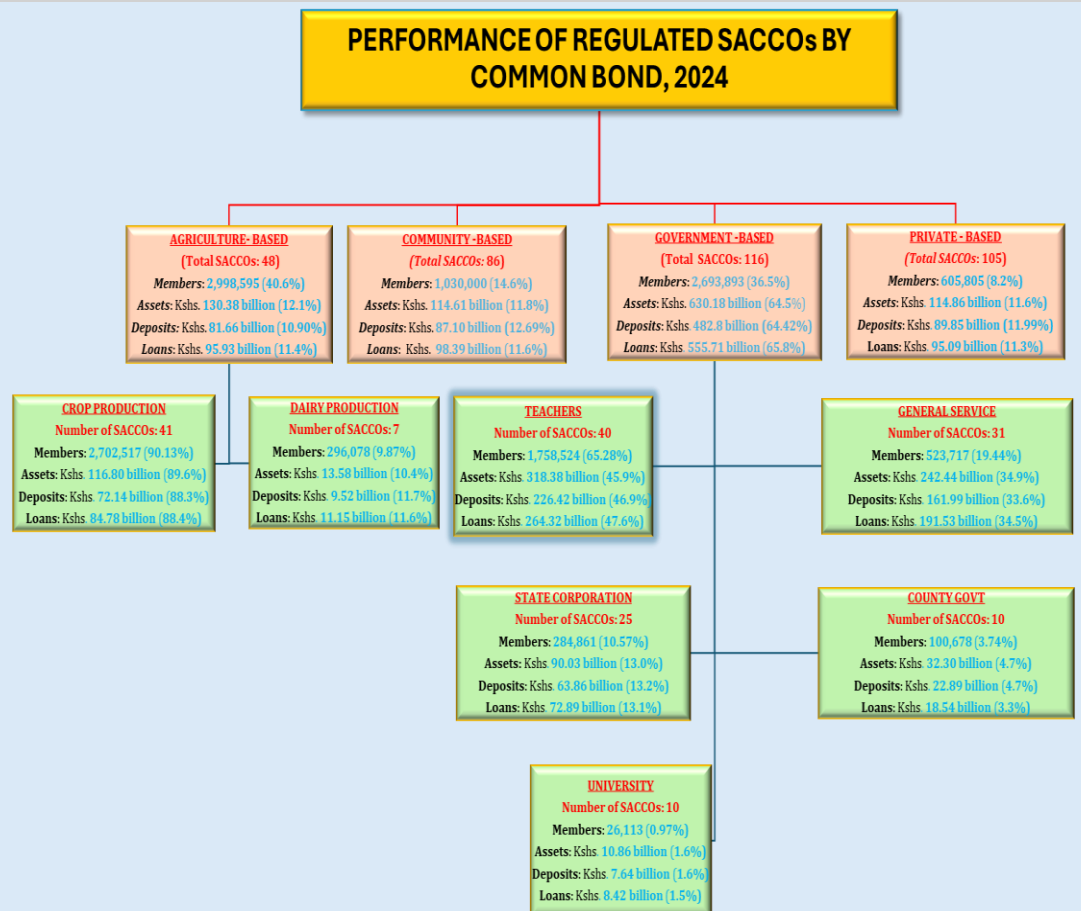

Regulated SACCOs as dividends on members share capital and interests on members' deposits was above the rate of interests paid by commercial banks on their customers' deposits with a difference of about 6.32% in respect of dividends and 3.00% in respect of the interests on members' (customers) deposits; thereby underscoring the competitive advantages of patronising financial services offered by Regulated SACCOs. It was also observable that Regulated SACCOs paid interest on members' deposits at a lower rate than that the CBR rate for the first time in three years.

CHAPTER II

LICENSESING, AUTHORIZATION, MEMBERSHIP AND FINANCIAL
PERFORMANCE OF REGULATED SACCOs IN 2022/24

CHAPTER II

THE PERFORMANCE AND OPERATIONS OF REGULATED SACCOs IN KENYA

4.0. THE LICENSING AND AUTHORIZATION

4.1. General Overview

Licensing of SACCO Societies to undertake deposit-taking SACCO business as provided in *section 5 of the Sacco Societies Act* as read with *Regulations 2010* made thereunder, as well as authorization of SACCO Societies to undertake the specified non-deposit taking SACCO business in accordance with *Section 3 of the Sacco Societies Act* as read with

Regulations 2020, is one of the key supervisory activities undertaken by the Authority. Once licensed or authorised, Regulated SACCOs are required to apply for the renewal of the licenses and authorizations on an annual basis, which equally forms another key supervisory activity of the Authority.

4.2. Licensing Status of DT- SACCOs

In accordance with the provisions of *Section 5 of the Act* as read with the *Regulations 2010*, there were 176-DT-SACCOs licensed to undertake deposit-taking SACCO business as at January 2024. During the course of the year 2024, one (1) NWDT-SACCO Society namely *M/S MHASIBU SACCO Society Ltd* successfully applied for and obtained a deposit taking SACCO business license bringing the total number of deposit-taking SACCO Societies to 177-DT-SACCOs at the close of the year 2024 in respect of which this *Report* relates. At the close of the year 2024 however, one additional NWDT-SACCO Society namely *M/S UNITED WINNERS Regulated NWDT-SACCO Society Ltd* also successfully expanded its business model from the specified non-withdrawable deposit taking SACCO business to deposit-taking SACCO business, bringing the total number of DT-SACCOs with valid licenses effective 1st January 2025 to 178-DT-SACCOs.

The Authority published the list of SACCO Societies licensed to undertake deposit taking business (DT-SACCOs) in the *Kenya Gazette Notice No. 657 (Vol. CXXVII—No. 15) dated 24th January 2025* as well in the daily newspapers through *MyGov*. weekly publications dated 28th January 2025 and 4th February 2025. The list is also available on the Authority's website www.sasra.go.ke for ease of public access and reference, as well as the Authority's social media platforms and communication channels. Members of the public are continuously cautioned against dealing with SACCO Societies undertaking the unregulated deposit-taking SACCO business and which do not appear in the published lists as contained in the Kenya Gazette Notice or the Authority's website.

4.3. Authorization Status of NWDT-SACCOs

In accordance with *Section 3(2) of the Act* as read with the *Regulations 2020*, there were a total of 181-

NWDT-SACCOs as at January 2024, but one (1) of the NWDT-SACCOs expanded its business model to

deposit taking SACCO business and transitioned to a DT-SACCO Society in the course of the year 2024, resulting in the reduction of the number of NWDT-SACCO Societies to 180-NWDT-SACCOs. At the same time two (2) other NWDT-SACCO Societies did not apply for the renewal of their operating certificates by November 2024 and thus ceased

undertaking the specified non-deposit taking SACCO business altogether with their operating certificates being revoked, thereby closing the year with 178-NWDT-SACCOs. **Table 7** provides the details of NWDT-SACCOs whose authorizations were revoked at the end of the year 2024.

Table 7: List of SACCO Societies whose Authorization were Withdrawn/Revoked/not Renewed in 2024

	Details of the SACCO Society	Last Known Physical Location	Reasons for Revocation
1.	B-SMART Regulated NWDT-SACCO Society Ltd P.O. Box 566 – 00515, Nairobi	RNG Plaza, Nairobi CBD, Nairobi County	Failure to apply for renewal of the authorization and inability to meet members obligations and compliance requirements.
2.	MULTIPLE Regulated NWDT-SACCO Society Ltd P.O Box 41391-00100 Nairobi	Multiple Hauliers Building, Airport South Road, Nairobi County	Failure to apply for renewal of the authorization and inability to meet members obligations and compliance requirements.

Source: SASRA Database

These SACCO Societies are therefore prohibited from undertaking any form of Regulated SACCO business in Kenya with effect from 1st January 2025 and are therefore expected to wind-up their businesses as provided in the Cooperative Societies Act. The Authority published the list of SACCO Societies authorised to undertake specified non-deposit taking business in the *Kenya Gazette Notice No. 657 (Vol. CXXVII—No. 15) dated 24th January 2025* as well in the daily newspapers through *MyGov*. weekly publications dated *28th January 2025* and *4th February 2025*. The list is also available on the Authority's website www.sasra.go.ke for ease of public access and reference, as well as the Authority's social media

platforms and communication channels. It is important to emphasize that there are three (3) categories of the specified non-deposit taking SACCO business as defined in *Reg. 4 of the Regulations 2020* as read with *section 3(2) of the Act*. **Table 8** provides the authorization status of NWDT-SACCO Societies authorised under each category and members of the public are continuously cautioned against dealing with SACCO Societies undertaking unregulated specified non-deposit-taking SACCO business and which do not appear in the published lists as contained in the Kenya Gazette Notice or the Authority's website.

Table 8: Distribution of Authorised NWDT-SACCOs within the Categories of Specified Non-Deposit Taking Business

3	Non-deposit taking business in which the SACCO mobilises membership and subscription to its share capital through digital or other electronic payment platforms	1	M/S Digital Media Regulated NWDT-SACCO Society Ltd

Source: SASRA Database

The Authority observes that despite public cautions and warnings against dealing with unregulated entities presenting themselves to Kenyans as Regulated, many people still get dupped by these entities with promises of high returns on their savings made through the internet and other online platforms. These unscrupulous entities more often than not disappear with peoples' savings; and because the transactions are made online, traceability and recovery of the lost funds becomes

very difficult. To this end, the Authority is calling upon the various public and private sector companies, institutions, and entities to cease and desist from facilitating unlicensed and unauthorized entities purporting to be SACCO Societies, to undertake illegal Regulated SACCO business through deductions and remittances, and/or by providing electronic and digital channels and conduits to undertake such illegal Regulated SACCO business.

5.0. MEMBERSHIP OF REGULATED SACCOS

5.1. General Overview of Membership

In accordance with the cooperative principles, Regulated SACCOS are first and foremost member based socio-economic enterprises, which transact their businesses strictly with the members thereof. Indeed, the provisions of the *Cooperative Societies Act*, and the *Sacco Societies Act* prohibits any SACCO Society from transacting SACCO business with a non-member. On the other hand, it is important to emphasize that full membership in a Regulated SACCO Society, like in any other cooperative enterprise is attained through the purchase of the prescribed minimum shares, at the prescribed per value of such shares as provided in their respective By-Laws. Once purchased, shares become equity capital of the SACCO Society, and cannot be refunded, but may be sold and/or transferred to any other member or new person seeking membership.

The share capital contribution also forms the basis of sharing of any surplus made in the form of dividends at the end of the financial year and also the basis of sharing any liabilities, in case of liquidation of the SACCO Society for any reason whatsoever. Keeping in tradition with the spirit of the cooperative practice, it is the Authority's firm policy position that the

prescribed minimum share capital of Regulated SACCOS which gives right to membership, should always be kept as minimal as possible, as there is no market for sale of such shares, and at the same time, there is no established mechanism for price determination or discovery of such shares since cooperative shares are unlimited and new ones will continue to be issued at the prescribed par value. Consequently, SACCOS must always build their capital from retained earnings or surpluses made during the year, and any payment of dividends may only be made after sufficient retention has been realised.

Table 9 provides the total number of members of Regulated SACCOS during the year ended December 2024, which therefore forms the substratum of the members (customers) which transacted SACCO business and shows that the membership in the 355-Regulated SACCOS increased by 7.94% in 2024 to reach 7.39 million members compared to a membership base of 6.84 million in 2023. The increase in the membership base of Regulated SACCOS is a testament to increased confidence and trust in Regulated SACCOS in Kenya as part and parcel of the domestic financial service providers.

Table 9: Summary of the Total Membership of Regulated SACCOS (2021 – 2024)

SACCO SEGMENT	TOTAL NO. OF SACCOS REPORTING			MEMBER STATUS	TOTAL MEMBERSHIP				Y-TO-Y CHANGE (2023/24)
	2022	2023	2024		2021	2022	2023	2024	
DT-SACCOS	176	174	177	Active	4,471,756	4,853,926	5,015,362	5,410,245	7.87%
				Dormant	1,067,033	1,091,295	1,302,169	1,460,507	12.16%
				Subtotal	5,538,789	5,945,221	6,317,531	6,870,752	8.76%
NWD-T-SACCOS	183	183	178	Active	345,855	346,000	379,487	309,285	-18.50%
				Dormant	114,930	129,270	145,289	205,386	41.36%
				Subtotal	460,785	475,270	524,776	514,671	-1.93%
TOTALS	359	357	355	Active	4,817,611	5,199,926	5,394,849	5,719,530	6.02%
				Dormant	1,181,963	1,220,565	1,447,458	1,665,893	15.09%
					5,999,574	6,420,491	6,842,307	7,385,423	7.94%

Source: SASRA Database

The DT-SACCOs segment had the highest number of members at 6.87 million members which is an increase of 8.76% in 2024 from a membership base of 6.32 million members in 2023. This accounted for 93.03% of all the members of Regulated SACCOs and thus underscoring the criticality of the DT-SACCOs segment to the Regulated SACCOs industry. The NWDT-SACCOs segment on the other hand had a total membership of 514,671 in 2024 which is a

marginal decline from a membership base of 524,776 in 2023, representing 6.97% of the total membership as summarised in **Figure 9**. The decline in the membership of NWDT-SACCOs is explainable by the change in the business model of three (3) formerly NWDT-SACCOs to DT-SACCOs and which also explains the sharp increase in the membership of DT-SACCOs in 2024.

Figure 9: Percentage Proportion of Active and Dormant Membership of Regulated SACCOs

Source: SASRA Database

The total active members were 5.72 million in 2024 compared to 5.39 million members who were considered active in 2023. The proportion of active members therefore was 77.44% in 2024 which is a slight decline in the proportion of active members in 2023 which was reported at 78.85%. Conversely, there was an increase in the dormant membership to 1.66 million members which represented 22.56% of the entire population of membership. The high proportion of dormant members in the Regulated SACCOs industry calls for concerted efforts aimed at re-activating such members, including through development and rolling out of suitable financial products and services.

Figure 10 presents a trend analysis in the membership growth against the number of Regulated SACCOs. The trend shows that despite the decrease in the number of Regulated SACCOs mainly through revocation of licenses or authorization, the total number of memberships of Regulated SACCOs has continued to grow. For instance, two (2) SACCOs had their authorization certificates revoked in 2024 and in 2023 respectively, yet the membership for Regulated SACCOs increased during the period from 6.42 million members in 2022 to 6.84 million members in 2023, and to 7.39 million members in 2024. It is therefore apparent that revocation of licenses or authorization certificates of failed Regulated SACCOs has very little or no impact on the overall membership growth.

Figure 10: Comparative Growth in Membership Against the Growth in the Number of Regulated SACCOs

Source: SASRA Database

5.2. The Comparative Trends in Growth Membership of Regulated SACCOs

An analysis of the growth rates in membership of Regulated SACCOs, shows that some registered positive growth thereby adding new members, while others registered negative growth rates implying that the members who exited exceeded those who joined.

Figure 11 depicts the distribution of the growth rates in the membership of DT-SACCOs and shows that a total of 33-DT-SACCOs registered positive growth rates in their membership in 2024 and added a total of 595,237 new members. Among the DT-SACCOs which recorded positive growth rates in their membership, a total of 18-DT-SACCOs grew at an average rate above 20%, with 165,733 new members being recruited; 44-DT-SACCOs grew their membership at an average rate between 10% and 20% with 239,005 new members being recruited; while the remaining 84-DT-SACCOs grew their membership at an average rate between 0.01% and 10% with a total of 190,499 new members joining their ranks.

On the negative side of growth rate in total membership, the analysis shows that a total of 31-DT-SACCOs registered negative growth rate in their individual membership with a total of 64,571 members being shed-off from their membership without replacement in 2024. Comparatively, it is noteworthy that during the year 2023, a total of 128,337 members were shed-off from 31-DT-SACCOs without replacement and thus showing that more efforts were made towards member retention in 2024 resulting into comparatively fewer exits. Among the DT-SACCOs which grew their membership at negative rates, a total of 22-DT-SACCOs shed-off membership at an average rate of between 0% and 10% with a total of 25,509 members exiting without replacement; 6-DT-SACCOs shed-off membership at an average rate of between 10% and 20% with 23,878 members exiting without replacement; while 3-DT-SACCOs had their membership reduce by over 20% with 15,184 members exiting without replacement.

Figure 11: Distribution of the Growth Rates in Membership of DT-SACCOs (2023 – 2024)

Source: SASRA Database

Similar trend analysis in the growth rates of membership is discernible within the NWDT-SACCOs segment as shown in **Figure 12**, which shows that a total of 134-NWDT-SACCOs recorded positive growth rates in membership with a total of 42,459 new members being recruited. This was however much lower than the new members who were added to the membership of NWDT-SACCOs in 2023 which stood at 52,016, thus depicting a much slower rate of growth in new membership by NWDT-SACCOs in 2024 compared to 2023. It is also curious to note that majority of NWDT-SACCOs (102-NWDT-SACCOs) grew their membership at an average rate of between 0.1% and 10% but managed to cumulatively add only 12,567 new members; while just about 14-NWDT-SACCOs whose membership grew by over 20% were able to add a total of 24,018 new members. The foregoing shows a very skewed trend in growth rates of membership with a few NWDT-SACCOs growing the membership faster than the rest, a scenario also similar to the growth rate trends in the membership of DT-SACCOs

Among the NWDT-SACCOs which recorded negative growth rates in their membership thus signifying member exits without replacement were 44-NWDT-SACCOs, which cumulatively shed-off a total of 3,984 members without replacement. This was an increase from the total number of members who exited 47-NWDT-SACCOs in 2023 which totalled just about 3,010 members, implying that the NWDT-SACCOs are losing members without replacement at an increasing rate and thus will continue to undermine their sustainability and viability, since membership forms the substratum of members (customers) with who Regulated SACCOs transact business. The analysis equally shows that among the NWDT-SACCOs which registered negative growth rates in the membership, 35-NWDT-SACCOs had members exit at an average rate of between 0.1% and 10% with a cumulative total of 1,750 members exiting without replacement; 5-NWDT-SACCOs had members exit at an average rate of between 10% and 20% with a cumulative total of 1,589 members exiting without replacement; while 4-NWDT-SACCOs had members exit at a rate above 20% with a cumulative total of 645 members exiting without replacement.

Source: SASRA Database

5.3. The Distribution of Membership by Field of Membership

The Authority has grouped Regulated SACCOs into four (4) main clusters based on the fields of membership or common bonds from which they drew their membership at the point of incorporation. These are the Government based Regulated SACCOs; the Agriculture based Regulated SACCOs; the Private Sector based Regulated SACCOs; and the Community based Regulated SACCOs with the

characteristics depicted in **Table 10**. The classification of Regulated SACCOs based on the fields or common bond from where they draw the bulk of their original membership is critical in understanding the individual risk profiles of each Regulated SACCO for purpose of their prudential supervision, with the clusters being grouped into sub-clusters.

Table 10: Summary of Field of Membership (common bond) clusters of Regulated SACCOs in Kenya

	MAIN CLUSTER	KEY CHARACTERISTIC	SUB-CLUSTER	MAIN FIELD OF MEMBERSHIP
1.	Government Based SACCOs	The original membership is drawn from Government ministries and departments, State Corporations, Public Universities etc. Some have however opened their field of membership.	(a) Teachers – Basic & Tertiary Education	The teaching professionals mostly employed by Teachers Service Commission
			(b) State Corporations	Employees of state corporations (parastatals) and semi-autonomous government agencies.
			(c) Universities	Employees of public universities.
			(d) County Government	Employees of County Governments & County institutions.
			(e) General Services & Administration	Employees of the government from Ministries and state departments
2.	Agriculture Based SACCOs	These SACCOs were founded upon the foundations of certain agricultural activities of the would-be members.	(a) Crop Production	Farmers focussed on crop production.
			(b) Dairy Production	Farmers focussed on dairy farming and production.
3.	Private Sector Based SACCOs	The original memberships were principally drawn from privately owned companies, institutions, or entities. The common bond would then be that		

Table 10: Summary of Field of Membership (common bond) clusters of Regulated SACCOs in Kenya

	MAIN CLUSTER	KEY CHARACTERISTIC	SUB-CLUSTER	MAIN FIELD OF MEMBERSHIP
		the members are employed by one private entity or group of similar private entities.		
4.	Community Based SACCOs	The original memberships were defined based on some social association of the potential members within the community such as churches, non-governmental organizations, businesses, and similar community initiative groupings.		

Source: SASRA Database

Table 11 and **Figure 13** provides the distribution of the total membership in the Regulated SACCO industry among the four (4) clusters of fields of membership or common bond. The 48-Agriculture based Regulated SACCOs continue to have the highest proportion of membership at about 41% of all members representing 3.00 million members in 2024, which is an increase from 2.85 million members in 2023, but which represented about 42% of the total membership of Regulated SACCOs. Consequently, and despite the increase in their membership, the 48-Agriculture based Regulated SACCOs marginally dropped in the proportion of their

membership to the total membership in the industry. The marginal decline was mainly attributed to the increase in the proportion of membership of Community-based Regulated SACCOs to 15% representing 1.08 million members in 2024 from 0.98 million members representing a proportion of 14% in 2023; and as well as the increase in the proportion of membership of Government – based Regulated SACCOs to 37% of the total membership representing 2.69 million members in 2024 from 2.45 million members in 2023 representing a proportion of 36% of all members.

Source: SASRA Database

The proportion of membership of the Private Sector based Regulated SACCOs to total membership however largely remained the same at about 8.21% in 2024, representing a total of 0.61 million members compared to a proportion of 8.23% of total membership representing 0.56 million members in 2023. The stagnation in the growth in membership of the Private Sector-Based Regulated SACCOs is directly attributable to the fact that this cluster of Regulated SACCOs are strictly dependent on new employees being recruited by the private companies from which they draw their membership. And with

diminished new employment opportunities in private sector-based companies, coupled with staff restructuring by such employer companies, the membership of the Private Sector -Based Regulated SACCOs will continue to experience stagnation over the short-term. In order to mitigate against the risks likely to be brought about by a stagnated membership or a decreasing membership, the Regulated SACCOs in this cluster ought to explore new business models including expansion of their common bonds, so as to avoid over reliance on one or a few private sector employer companies.

6.0. FINANCIAL PERFORMANCE OF REGULATED SACCOs

6.1. The Growth and Performance of Regulated SACCOs

6.1.1. Introduction

The growth and performance of deposit-taking credit financial institutions such as Regulated SACCOs is usually monitored through the indicators of the growth in their total assets, gross loans issued, and total deposits mobilised during the reporting period.

Table 12 provides the summary of the performance trends of the key growth indicators of the Regulated SACCOs in 2024, with the total assets increasing by 10.72% in 2024 to reach Kshs 1.08 trillion, which is a

significant increase from the growth rate of 9.17% recorded in 2023 as summarised in **Figure 14**. This increase was so, despite the decrease in the number of Regulated SACCOs from 357 in 2023 to 355-Regulated SACCOs in 2024 following the revocation of authorization of two (2) NWDT-SACCOs namely *M/S Multiple SACCO Society Ltd* and *M/S B-SMART SACCO Society Ltd* and thus underscores the overall resilience of the Regulated SACCO industry.

Table 12: Comparative Performance Trends in Key Growth Indicators of Regulated SACCOs (2021 – 2024)

FINANCIAL PARAMETERS	CLUSTER	KSHS BILLIONS				YEAR TO YEAR CHANGES		
		2021	2022	2023	2024	2021/22	2022/23	2023/24

Source: SASRA Database and Approved Audited Financial Statements of Regulated SACCOs for the Financial Period Ended December 2024 (Approval Date 30th April 2025)

The trend analysis further shows that the gross loans which form the bulk of the Regulated SACCOs' total assets grew by 11.41% to reach Kshs 845.11 billion in 2024, from a gross loan base of Kshs 758.57 billion in 2023 as shown in **Figure 15**. The allowances made by Regulated SACCOs for loan loss however increased by 6.38% to reach Kshs 55.69 billion in 2024 from Kshs 52.35 billion in 2023, during which the increase

in the allowance for loan losses was at a high of 32.09%. Consequently, the net loans and credit advances for the Regulated SACCOs for the period ended December 2024 stood at Kshs 789.42 billion, which represented an increase of 11.78% compared to a net loans and credit advances increase of 10.22% in 2023.

The total deposits of the Regulated SACCOs which is mostly composed of non-withdrawable deposits (popularly known as BOSA deposits), withdrawable deposits (popularly known as FOSA deposits), and fixed deposits on the other hand grew by 9.86% to reach Kshs 749.43 billion in 2024 from a total deposit's base of Kshs 682.19 billion in 2023 as

depicted in **Figure 16**. In conclusion, the analysis shows an overall trend in which the total assets of the Regulated SACCOs grew at an increasing rate for the period ended December 2024, while both the gross loans and the total deposits grew but at a slightly decreasing rate in 2024 compared to the period ended December 2023.

Figure 14: Rate of Growth of Regulated SACCOs Total Assets (2021 – 2024)

Source: SASRA Database

Figure 15: Rate of Growth of Regulated SACCOs' Gross Loans (2021 – 2024)

Source: SASRA Database

Figure 16: Rate of Growth of Regulated SACCOs' Total Deposits (2021 – 2024)

Source: SASRA Database

Figure 17: Rate of Growth of Regulated SACCOs' Capital Reserves (2022 – 2024)

Source: SASRA Database

At the same time, the aggregate capital reserves of the Regulated SACCOs including the retained earnings witnessed the highest growth rate in the last

three (3) years at 17.55% for the period ended December 2024 compared to growth rates of 6.92% in 2023, and 14.78% in 2022 as depicted in **Figure 17**.

The retained earnings component of the capital reserves increased by 21.69% to reach Kshs 52.66 billion for the period ended December 2024, compared to a decline of 0.10% for the period ended December 2023. The increased retention of earnings to build capital reserves is evidence that Regulated SACCOs in Kenya are progressively embracing the traditional cooperative philosophy, of ensuring that the bulk of their capital is composed of institutional capital which are zero cost funds, rather than share capital received from members which in most cases may be very expensive if the returns on the share capital are taken into account. This will in turn provide Regulated SACCOs with an opportunity to issue and/or grant comparatively affordable loans and credit facilities to their membership, funded largely by such institutional capital.

At the segmental levels, the analysis shows that the DT-SACCOs segment registered the highest growth rates in the key performance indicators of total

assets, total deposits and gross loans. In particular, the DT-SACCOs segment recorded 13.44% growth rate in total assets during the period ended December 2024, compared to a total assets growth rate of 9.09% in 2023. The NWDT-SACCOs segment on the other hand recorded a total asset decline in growth rate of negative 5.59% in 2024, thus signifying a decline in their total asset base from Kshs 139.06 billion for the period ended December 2023 to Kshs 131.29 billion for the period ended December 2024 as shown in **Figure 18**. Similar scenarios also played out where a decline was recorded with regard to the total deposits in the NWDT-SACCOs segment as shown in **Figure 19**, which declined by negative 6.44% to Kshs 100.11 billion in 2024 from a total deposits' portfolio of Kshs 107.00 billion in 2023; and as well as in gross loans of NWDT-SACCOs which declined by negative 5.21% to Kshs 100.75 billion in 2024 from Kshs 106.30 billion in 2023 as shown in **Figure 20**.

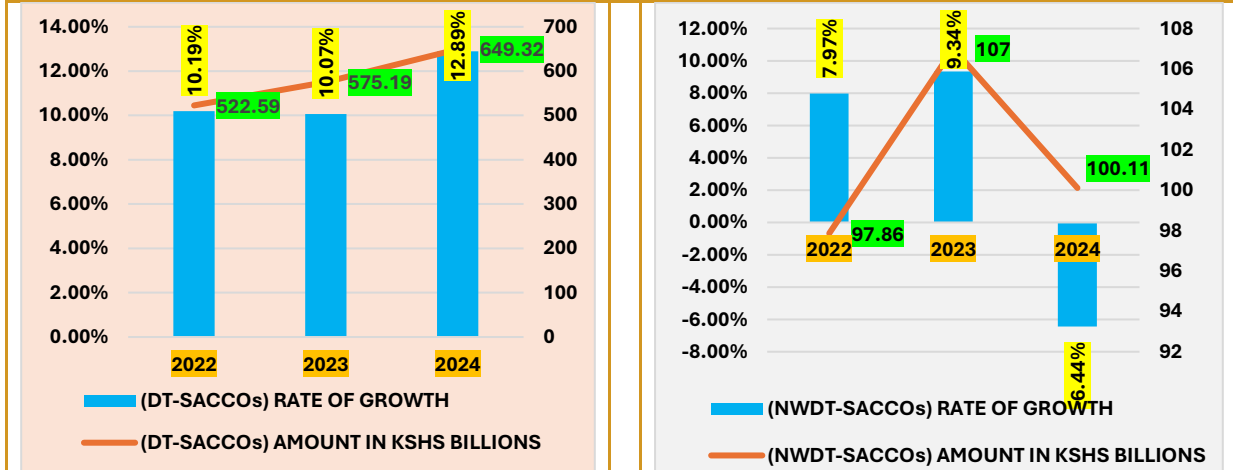

Figure 19: Comparative Growth Rates in Total Deposits of DT-SACCOs and NWDT-SACCOs (2022-2024)

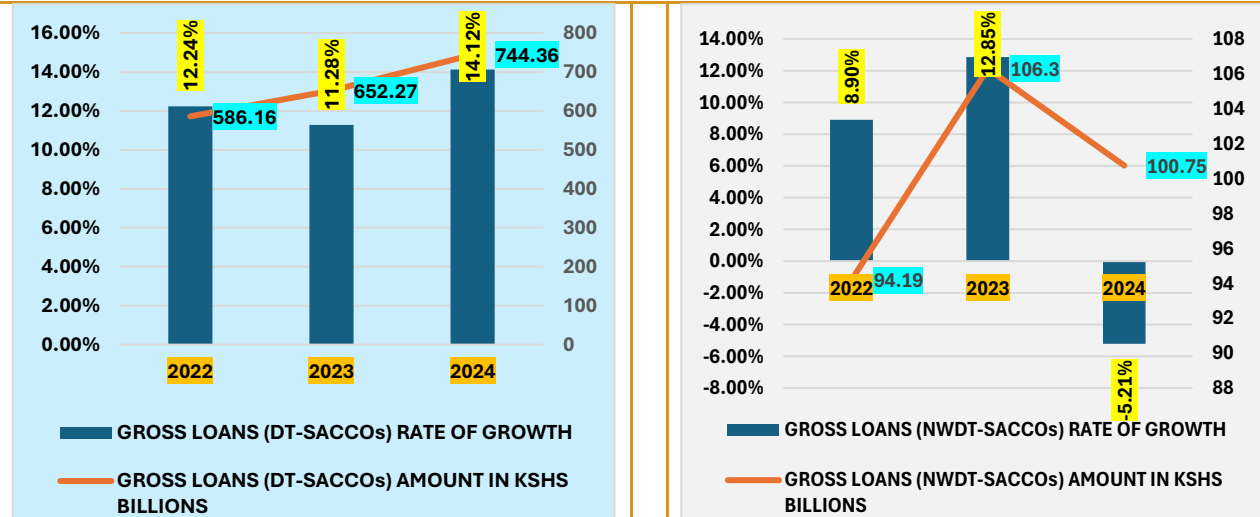

Source: SASRA Database

The aggregate decline in the growth rate of the total assets and total deposits portfolios of NWDT-SACCOs is explained by the fact that three (3) NWDT-SACCOs expanded their business to deposit-taking SACCO business in the year 2024, thus became DT-SACCOs namely; *M/S NJIWA Regulated DT-SACCO Society Ltd*, *M/S JOGOO DT-SACCO Society Ltd* and *M/S MHASIBU Regulated DT-SACCO Society Ltd*. In

addition, the revocation of the authorization of two (2) former NWDT-SACCOs namely *M/S Multiple SACCO Society Ltd* and *M/S B-SMART SACCO Society Ltd* equally contributed to the sharp decline in the total assets and total deposits of the NWDT-SACCOs segment as well as their average growth rates.

Figure 20: Comparative Growth Rates in Gross Loans of DT-SACCOs and NWDT-SACCOs (2022-2024)

Source: SASRA Database

Conversely, the sharp growth rates of the DT-SACCOs segment in their total assets, total deposits, gross loans and capital reserves, when compared to growth rates in the NWDT-SACCOs segment, was

largely driven by licensing of the three (3) former NWDT-SACCOs to become DT-SACCOs. The trend is likely to continue with large NWDT-SACCOs seeking to expand their business lines to include deposit-

taking business, with the result that the NWDT-SACCOs segmental market share is projected to continue shrinking in all spheres of financial performance. The urge to expand the business lines to deposit taking business is also informed by the

need to address the non-remittances challenges by allowing their members to channel their salaries through the FOSA rather than reliance on the employer institutions to remit the deductions.

6.1.2. The Comparative Performance and Growth Trends

The comparative performance of the two (2) segments of the Regulated SACCO industry, shows a continued and increasing dominance of the DT-SACCOs segment consisting of 177-DT-SACCOs when compared to the NWDT-SACCOs consisting of 178-NWDT-SACCOs in terms of the key financial performance indicators of total assets, total deposits, gross loans and credit advances as well as capitalization. In particular, the market share of the DT-SACCOs total assets during the year ended December 2024, increased to 87.80% of the Regulated SACCOs' total assets representing Kshs 944.86 billion, from a total assets market share of 85.69% representing Kshs 832.89 billion reported in 2023 as summarised in **Figure 21**. By implication therefore, the total assets market share of the NWDT-SACCOs segment shrunk to just about 12.20% representing Kshs 131.29 billion in 2024, from a market share of 14.31% representing Kshs 139.06 billion reported in 2023.

The high concentration of the total assets in the DT-SACCOs segment is largely explained by the high growth rates among the DT-SACCOs compared to the NWDT-SACCOs segment, as well as the conversion of three (3) NWDT-SACCOs from the specified non-deposit taking business to the deposit taking business during the year under review. It is nevertheless significant to observe that the uneven distribution of the market share of the total assets in the Regulated SACCO industry, with concentration in the DT-SACCOs means that a majority of the NWDT-SACCOs remains small in their assets sizes. Cognizant of the fact that assets are the revenue generating base of any financial institution coupled with fierce competition from other financial services providers, it is most likely that the stability, viability and sustainability of many individual NWDT-SACCOs may be undermined by such small total assets base.

Similar scenario is replicated on the market share analysis of the Regulated SACCO industry's total deposit as shown in **Figure 22**, with the DT-SACCOs segment controlling 86.64% of the industry's total deposits amounting to Kshs 649.32 billion in 2024, up from a market share of 84.32% amounting to Kshs 575.19 billion in 2023. Conversely, the total deposits market share of the NWDT-SACCOs' segment declined to just about 13.36% representing Kshs 100.11 billion in 2024, down from a market share of 15.68% of the industry's total deposits representing Kshs 107.00 billion in 2023. This is consistent with

the rate of growth in total deposits which was highest among the DT-SACCOs segment at 12.89% compared to the rate of growth in total deposits of NWDT-SACCOs which was reported at negative 6.44% in 2024; and underscores the high deposit mobilization efficiency among the DT-SACCOs compared to the NWDT-SACCOs segment, as evidenced by the progressive increase in the market share of DT-SACCOs of total deposits from 83.95% in 2021, to a market share of 86.64% in 2024 and a converse decline in the NWDT-SACCOs market share of 16.05% in 2021 to just 13.36% in 2024.

Figure 23 on the other hand provides the comparative outlook of the market share of the Regulated SACCOs industry's gross loans and credit advances, with the DT-SACCOs segment controlling a market share of 88.08% of all the loans and credit advances issued and outstanding by the Regulated SACCOs for the period ended December 2024, which is an increase from a market share of just about 85.99% during the period ended December 2023. Similarly, there was a drop in the market share of the NWDT-SACCOs segment to just 11.92% amounting

to Kshs 100.75 billion in 2024, down from a market share of 14.01% in 2023. The high concentration of total assets, total deposits and gross loans in DT-SACCOs implies that this segment of Regulated SACCOs is highly predisposed to risks including but not limited to credit, liquidity, operational, governance and market risks, thus requires the deployment of appropriate resources than their NWDT-SACCOs counterparts in accordance with the Authority's Risk Based Supervision Policy.

Source: SASRA Database

6.2. The Regulated SACCOs By Total Assets

6.2.1. General Overview

The Authority classifies the Regulated SACCOs into three (3) tiers based on their total assets in order to assess, classify, monitor, understand and appropriately respond to their individual or peer risk profiles as part of the Authority's Risk Based Supervision processes. The three (3) level tiering enables the Authority to identify, and peer-cluster Regulated SACCOs with same or near same total assets levels as follows –

- Large-Tiered Regulated SACCOs whose total assets are in excess of Kshs 5 billion.
- Mid-Tiered Regulated SACCOs whose total assets range between Kshs 1 billion and Kshs 5 billion.
- Small-Tiered Regulated SACCOs whose total assets are below the Kshs 1 billion threshold.

Table 13 provides the overall distribution of the Regulated SACCOs on the three (3) tiered clusters based on their respective total assets portfolios and shows that the number of the Large-Tiered Regulated

SACCOs increased from 53-Regulated SACCOs in 2023 to 60-Regulated SACCOs in 2024, an indication that 7-Regulated SACCOs crossed the Kshs 5 billion threshold in 2024. These were –

- M/S Capital SACCO Society Ltd* with head offices in Meru Town, Meru County
- M/S Shirika DT-SACCO Society Ltd* with head offices in Nairobi City, Nairobi City County
- M/S Kenya Highlands SACCO Society Ltd* with head offices in Kapsoit Market Centre, Kericho County
- M/S Taifa DT-SACCO Society Ltd* with head offices in Nyeri Town, Nyeri County
- M/S Nyati SACCO Society Ltd* with head offices in Nairobi City, Nairobi City County
- M/S Ndege Chai SACCO Society Ltd* with head offices in Kericho Town, Kericho County
- M/S Kenpipe DT-SACCO Society Ltd* with head offices in Nairobi City, Nairobi City County

It is also observable that the two (2) Large-Tiered NWDT-SACCOs during the year 2023, namely *M/S Njiwa SACCO Society Ltd* and *M/S Mhasibu DT-SACCO Society Ltd* expanded their business lines to deposit-taking SACCO business and thus became DT-SACCOs in 2024. This had the effect of reducing

the number of the Large-Tiered NWDT-SACCOs to 4-NWDT-SACCOs in 2024 from 6-NWDT-SACCOs in 2023 and also increasing the number of the Large-Tiered DT-SACCOs by two. It is equally important to note that during the year under review, no NWDT-SACCOs had their total assets cross the Kshs 5

billion based on their relative slow growth rates in their total assets. The Authority projects that the number of Large-Tiered NWDT-SACCOs will largely remain static for the next three (3) years or even reduce as the current 4-Large-Tiered NWDT-SACCOs may convert to DT-SACCOs. It is also significant to note that the 60-Large-Tiered Regulated SACCOs had an aggregate market share of 77.07% of the entire Regulated SACCO industry total assets representing Kshs 829.41 billion for the period ended December 2024, leaving a paltry 22.93% market share of total

assets to be shared by the remaining 295-Regulated SACCOs as summarised in **Figure 24**. From the foregoing analysis, the total assets are concentrated in just a few of the Regulated SACCOs mainly the 56-Large-Tiered DT-SACCOs, whose aggregate total assets amounted to Kshs 803.57 billion accounting for 74.67% of the industry's total assets as shown in **Figure 25**. This calls for thereby calling for continued heightened supervision and surveillance since they present more risks and challenges to the supervisory landscape.

The analysis further shows that the Mid-Tiered Regulated SACCOs with total assets ranging between Kshs 1 billion and Kshs 5 billion were 79-Regulated SACCOs in 2024 composed of 52-DT-SACCOs and 27-NWDT-SACCOs, while their cumulative total assets' market share was 15.53% of the industry's total assets amounting to an aggregate of Kshs 167.08 billion as shown in **Figure 26**. In this Mid-Tier, the 52-DT-SACCOs controlled the largest proportion of the total assets with a market share of 10.37% of the industry's total assets, while the 27-NWDT-SACCOs had a market share of just about 5.16%. It is however evident that majority of the Regulated SACCOs within the Large-Tier and the Mid-Tier clusters were DT-SACCOs with the majority of

the NWDT-SACCOs being under the Small-Tiered cluster.

Among the Small-Tiered Regulated SACCOs whose total deposits remain below Kshs 1 billion threshold, the analysis shows that the same was comprised of a total of 216-Regulated SACCOs, with an aggregate total asset base of Kshs 79.66 billion representing just about 7.40% of the Regulated SACCO industry's total assets. This means that on average these Regulated SACCOs have very small asset bases, which coupled with competition from other financial institutions, brings to question their sustainability, viability and stability in the long-term. Indeed, this is one of the reasons why these Small-Tiered Regulated SACCOs needs to explore market driven options and

solutions such as mergers, consolidation as well as sharing of common services in order to enjoy economies of scale, ward-off competition and ensure viability, sustainability and stability. As referred in **Table 13**, the majority of the Small-Tier Regulated SACCOs were drawn from the NWDT-SACCOs segment with a total of 147-NWDT-SACCOs having assets below Kshs 1 billion, amounting to an aggregate of Kshs 49.95 billion representing 4.64% of

the industry's total assets. On the other hand, there were just about 69-DT-SACCOs whose assets were below the Kshs 1 billion in the reporting period, whose cumulative total assets amounted to Kshs 29.71 billion representing just about 2.76% of the industry's total assets, and thus confirming that a majority of DT-SACCOs are actually in the Large-Tier and Mid-Tier categories and thus systemically important within the Regulated SACCO industry.

6.2.2. Regulated SACCOs' Total Assets by Field of Membership

As discussed hereinabove, the Regulated SACCO industry is grouped into four (4) main clusters based on the field of membership or common bonds from which they drew their original members at the point of formation or incorporation or from which they draw a majority of the members. These are the Agriculture-based Regulated SACCOs; the Community-based Regulated SACCOs; the Government-based Regulated SACCOs; and the Private Sector-based Regulated SACCOs. This clustering is important in enabling the Authority to understand the individual institutional profiles of the Regulated SACCOs based

on the characteristics of the members they serve. **Table 14** provides the distribution of the Regulated SACCO industry's total assets among the four (4) clusters and shows that the 116-Government-based Regulated SACCOs continue to be the most dominant controlling 64.49% of the industry's total assets representing Kshs 694.00 billion for the period ended December 2024. This was however a slight drop in their overall total assets' market share which was reported at 64.84% representing Kshs 630.18 billion for the period ended December 2023.

Table 14: Distribution of Regulated SACCOs' Total Assets within the Fields of Membership (Common Bond Clusters)

FIELD OF MEMBERSHIP/ CLUSTER	SACCO SECTOR/ INDUSTRY	REGULATED SACCO SEGMENT	NO. OF SACCOs		TOTAL ASSETS (KSHS BILLIONS)		PERCENTAGE TO TOTAL ASSETS

Source: SASRA Database

The decline in the total assets' market share of the 116-Government-based Regulated SACCOs can be attributed to the growth in the 48-Agriculture-based Regulated SACCOs, whose total assets' market share increased to 12.12% representing an aggregate amount of Kshs 130.38 billion in 2024 compared to a market share of 11.55% in 2023. It is also apparent that the 48-Agriculture-based Regulated SACCOs was the only cluster which made positive gains in its respective total assets' market share in 2024, with the Government-based; the Community-based; and the Private Sector-based Regulated SACCOs clusters all recording marginal declines as shown in **Figure 27**. Additionally, the 48-Agriculture-based Regulated SACCOs for first time overtook both the Community-based and the Private Sector-based Regulated SACCOs to become second to the Government-based Regulated SACCOs in terms of their cumulative market share. This implies that during the reporting period, the 48-Agriculture-based Regulated SACCOs performed comparatively better in the growth of their assets than any other common bond cluster of the Regulated SACCO industry.

As already shown hereinabove, the 48-Agriculture-based Regulated SACCOs had the highest proportion of members in the Regulated SACCO industry with 40.64% of all the members, while the 116-Government-based Regulated SACCOs accounted for 36.51% of all members.

Figure 28 provides a comparative snapshot of the proportion of membership in the Regulated SACCO industry against the proportion of Regulated SACCOs within each of the cluster of fields of membership, and shows that although the 48-Agriculture-based Regulated SACCOs constituted about 13.52% of all the Regulated SACCOs which is the least among the Regulated SACCOs, the cluster had the highest proportion of membership at 40.64% with a proportion of total assets of 12.12%. The 116-Government-based Regulated SACCOs on the other hand constituted the highest proportion of all Regulated SACCOs at 32.68% of all Regulated SACCOs and at the same time had the highest proportion of total assets at 64.49% and also the

highest proportion of membership at 36.51%, thereby presenting a balanced and even distribution compared to the other clusters.

Figure 27: Comparative Total Assets' Market Share of Regulated SACCOs based on Fields of Membership (2022-2024)

Source: SASRA Database

Figure 28: Comparative Proportional Representation of Regulated SACCOs' Total Assets based on the Field of Membership Clusters and Proportion of Membership.

Source: SASRA Database

Based on their strategic importance, premised on their market share of total assets and total membership as provided hereinabove, the 116-Government-based Regulated SACCOs are themselves divided into five (5) sub-clusters which enables the profiling of their unique characteristics as discussed in **Table 10** of this *Report* namely the County Government based; the State Corporation based; the Teachers based; the Universities based; and lastly the General Services and Administration based Regulated SACCOs.

Figure 29 depicts the market share of Regulated SACCO industry's total assets of Kshs 1,076.15 trillion within the sub-clusters of Government-based SACCOs and shows that the Teachers' based Regulated SACCOs had the highest proportion of the total assets at 25.98% in 2024, which is a slight or marginal drop from a market share proportion of

29.44% in 2023. The General Services and Administration based Regulated SACCOs had the second highest proportion of the industry's total assets at 22.53% in 2024, which was also a marginal decline from a market share proportion of 22.77% in 2023; while the Universities based Regulated SACCOs continued to have the least market share at just about 1.01% in 2024, which was also a drop from a market share of 1.04% in 2023. The overall analysis shows that with the exception of the State Corporation based Regulated SACCOs which registered a marginal gain in the total assets' market share from 8.33% in 2023 to 8.37% in 2024, all the other sub-clusters of Government-based Regulated SACCOs recorded decline and explains the aggregate decline in the total assets' market share of Government-based Regulated SACCOs from 64.84% in 2023 to 64.49% in 2024 as discussed herein above.

Figure 29: Proportionate Distribution of Total Assets within the Sub-Clusters of Government-based Regulated SACCOs.

Source: SASRA Database

From the foregoing and notwithstanding the strategic importance of the Teachers based and the General Services based Regulated SACCOs, the high concentration of their Regulated SACCO Industry total assets cannot be overemphasized. It is

therefore expected that the Authority shall continue to deploy appropriate levels of resources in their supervision given the elevated risks which they portend to the Regulated SACCO industry, the financial sector and the national economy at large.

6.3. The Regulated SACCOs By Total Deposit Liabilities

6.3.1. General Distribution of Deposit Liabilities in the Regulated SACCO Industry.

The three (3) types of deposit liabilities within the Regulated SACCO industry are the non-withdrawable deposits (popularly known as BOSA deposits); the withdrawable deposits (popularly known as FOSA deposits); and the fixed or term deposits. **Table 15** provides the general distribution of the total deposits within the Regulated SACCO industry and shows that one (1) Regulated SACCO total deposits grew to cross the Kshs 5 billion threshold namely *M/S DEFENCE SACCO Society Ltd* whose total deposits grew to Kshs 6.38 billion in 2024 from Kshs 3.95 billion in 2023; thereby increasing the number of Regulated SACCOs with deposits above Kshs 5 billion to 40-Regulated SACCOs in 2024 made up of 38-DT-SACCOs and 2-NWDT-SACCOs; compared to 39-Regulated SACCOs in 2023 which was made up of 35-DT-SACCOs and 4-NWDT-SACCOs. It is imperative to observe that the increase in the number of DT-SACCOs with deposit liabilities above Kshs 5 billion from 35-DT-SACCOs in 2023 to 38-DT-SACCOs in 2024 is informed by the increase in the

deposits of one (1) DT-SACCO as explained hereinabove, but also by the conversion of two (2) former NWDT-SACCOs namely *M/S MHASIBU DT-SACCO Society Ltd* and *M/S NJIWA SACCO Society Ltd* to DT-SACCOs.

It is further observable that the 40-Regulated SACCOs with total deposits above Kshs 5 billion controlled 65.83% of the Regulated SACCO industry's total deposit liabilities, which is an increase from a proportion of 65.27% of the total deposit liabilities which was controlled by the 39-Regulated SACCOs in 2023. The foregoing shows an increasing trend of high concentration of deposits in just a few SACCOs, a scenario almost similar to the high concentration of total assets in just 60-Regulated SACCOs, cognizant that all the Regulated SACCOs with assets above Kshs 5 billion also had their deposits above Kshs 5 billion, even though the converse is not true.

Table 15: Distribution of the Total Deposit Liabilities of Regulated SACCOs by Size of the Deposits (2022-2024)

CATEGORY OF REGULATED SACCOs BY TOTAL DEPOSIT SIZE	SEGMENT OF REGULATED SACCOs	NUMBER OF SACCOs			TOTAL DEPOSITS (KSHS BILLIONS)			PROPORTION TO TOTAL DEPOSITS		
		2022	2023	2024	2022	2023	2024	2022	2023	2024
Total Deposits above Kshs. 5 billion	DT-SACCOs	30	35	38	359.93	421.65	481.99	58.01%	61.81%	64.31%
	NWDT-SACCOs	2	4	2	12.35	23.64	11.36	1.99%	3.46%	1.52%
	TOTAL	32	39	40	372.28	445.28	493.35	60.00%	65.27%	65.83%
Total Deposits between Kshs. 1 billion & Kshs. 5 billion	DT-SACCOs	51	47	50	128.45	117.64	131.45	20.70%	17.24%	17.54%
	NWDT-SACCOs	20	18	19	42.45	37.76	42.41	6.84%	5.53%	5.66%
	TOTAL	71	65	69	170.90	155.40	173.86	27.54%	22.78%	23.20%
Total Deposits below Kshs. 1 billion	DT-SACCOs	95	92	89	34.21	35.91	35.88	5.51%	5.26%	4.79%
	NWDT-SACCOs	161	161	157	43.05	45.60	46.34	6.94%	6.68%	6.18%
	TOTAL	256	253	246	77.27	81.51	82.22	12.45%	11.95%	10.97%
GRAND TOTAL		359	357	355	620.45	682.19	749.43			

Source: SASRA Database

Further analysis of the distribution of the total deposit liabilities shows that the number of Regulated SACCOs with total deposit liabilities ranging between Kshs 1 billion and Kshs 5 billion increased to 69-Regulated SACCOs in 2024 made up 50-DT-SACCOs and 19-NWDT-SACCOs, compared to 65-Regulated SACCOs within the cluster in 2023.

Their respective total deposit liabilities accounted for 23.20% of the total deposit liabilities of the Regulated SACCO industry representing Kshs 173.86 billion in 2024 as summarised in **Figure 30**. On the other hand, the Regulated SACCOs whose deposit liabilities remained below Kshs 1 billion threshold still constitute the majority of all Regulated SACCOs at

246-Regulated SACCOs in 2024 comprised of 89-DT-SACCOs and 157-NWDT-SACCOs, down from 253-Regulated SACCOs in 2023 comprised of 92-DT-SACCOs and 161-NWDT-SACCOs. The reduction in the number of NWDT-SACCOs with deposit liabilities below Kshs 1 billion, is informed by two (2) NWDT-SACCOs whose deposit liabilities grew to cross the

Kshs 1 billion threshold in 2024 namely *M/S Kentours Regulated NWDT-SACCO Society Ltd* and *M/S Nairobi Water Regulated NWDT-SACCO Society Ltd*; in addition to the two (2) NWDT-SACCOs whose authorizations were revoked in 2024 as discussed elsewhere in this Report.

Figure 30: Proportion of the Total Deposit Liabilities by Size and the Number of Regulated SACCOs (2022-2024)

Source: SASRA Database

6.3.2. Distribution of the Growth Rates of Total Deposit Liabilities

As discussed in **Table 12** on the performance and growth trends, the total deposit liabilities of the Regulated SACCOs grew in aggregate by 9.86% to reach Kshs 749.43 billion in 2024 from Kshs 682.19 billion in 2023. These deposit liabilities were made of Kshs 649.32 billion for DT-SACCOs segment representing a growth rate of 12.89% in 2024 and Kshs 100.11 billion for NWDT-SACCOs segment representing a growth rate of negative 6.44% in 2024. It is however noteworthy that these growth rates were not evenly distributed among the 355-Regulated SACCOs, with some recording positive growth rates while others recorded negative growth rates.

Figure 31 provides an analysis of the growth rates of the 177-DT-SACCOs and shows a total of 155-DT-SACCOs recorded positive growth rates in 2024 compared to a total of 156-DT-SACCOs which

recorded positive growth rates in their deposits and savings as follows –

- 83-DT-SACCOs whose deposits grew by over 10% with a cumulative sum of Kshs 40.29 billion being mobilised in 2024.
- 49-DT-SACCOs whose deposits grew at an average rate of between 5% and 10% with a cumulative sum of Kshs 18.68 billion being mobilised in 2024.
- 23-DT-SACCOs whose deposits grew at an average rate of between 0.1% and 5% with a cumulative sum of Kshs 1.30 billion being mobilised in 2024.

On the other side of the spectrum, the analysis showed that a total of 22-DT-SACCOs recorded negative growth rates in their total deposits in 2024, thereby implying that these SACCOs refunded more

deposits to their members than the sum of deposits mobilised during the period. In addition, the reduction in deposits in some of the Regulated SACCOs is also explained by the practice of some SACCOs utilising members' deposits or portions thereof to repay defaulted loans or towards the payment of members' share capital, where such minimum share capital is increased. Nevertheless, the 22-DT-SACCOs which registered negative growth rates in total deposit liabilities cumulatively shed-off

a total of Kshs 0.75 billion in 2024 from their savings and deposits, with 19-DT-SACCOs whose deposits declined at an average rate of between 0% and negative 5% shedding-off a total of Kshs 0.09 billion from their total deposit liabilities, while a total of 3-DT-SACCOs whose deposits declined at an average rate of between negative 5% and negative 10% shedding-off a cumulative sum of Kshs 0.66 billion from their total deposit liabilities.

Figure 31: Distribution of Growth Rates in Total Deposits of DT-SACCOs (2023-2024)

Source: SASRA Database

Among the NWDT-SACCOs segment on the other hand **Figure 32** provides the general growth rates in their total deposits liabilities and shows that a total of 139-NWDT-SACCOs recorded positive growth rates in their total deposit liabilities in 2024, compared to 141-NWDT-SACCOs which had positive growth rates in their total deposit liabilities in 2023. The distribution of the NWDT-SACCOs which recorded positive growth rates in 2024 was as follows –

- 45-NWDT-SACCOs grew their deposit liabilities at a rate above 10% with cumulative volume of deposits amounting to Kshs 5.38 billion being mobilised.
- 58-NWDT-SACCOs grew their deposit liabilities at an average rate of between 5%

and 10% with the cumulative deposits amounting to Kshs 2.46 billion being mobilised.

- 36-NWDT-SACCOs grew their deposits at a rate of just under 5% with the cumulative deposits of Kshs 0.48 billion being mobilised.

On the other side of the divide, there were 39-NWDT-SACCOs which recorded negative growth rates in their deposit liabilities during the period, meaning that they cumulatively shed-off more deposits than they mobilised. In total the 39-NWDT-SACCOs shed-off a total of Kshs 0.41billion, with 22-NWDT-SACCOs which declined at just under negative 5% (Kshs 0.10 billion); 11-NWDT-SACCOs which declined at a rate of between negative 5% and negative 10% (Kshs 0.12

billion); and 6-NWDT-SACCOs which declined at above negative 10% (Kshs 0.18 billion).

Figure 32: Distribution of Growth Rates in Total Deposits of NWDT-SACCOs (2023-2024)

6.3.3. Distribution of Deposit Liabilities by Field of Membership

Table 16 provides the distribution of the Regulated SACCO industry's total deposit liabilities amounting to Kshs 749.43 billion among the four main clusters of fields of memberships (common bond). Similar to the distribution of the total assets among the fields of memberships, the analysis shows that the 116-Government-based Regulated SACCOs had the highest proportion of the industry's total deposit liabilities amounting to Kshs 482.80 billion and representing a market share of 64.42% of the industry's total deposit liabilities.

This reflected a marginal drop from a market share of the Government-based Regulated SACCOs which

was 64.85% in 2023 and is explained by the significant increase in the market shares of Agriculture-based Regulated SACCOs to 10.90% in 2024 from a market share of 10.23% reported in 2023. It is significant to point out that similar gains were recorded by the 48-Agriculture-based Regulated SACCOs in their market share of the Regulated SACCO industry's total assets which increased to 12.12% in 2024 from 11.55% in 2023, and thus it can be concluded that the 48-Agriculture based Regulated SACCOs performed much better than the rest of the field of membership clusters.

Table 16: Distribution of Total Deposit Liabilities of Regulated SACCOs based on their Field of Membership

FIELD OF MEMBERSHIP (CLUSTER)	SACCO SECTOR /INDUSTRY	SACCO SEGMENT	NO. OF SACCOS		TOTAL DEPOSITS		PERCENTAGE TO TOTAL DEPOSITS	
			2023	2024	2023	2024	2023	2024

GRAND TOTALS			357	355	682.19	749.43		

Source: SASRA Database

Despite the gains made in their overall market share of total deposits, the 48-Agriculture-based Regulated SACCOs still has the least proportion of the total deposit's market share at 10.90% representing Kshs 81.66 billion in 2024; with the Private Sector-based Regulated SACCOs having a market share of 11.99%

representing cumulative deposits amounting to Kshs 89.85 billion; and the Community-based Regulated SACCOs having a total deposits' market share of 12.69% representing cumulative deposits amounting to Kshs 95.11 billion in 2024 as summarised in **Figure 33**.

6.3.4. Distribution of Total Deposit Liabilities by Types of Deposits

As already indicated elsewhere in this *Report*, there are three (3) main types of deposit liabilities held by Regulated SACCOs in Kenya, each with its unique characteristics. These are the withdrawable deposits (FOSA deposits); the non-withdrawable deposits (BOSA deposits); and the fixed or term deposits. Both the withdrawable and the fixed or term deposits are by their nature demand deposits and are thus

mobilised and held by DT-SACCOs only, while both the DT-SACCOs and the NWDT-SACCOs are legally permitted to mobilise and hold the non-withdrawable deposits (BOSA). **Table 17** shows a summary of the distribution of the Regulated SACCO industry deposits of Kshs 749.43 billion among the three (3) typologies of deposits.

Table 17: Summary of the Distribution of the Total Deposit Liabilities by Type and Nature of the Deposits						
DISTRIBUTION OF DEPOSIT LIABILITIES	SEGMENT OF REGULATED SACCOs	TOTAL AMOUNT OF DEPOSITS (KSHS)			Y-to-Y Change (2022/23)	Y-to-Y Change (2023/24)
		2022	2023	2024		
Withdrawable Deposits	DT-SACCOs	83,775,917,356	89,276,007,047	99,888,707,594	6.57%	11.89%
Fixed Term Deposits	DT-SACCOs	21,019,332,049	25,901,094,588	26,949,782,740	23.23%	4.05%
Non-withdrawable Deposits	DT-SACCOs	417,794,134,988	460,012,069,807	522,484,786,707	10.10%	13.58%
	NWDT-SACCOs	97,856,322,123	106,997,093,391	100,106,295,791	9.34%	-6.44%
	TOTAL	515,650,457,111	567,009,163,198	622,591,082,498	9.96%	9.80%
Grand Total		620,445,706,516	682,186,264,833	749,429,572,832	9.95%	9.86%
<i>Source: SASRA Database</i>						

The summary and analysis show that the non-withdrawable deposits (BOSA deposits) remain the most dominant type of deposit liabilities held by Regulated SACCOs amounting to Kshs 622.59 billion and representing 83.08% of the total deposit liabilities within the Regulated SACCO industry as depicted in **Figure 34**, which consisted of Kshs 522.48 billion held by DT-SACCOs and Kshs 100.11 billion held by NWDT-SACCOs. On the other hand, the withdrawable deposits held by Regulated SACCOs (DT-SACCOs) amounted to Kshs 99.89 billion representing a year-to-year increase of 11.89% in 2024 compared to a year-to-year increase of about 6.57% in 2023. The foregoing shows that more and more members of DT-SACCOs opted to save their disposable incomes in their savings accounts (FOSA) held at their individual DT-SACCOs

compared to the previous year and probably signifies improved confidence and trust in Regulated SACCOs.

The withdrawable deposits (FOSA) held by Regulated SACCOs nevertheless constituted just about 13.33% of the total deposit liabilities in the Regulated SACCO industry in 2024, being an increase from a proportion of 13.09% of the entire deposit liabilities in 2023. Being that demand deposits are easily accessible at any time by the depositors (members) through the usage of such channels as tellers, mobile money, ATM connectivity, Pesalink among others, the growth of these deposits implies that DT-SACCOs must put in place proper and adequate liquidity management plans.

6.3.5. Regulated SACCOs by Number of Deposit Accounts

The Authority continues to assess, monitor and respond to risks associated with deposit liabilities held by Regulated SACCOs through several tools including the quarterly Statement of Deposit Return, which every Regulated SACCO is statutorily required to submit to the Authority. The return monitors and assess the –

- range of amount of deposits held by the Regulated SACCOs;
- number of deposit accounts held by Regulated SACCOs within each range of deposits; and
- amount of deposits held by Regulated SACCOs in such accounts within each range of deposits.

Table 18 provides the overall summary of the statement of deposit return for the 355-Regulated SACCOs, while **Table 19** provides the proportion of the number of the deposit accounts held with the proportion of the deposits held therein. The analysis shows that the total number of deposit accounts held by all Regulated SACCOs increased by 9.74% to 16.05 million deposit accounts in 2024 from 14.52 million deposit accounts held in 2023. Since the total membership of Regulated SACCOs for the period ended December 2024 was about 7.39 million members and that SACCOs traditionally transact financial business with their members, it is apparent that each member has an average of two (2) accounts.

* The 2020 to 2023 excluded the number of deposits accounts for NWD-T-SACCOs as the same had not been collated

The analysis shows that the majority of the deposit accounts numbering 14.30 million representing 89.09% of all the deposit accounts held deposits below Kshs 50,000, but which cumulatively totalled to the sum of Kshs 43.90 billion representing just 5.86% of the total deposit liabilities in the industry. It is also imperative to note the bulk of these accounts are held by the Large-Tiered Regulated SACCOs which had a total of 8.58 million of these deposit accounts with a cumulative deposit of Kshs 31.59 billion. The high concentration of deposit accounts with amounts of less than Kshs 50,000 within the Large-Tiered Regulated SACCOs is another reason why the Authority must continue to deploy appropriate supervisory measures on them due to the risk they pose to the industry and the economy as a whole.

The analysis further shows that deposit accounts with funds of between Kshs 100,000 and Kshs 300,000 were the second highest in the Regulated SACCOs' industry with a total of about 616,000 deposit accounts representing 3.84% of all the

deposit accounts. These deposit accounts however held a total sum of Kshs 108.91 billion representing 14.53% of the total deposit liabilities in the industry.

On the other hand, it is noteworthy to observe that the bulk of the deposit liabilities within the Regulated SACCO industry amounting to over Kshs 566.04 billion and representing 75.53% of all the deposit liabilities were held in just about 694,000 deposit accounts representing 4.32% of all the deposit accounts, but whose individual value were above Kshs 300,000/-. In particular, deposits and savings amounting to Kshs 284.79 billion representing 38.00% of the total deposits were held in just about 554,000 deposit accounts (representing 3.45% of all the deposit accounts) whose deposits ranged between Kshs 300,000 and Kshs 1,000,000. At the same time, deposits and savings amounting to Kshs 281.25 billion representing 37.53% of the industry's total deposits, were held in about 140,000 deposit accounts which held funds above Kshs 1,000,000 representing 0.87% of all the deposit accounts.

6.4. The Sectoral Lending by Regulated SACCOs

The Regulated SACCO industry has adopted a standard and uniform reporting for its quarterly sectoral lending based on eight (8) economic sectors namely agricultural; trade; manufacturing and servicing industries; education; human health; land and housing; finance, investments and insurance; and consumption and social services sectors. The report is an important supervisory tool utilised by the Authority in tracking the sectors in respect of which Regulated SACCOs are earmarked to advance loans and credit facilities. This in turn allows the Authority to deploy prompt corrective actions associated with the risks prevalent or germane to a specific or particular sector of the economy.

Table 20 provides the sectoral lending report by Regulated SACCOs and shows that loans and credit facilities to the Agricultural sector received the

highest proportion amounting to Kshs 108.80 billion representing 20.05% of the total loans and credit advances issued by Regulated SACCOs in 2024, compared to a proportion of 16.96% issued to fund agricultural activities in 2023. This finding is consistent with the increased growth rates in the total assets of Agriculture-based Regulated SACCOs whose market share increased to 12.12% in 2024 from a market share of 11.55% in 2023. Similar growth in the total deposits' market share of Agriculture-based Regulated SACCOs which increased to 10.90% in 2024 from a market share of 10.23% and confirms that the Agriculture based Regulated SACCOs largely performed much better than their counterparts, but conscious of the fact that sectoral loans towards the agricultural sector is not restricted to the Agriculture based Regulated SACCOs only.

Table 20: Sectoral Credit Lending by Regulated SACCOs, 2024

Source: SASRA Database

From the foregoing analysis the highest proportion of loans and credit advances issued by Regulated SACCOs in 2024 were however earmarked towards land and housing sectors of the economy with the sum of Kshs 137.12 billion representing 25.26% of all the loans and credit advances being disbursed during the year. This was however marginal drop from a proportion of 26.97% of the total loans and credit advances towards the land and housing sectors issued by Regulated SACCOs in 2023 as depicted in **Figure 35**. It is noteworthy that although the proportion of loans and credit advances issued by

Regulated SACCOs towards land and housing sectors remained the highest and most dominant, the same has been on a downward trajectory from a market share of 33.24% in 2022 to 26.97% in 2023 and 25.26% in 2024. At the same time the proportion of loans and credit advances issued towards the agricultural sectors of the economy has been on an upward trajectory, albeit with marginal increases from 13.76% in 2022 to 16.96% in 2023 and 20.05% in 2024 probably buoyed by the good weather patterns over the last two (2) years as well as government interventions through subsidies.

Figure 35: Proportionate Sectoral Lending of Regulated SACCOs by Economic Sectors (2022 -2024)

Source: SASRA Database

The education sector of the economy however remains the second highest beneficiary of the loans and credit advances issued by Regulated SACCOs for the third year running with a total sum of Kshs 119.49 billion having been issued by Regulated SACCOs to fund education mainly in the form of school and college fees. This was an increase from a proportion of 20.92% of all the total loans and credit advances issued by Regulated SACCOs to fund the education

sector in 2023, and therefore underscores the critical role being played by Regulated SACCOs in the education sector. It projected that this trend will continue as Regulated SACCOs seeks to meet the socio-economic objectives of their membership.

Loans and other credit facilities issued by Regulated SACCOs towards the trade, human health, manufacturing and servicing industries sector of the

economy however recorded marginal declines in 2024, even as the education; agricultural; and the finance, investments and insurance sectors of the economy were recording marginal increases. In particular, the loans and credit advances issued to fund trade sector amounted to Kshs 63.14 billion representing 11.63% of the total loans and credit advances in 2024, which is a decline from a market share proportion of 12.64% which funded the trade sector in 2023. The human health sector on the other hand received loans and credit advances amounting to Kshs 10.85 billion representing 2.00% of the total loans and credit advances in 2024, which was a decline from a market share proportion of 3.14% which funded the human health sector in 2023.

Table 21 provides a snapshot of all the loans and credit advances issued and disbursed by Regulated SACCOs to the eight (8) economic sectors, each categorised by its unique subsectors. For instance, under the Agricultural sector, the total loans and credit advances amounting to Kshs 108.80 billion was distributed within five (5) sub-sectors namely crop farming Kshs 69.04 billion representing 12.72%; animal production Kshs 29.89 billion representing 5.51%; agricultural supporting services Kshs 4.54 billion representing 0.84%; agribusiness Kshs 4.42 billion representing 0.81%; and forestry and logging Kshs 0.91 billion representing 0.17% of the total loans and credit advances issued and disbursed by Regulated SACCOs in 2024.

Table 21: Summary of Loans and Credit Advances Disbursed by Regulated SACCOs by Economic Sectors and Sub-sectors

	ECONOMIC SECTOR	AMOUNTS DISBURSED (KSHS BILLIONS)		PROPORTION TO TOTAL DISBURSED		% CHANGE (2023/24)

	TOTAL	460.47	542.75			

Source: SASRA Database

Under the land and housing sector the total loans and credit advances amounting to Kshs 137.12 billion was disbursed and distributed under land acquisition or purchase of Kshs 69.79 billion, while Kshs 67.33 billion was disbursed towards housing purchase or construction. The increase in the funding

by Regulated SACCOs towards land and housing sectors is consistent with the findings of the Kenya National Bureau of Statistics (KNBS) Economic Survey, 2025, which reported that SACCOs made the highest financing arrangements towards the real estate market at 31.8% as summarised in **Figure 36**.

7.0. FINANCIAL STABILITY OF THE REGULATED SACCO INDUSTRY

7.1. Introduction

The financial stability of Regulated SACCOs both at the industry level and at the individual institutional levels are reported, monitored and assessed based on the CAEL rating framework recommended for the supervision of deposit-taking credit financial institution across the world. The CAEL rating framework measures, assesses, monitors and reports the financial institutions level of compliance with the capital adequacy; the asset quality; the earnings; and the liquidity position against prescribed standards or internationally recognised best practices. The *Regulations 2010* prescribes some of the standards to be complied with by DT-SACCOs, while the *Regulations 2020* prescribes some of the standards to be complied with by NWDT-

SACCOs in assessing their CAEL ratings both at institutional and industry-wide levels.

Table 22 provides the overall CAEL rating for the DT-SACCOs and shows marked improvement in all the key indicators of capital adequacy, asset quality, earnings and liquidity positions of the DT-SACCOs. In particular, there was increased capitalization of the DT-SACCOs segment to Kshs 163.25 billion in 2024 from Kshs 133.81 billion in 2023. The capital adequacy ratio of core capital to total assets cumulatively increased to 17.28% in 2024 from 16.07% in 2023; while the institutional capital to total assets ratio increased to 11.97% from 9.11% demonstrating that many DT-SACCOs retained surpluses to build their institutional capital.

Source: SASRA Database

The main assets of DT-SACCOs is normally the loans and other credit advances with the quality measurement thereof being the non-performing loans ratio. In this regard the non-performing loans ratio for DT-SACCOs decreased to 8.56% in 2024 from 8.66% reported in 2023, thus signifying a much better loan quality during the year. The liquidity ratio reported at 61.34% in 2024 was equally held above the prescribed minimum of not less than 15%, while the external borrowing ratio dropped to 2.51% in 2024 from a ratio of 3.02% in 2023 against the prescribed maximum of 25%, meaning that more and more DT-SACCOs are utilising internally mobilised resources to fund their asset portfolios and shunning external loans.

Table 23 on the other hand provides the overall CAEL rating for the NWDT-SACCOs and shows that the NWDT-SACCOs segment also recorded marked improvement in the key CAEL rating indicators. The capital adequacy indicator of core capital to total assets increased to 10.87% in 2024 from a ratio of 10.40% in 2023, while the retained earnings and disclosed reserves to core capital increased to 66.89% against the prescribed minimum of 50% which also shows increased retention of surpluses during the year under review. The non-performing loans ratio for the NWDT-SACCOs segment also decreased to 7.07% in 2024 from 7.12% in 2023 thus signifying improved loan quality.

7.2. The Capital Adequacy Indicators for Regulated SACCOs

7.2.1. The Capital Adequacy for DT-SACCOs

The law defines core capital as the “*fully paid-up members’ shares, capital issued, disclosed reserves, retained earnings, grants and donations all of which are not meant to be expended unless on liquidation of the SACCO society*”. This definition corresponds to the Common Equity Tier I (CETI) capital under the Basel Accord and is what is used to monitor and assess Regulated SACCOs capital adequacy levels. The provisions of *Reg. 9 of the Regulations 2010* and *Regulations 11 of the Regulations 2020* prescribe the minimum core capital and capital adequacy requirements which every DT-SACCO and NWDT-SACCOs respectively, must maintain at all times, even though in individual circumstances, the Authority has prescribed higher capital adequacy requirements for certain Regulated SACCOs, as a compliance and supervisory enforcement tool.

Figure 37 provides the trend analysis of the DT-SACCOs’ level of compliance with the key indicators of capital adequacy namely the core capital to total assets; core capital to total deposits; and institutional capital to total assets. The trend analysis shows that the DT-SACCOs core capital in absolute terms have been increasing steadily over the years which is consistent with the growth of their asset base. In this regard, the DT-SACCOs core capital to total assets ratio which measures the capital strength of the DT-SACCOs to withstand shocks and absorb unexpected losses increased to 17.28% in 2024 from a ratio of 16.07% in 2023 and thus underscores the overall continued resilience of the Regulated SACCO industry to withstand unexpected external shocks which may impair or cause impairment of their assets.

Figure 37: Trend Analysis of level of Compliance with Capital Adequacy Requirements by DT-SACCOs

Source: SASRA Database

The institutional capital to total assets ratio equally increased to 11.97% in 2024 from a ratio of 9.11% in 2023 which came as a result of prudent business

practices of increased retention of surpluses by DT-SACCOs which grew by 23.28% in 2024 compared to a decline of negative 1.86% in 2023. This came about

as a result of sustained administrative and policy campaigns for Regulated SACCOs to reset their business models towards ensuring that a large proportion of their core capital was made up of institutional capital to fund their operations, rather than share capital which is quite expensive given the demand for returns on the same by members. Indeed, in the traditional cooperative model, share capital ought to be nominal and thus the rest of the capital should be institutional since Regulated SACCOs being cooperatives in nature are for service and not for profit entities. The Authority projects to continue with the campaign which in the long run will ensure resilience and stability of the Regulated SACCO industry both at the individual and industry levels.

At the individual institutional level of compliance, **Figure 38** shows that a total of 171-DT-SACCOs had their core capital above the prescribed minimum threshold of Kshs 10 million in 2024 which is an increase from a total of 167-DT-SACCOs which were compliant in 2023. Thus only 6-DT-SACCOs were none compliant with this minimum entry requirement and are thus operating on strict conditional licenses and/or regulatory oversight. In regard to the core capital to total deposits ratio, a total 172-DT-SACCOs were operating above the prescribed minimum ratio of 8% in 2024, which again is an increase from a total of 168-DT-SACCOs which operated above the minimum ratio of 8% in 2023 as summarised in **Figure 39**. Conversely, only 5-DT-SACCOs were operating below the half-way line of the prescribed minimum and thus operating on strict conditional licenses and/or regulatory oversight.

Figure 38: Number of DT-SACCOs Complying with Core Capital (CC) Requirements, 2024

Source: SASRA Database

Figure 39: Number of DT-SACCOs Complying with Core Capital to Total Deposits (CCD) requirements, 2024

Source: SASRA Database

Figure 40 on the other hand depicts the number of DT-SACCOs individual level of compliance with both the core capital to total assets ratio and the institutional capital to total assets ratio which as indicated hereinabove are critical measurement of the availability of free capital to absorb losses arising from unexpected impairment of their assets. With

regard to the core capital to total assets ratio, a total of 172-DT-SACCOs were compliant in 2024 with a ratio above 10%, which is an increase from 167-DT-SACCOs which were compliant in 2023. This left only 5-DT-SACCOs being non-compliant in 2024 with core capital to total assets ratio of just below 5% and are thus operating under strict conditions and

heightened supervision. The reduction of number of DT-SACCOs which were non-compliant with the ratio from 7-DT-SACCOs in 2023 to 5-DT-SACCOs in 2024 without revocation of the licenses is also testament that supervisory and regulatory interventions under certain conditions have had the effect of restoring the capital adequacy position of Regulated SACCOs.

Similar trend analysis of improved compliance is also evident with regard to the institutional capital to total assets ratio of the DT-SACCOs with a total of 143-DT-SACCOs being fully compliant with a ratio above the

prescribed minimum of 8% in 2024, compared to a total of 139-DT-SACCOs which were fully compliant with the ratio in 2023. The net effect is that only 34-DT-SACCOs had their institutional capital to total assets ratio below the 8% threshold, out of which 22-DT-SACCOs operated above the half-way mark of 4%, while the remaining 12-DT-SACCOs operated with institutional capital to total assets ratios of below 4%. The latter category is thus operating on strict conditional licenses as well as other supervisory actions.

Figure 40: Number of DT-SACCOs Complying with Core Capital to Total Assets and Institutional Capital to Total Assets Respectively, 2024

Source: SASRA Database

7.2.2. The Capital Adequacy Indicators For NWDT-SACCOs

As observed hereinabove, the *Regulations 2020* prescribes the minimum capital adequacy ratios to be observed by the NWDT-SACCOs segment, which are distinct from the capital adequacy ratios of the DT-SACCOs. This is premised on the distinction of their business models with DT-SACCOs taking demand deposits and savings and thus considered riskier, while NWDT-SACCOs do not take demand deposits and thus considered comparatively less risky. The capital adequacy ratios to be maintained by NWDT-SACCOs are thus lower than those maintained by the DT-SACCOs. They include the core capital to total assets ratio to be maintained at a minimum of 8%; the core capital to total deposits

ratio to be maintained at not less than 5%; and the retained earnings and disclosed reserves to core capital to be maintained at not less than 50%.

Figure 41 provides a trend analysis of the three capital adequacy ratios for NWDT-SACCOs between 2020 and 2024 indicating a progressive increase in each of the ratio's overtime, and the fact that on aggregate the NWDT-SACCOs have been able to maintain each of the ratios above the prescribed limits. The core capital to total assets have been progressively growing from a low of 6.72% in 2020 to 7.49% in 2021, which was the first year of prudential regulations for NWDT-SACCOs, to 8.40% in 2022,

10.40% in 2023 and 10.87% in 2024, thereby signifying increased stability overtime. On the other hand, the retained earnings and disclosed reserves to the core capital which was on a downward trend trajectory between 2021 and 2023, made significant gains in 2024 by increasing to 66.89% from 62.49% recorded in 2023, buoyed mostly by increased retention of surpluses.

Lastly, the core capital to total deposits ratio of NWDT-SACCOs also recorded significant increase to 14.26% for the period ended December 2024 from a ratio of 13.51% in 2023. Just like with the core capital to total assets ratio, the core capital to total deposits ratio of NWDT-SACCOs have been progressively increasing since the first year of prudential supervision in 2021 when the same stood at 9.59%.

Figure 42 provides a snapshot of the individual institutional level of compliance by NWDT-SACCOs with regard to core capital in absolute terms and core capital to total deposits ratio, which are required to be maintained at not less than Kshs 5 million and at 5% respectively. The analysis shows that a total of 172-NWDT-SACCOs were fully compliant with the absolute core capital amount of not less than Kshs 5 million in 2024, with only 6-NWDT-SACCOs being non-compliant. On the other side of the spectrum a total of 167-NWDT-SACCOs were fully compliant with the core capital to total deposits ratio of not less than 5% in 2024, which is a drop from the 172-NWDT-

SACCOs which were fully compliant with the ratio in 2023.

The decline in the number of compliant NWDT-SACCOs is generally explained by the fact that three (3) former NWDT-SACCOs converted to DT-SACCOs business and are thus reported under the DT-SACCOs segment, while two (2) other NWDT-SACCOs had their authorizations revoked in 2024 and thus do not form part of this analysis. In effect therefore, the number of NWDT-SACCOs which failed to comply with this ratio remained at 6-NWDT-SACCOs in 2024, as they were in 2023.

Figure 42: Number of NWDT-SACCOs complying with core capital (CC) and core capital to total deposits ratio, 2024

Source: SASRA Database

Figure 43 on the other hand presents the number of NWDT-SACCOs complying with the twin ratios of core capital to total assets and the retained earnings and disclosed reserves to core capital which are prescribed to be maintained at a minimum of 8% and 50% respectively. The analysis shows that a total of 136-NWDT-SACCOs maintained their core capital to total assets ratio above the minimum threshold of 8% in 2024 and thus were fully compliant, compared to 122-NWDT-SACCOs which were fully compliant in 2023.

Conversely, a total of 42-NWDT-SACCOs operated below the prescribed minimum threshold with 31-NWDT-SACCOs having a core capital to total assets ratio of between 4% and 8%; while the remaining 11-NWDT-SACCOs had their core capital to total assets ratio below 4%. These NWDT-SACCOs are thus operating on stringent conditions and supervisory sanctions including but not limited to prohibition from paying dividends, interests or other gratuitous payments with the aim of ensuring that they improve their core capital to total assets ratio which is critical in absorbing unexpected losses to which their assets are exposed or likely to be exposed to.

Figure 43: Number of NWDT-SACCOs Complying with Core Capital to Total Assets (CCA) and Retained Earnings to Core Capital (RCC) ratio, 2024

Source: SASRA Database

In regard to the retained earnings and disclosed reserves to core capital, the analysis shows that 116-NWDT-SACCOs were fully compliant, with the ratio maintained above 50% in 2024, which is an increase from 114-NWDT-SACCOs which were fully compliant with the ratio in 2023. Additionally, the analysis

shows that 47-NWDT-SACCOs had their retained earnings and disclosed reserves to core capital ratio between 25% and 50% in 2024, with the remaining 15-NWDT-SACCOs operating outside the allowable margin of deviance.

7.3. The Assets and the Quality of Assets of Regulated SACCOs

7.3.1. The Composition of Assets

Assets generally represent a financial institution's economic resources and define its ability to generate revenue, manage risks, and fulfil obligations. They are thus considered to be the backbone of a financial institutions' balance sheet or statement of financial position and Regulated SACCOs being deposit-taking financial institutions are no exception. In this regard, the Authority places a lot of emphasis in the composition of the asset portfolios of Regulated SACCOs both at individual institutional levels and at the industry sector wide levels, in order to

understand and respond to the risks associated with each class or category of assets. As already indicated hereinabove, the total assets of the Regulated SACCOs for the year ended December 2024 amounted to Kshs 1.076 trillion which is an increase from a sum of Kshs 971.76 billion in 2023. **Table 24** provides a summary of the composition of the Regulated SACCOs' total assets while **Figure 44** provides a snapshot of the proportionate distribution of the total assets.

Table 24: The Composition of Total Assets of Regulated SACCOs in 2024

TYPE OF ASSET	SACCO CLUSTER	AMOUNT IN KSHS BILLIONS				PERCENTAGE TO TOTAL ASSETS			
		2021	2022	2023	2024	2021	2022	2023	2024

Source: SASRA Database

The analysis shows that net loans constituted the highest proportion of Regulated SACCOs total assets at 73.36% in 2024 amounting to Kshs 789.42 billion, which is an increase from a proportion of 72.66% of total assets which constituted net loans in 2023. Indeed, the trend analysis shows that the proportion of net loans to total assets have been progressively increasing from 70.95% in 2021, to 71.97% in 2022, 72.66% in 2023 and 73.36% in 2024, implying an

overall increased lending and intermediation by Regulated SACCOs. The cash and cash equivalents of Regulated SACCOs also recorded a marginal proportionate increase to 9.21% amounting to Kshs 99.15 billion in 2024, compared to a proportion of 9.05% of the total assets in 2023. The proportion of financial investments as well as property and equipment both recorded marginal declines during the year under review.

Figure 44: Proportionate composition of the Total Assets of Regulated SACCOs

7.3.2. The Financial Investments of Regulated SACCOs

The financial investments component of Regulated SACCOs total assets is largely made up of investments in government securities, placement in other SACCOs, investment in shares of National Cooperative Organisations (NACOs), investment in the shares of other listed companies, and investments in money market securities mainly

regulated collective investment schemes such as unit trusts and money market funds. **Table 25** provides a summary of the composition of the financial investments made by Regulated SACCOs while **Figure 45** depicts the proportionate distribution of each component of the financial investments.

Table 25: Composition of the Financial Investments by Regulated SACCOs

FINANCIAL INDICATOR	DT-SACCOs			NWD-T-SACCOs			TOTALS			% PROPORTIONS		
	2022	2023	2024	2022	2023	2024	2022	2023	2024	2022	2023	2024
GOVERNMENT SECURITIES (KSHS B)	9.61	16.71	18.74	1.59	2.02	2.60	11.20	18.72	21.35	22.43%	27.16%	34.87%
PLACEMENT IN SACCOs (KSHS B)	9.41	21.22	10.99	5.58	7.55	3.34	14.99	28.77	14.33	30.00%	41.74%	23.41%
SHARES IN NACOs (KSHS B)	17.56	16.78	17.05	1.56	0.89	2.25	19.12	17.67	19.31	38.28%	25.64%	31.54%

TOTAL	38.89	56.68	50.44	11.06	12.25	10.78	49.95	68.93	61.21			

Source: SASRA Database

The analysis shows sharp increase in Regulated SACCOs financial investments in government securities to Kshs 21.35 billion in 2024, representing 34.87% of the total financial investments from a proportion of 27.16% in 2023. There was however a sharp decline in the placement with NACOs from a high of 41.74% in 2023 to 23.41% in 2024, implying

that Regulated SACCOs are divesting from such investments to other options with investment on regulated Collective Investment Schemes (unit trusts and money markets) being the most popular as evidenced with a proportionate increase to 9.02% of the total financial investments in 2024 from just about 2.40% in 2023.

The Authority projects that Regulated SACCOs shall in the medium to long term be increasing their investment in government securities and regulated collective investments. This is because of the fact that these investments are considered liquid and can be converted to cash within a short period of time, while at the same time they are considered relatively

risk free. Additionally, the regulated investment schemes particularly money market funds have been gaining popularity in Kenya, while investing in government securities has been made easy by the Central Bank of Kenya through its DhowCSD platform.

Figure 45: Proportionate trends of Financial Investments Components of Regulated SACCOs

Source: SASRA Database

7.3.3. The Loan Portfolio of Regulated SACCOs

Table 26 provides a trend analysis of the loan portfolio of Regulated SACCOs in 2024 encompassing the gross loans; the allowance for loan losses; and the net loans and advances. In particular, the gross loans of all the Regulated SACCOs increased to Kshs 845.11 billion in 2024 from Kshs 758.57 billion in 2023, signifying a decrease in the year-to-year growth rate to 11.41% in 2024 compared to year-to-year growth rate of 11.50% in 2023. The net loans and advances on the other hand grew by 11.78% in 2024 to reach Kshs 789.42 billion from Kshs 706.21 billion in 2023.

The sharp increase in the net loans and advances is basically due to the decrease in the allowance for loan loss computed as the provisioning for the loans classified under the performing (1%), watch (5%), substandard (25%), doubtful (50%), and loss (100%) categories as prescribed by law. The allowance for loan loss in aggregate increased by just 6.38% in 2024 to Kshs 55.69 billion from Kshs 52.35 billion reported in 2023. This shows that there was an improvement in the general quality of the Regulated SACCOs' loan assets, as evidenced by a non-performing loans ratio of 8.56% for DT-SACCOs and 7.07% for NWDT-SACCOs as discussed elsewhere in this *Report*.

Table 26: Summary of the trends in the Loan Portfolio of Regulated SACCOs (2021-2024)

LOAN PORTFOLIO	CLUSTER OF SACCOs	AMOUNT IN KSHS. BILLIONS				Y-to-Y CHANGE

7.3.4. Growth Rates in Gross Loans and Credit Advances

Although the overall growth rate of the gross loans for the Regulated SACCOs increased by 11.4% in the aggregate for all Regulated SACCOs and by 14.12% for DT-SACCOs segment and negative 5.21% for NWDT-SACCOs segment, it is noteworthy that some of Regulated SACCOs actually registered negative growth rates in their gross loans, implying that they disbursed much less loans than the repayments. **Figure 46** provides a summary of the growth rates of DT-SACCOs based on three (3) ranges as follows –

- There was a total of 99-DT-SACCOs whose gross loans grew by over 10% in 2024 with cumulative total disbursement of Kshs 70.02 billion, compared to 78-DT-SACCOs which had similar growth rates in 2023, with cumulative disbursement of Kshs 32.93 billion.
- There was 25-DT-SACCOs whose gross loans grew by between positive 5% and positive 10% with cumulative amount of Kshs 5.48 billion being disbursed. This contrasts with 45-DT-SACCOs whose gross loans grew by a similar range in 2023, but which disbursed 15.78 billion.
- There was a total of 25-DT-SACCOs whose gross loans grew by between positive 0.01% and positive 5% with a cumulative sum of Kshs 3.07 billion being disbursed in 2024, compared to 33-DT-SACCOs which grew by

a similar range in 2023 but with cumulative sum of Khs 4.28 billion being disbursed.

In total therefore a total of 149-DT-SACCOs recorded positive growth rates in their gross loans disbursing a cumulative sum of Kshs 78.56 billion in 2024, compared to 156-DT-SACCOs which recorded positive growth rates in their respective gross loans with a cumulative sum of Kshs 52.99 billion in 2023.

Conversely, the analysis in **Figure 46** indicates the number of DT-SACCOs which recorded negative growth rates in their gross loans, which increased to 28-DT-SACCOs in 2024 from 19-DT-SACCOs in 2023 within the following negative ranges –

- There were 21-DT-SACCOS whose gross loans declined by under 5% with a total sum of Kshs 0.46 billion being shed-off from their gross loan portfolios.
- There were 4-DT-SACCOs whose gross loans declined at an average rate of between negative 5% and 10%, with a total sum of Kshs 0.27 billion being shed-off from their gross loan portfolio.
- There were 3-DT-SACCOs whose gross loans declined on average by over negative 10% with a cumulative sum of Kshs 0.09 billion being shed-off from their gross loan portfolio.

Figure 46: Distribution of the Growth Rates in Gross Loans of DT-SACCOs (2023-2024)

Source: SASRA Database

The Regulated SACCOs within the NWDT-SACCOs segment equally recorded both positive and negative growth rates in their individual gross loans as more particularly elaborated in Figure 47 using the three (3) ranges on both the positive and the negative side of the growth rates. In particular a total of 137-NWDT-SACCOs recorded positive growth rates in their gross loan portfolio with a cumulative increase of Kshs 10.14 billion in 2024. In particular –

- a) 69-NWDT-SACCOs grew their gross loans by over 10% in 2024 resulting in a total increase of their gross loans by Kshs 8.11 billion.

- b) 39-NWDT-SACCOs had their individual gross loans grow by between 5% and 10% resulting into a cumulative increase of Kshs 1.74 billion in their gross loans.
- c) 29-NWDT-SACCOs had their individual gross loans grow by under 5% resulting into a cumulative increase of their gross loans by Kshs 0.29 billion.

Figure 47: Distribution of the Growth Rates in Gross Loans of NWDT-SACCOs, 2024

Source: SASRA Database

On the negative side of the spectrum a total of 37-NWDT-SACCOs recorded negative growth rates during the year ended December 2024 with a

cumulative sum of Kshs 0.76 billion being shed-off from their cumulative gross loans portfolio in 2024.

7.3.5. The Quality of the Loan Portfolio of Regulated SACCOs

Loans and credit advances constituted 73.00% of the total assets of the Regulated SACCO industry in 2024, underpinning their critical role as the most important portion of their assets which must be prudently managed at all times. The Authority assesses and monitors the quality and performance of Regulated SACCOs' loan asset using the statutory Risk Classification of Assets and Provisioning Quarterly Return as prescribed in *Regulations 2010* for DT-SACCOs and *Regulations 2020* for NWDT-SACCOs. The return reports the Regulated SACCOs allowance for loan losses generally at individual institutional level and at the aggregate industry level, as well as the non-performing loans ratio.

Table 27 provides a summary of the consolidated Risk Classification of Assets and Provisioning return for the period ended December 2024 and generally shows that there was comparatively improved quality of the Regulated SACCOs' loans compared to the previous year. In particular, 86.71% of the gross loans amounting to Kshs 732.84 billion were classified as performing in 2024, thereby requiring the statutory 1% provisioning compared to 86.52% of the total loans which were classified as performing in 2023. Additionally, there was reduction in the proportion of loans classified under the watch category and the loss categories, while the proportion of gross loans classified under sub-standard and doubtful categories increased.

Table 27: Consolidated Risk Classification of Assets and Provisioning Return, 2024

Classification of Loans	PROVISIONING RATE	GROSS LOANS (KSHS. BILLIONS)							PERCENTAGE TO TOTAL GROSS LOANS		
		2022	2023			2024					
		ALL REGULATED SACCOs	DT-SACCOs	NWDT-SACCOs	TOTALS	DT-SACCOs	NWDT-SACCOs	TOTALS	DT-SACCOs	NWDT-SACCOs	TOTALS
Performing (As per contract)	1%	589.23	561.99	92.89	654.87	645.66	87.17	732.84	86.74%	86.52%	86.71%

Provisions/Gross Loan		6.16%	7.44%	4.93%	7.09%	7.21%	4.93%	6.94%			
Portfolio at Risk (NPL/Gross Loans)		8.34%	8.66%	7.12%	8.45%	8.56%	7.07%	8.39%			

Source: SASRA Database

The proportion of gross loans reported under the watch category, and which are reported to be outstanding for under 30 days decreased to 4.90%

amounting to Kshs 41.40 billion in 2024 compared to a proportion of 5.22% in 2023 as depicted in **Figure 48**. This means that Regulated SACCOs did place a

lot of effort in the recovery of the loans under this category which ensured that the same did not deteriorate to sub-standard category which would then increase their NPL ratio. The Authority therefore urges the Regulated SACCOs to continue identifying troubled loan accounts classified under watch category early enough, so as to put in place adequate remedial measures to avoid the same going into the default stage.

In regard to the loans classified under the sub-standard category, that is those loans outstanding for more than one (1) to six (6) months, the analysis shows that the proportion thereof to gross loans increased to 2.65% in 2024 with an amount of Kshs 22.41 billion, compared to a proportion of the total gross loans of 2.61% in 2023. On the other hand, the proportion of the loans classified under the doubtful category also increased marginally to 1.15% in 2024 representing a sum of Kshs 9.70 billion compared to a proportion of 1.04% recorded in 2023.

Figure 48: Proportionate Classification of the Performance of the Loans (2023-2024)

Source: SASRA Database

In regard to the non-performing loans (NPL) ratio compromising of the proportion of loans classified under substandard, doubtful and loss categories to the industry's gross loans, the analysis show that the aggregated NPL ratio for the Regulated SACCO industry improved marginally to 8.39% in 2024 from a non-performing loans ratio of 8.45% in 2023. This was largely attributed to the improved quality of loans in both segments of the Regulated SACCOs with the DT-SACCOs segment's NPL ratio improving to 8.56% in 2024 from an NPL ratio of 8.66% in 2023

on the one hand, while the NWDT-SACCOs segment's NPL ratio improved from 7.12% in 2024 to an NPL ratio of 7.07% in 2023. **Figure 49** provides a comparative trend analysis of the NPL ratio of the Regulated SACCOs against the changes in their gross loan portfolio and shows that for two (2) years running, although the gross loans has continued to increase, the NPL ratio for DT-SACCOs segment, the NWDT-SACCOs segment and the aggregate for all Regulated SACCOs has been improving progressively.

Figure 49: Comparative Trend Analysis of the NPL Ratio Against the Gross Loans (2023 – 2024)

7.3.6. The Distribution of the NPL Ratio among the Regulated SACCOs

At the institutional levels of individual Regulated SACCOs, **Figure 50** provides an analysis of the distribution of NPL ratio and shows that among the DT-SACCOs' segment, 68-DT-SACCOs had an NPL ratio of below 5% in 2024 compared to 65-DT-SACCOs which had their NPL ratio below 5% in 2023. Among the 68-DT-SACCOs which had an NPL ratio of below 5%, a total of 28-DT-SACCOs had their NPL ratio at below 2% which is highly commendable while the remaining 40-DT-SACCOs had their NPL ratio averaging between 2% and 5%.

On the other hand, there were 109-DT-SACCOs whose NPL ratio were above 5% in 2024 which is the same as those which had similar range of NPL ratio in 2023, with the deviation being occasioned by the increase in the number of DT-SACCOs following the conversion of three (3) previously authorized NWDT-SACCOs to licensed DT-SACCOs. In addition, it is observable that among the 109-DT-SACCOs whose NPL ratios stood above 5%, a total of 68-DT-SACCOs had their NPL ratio above 10% implying a worrying

state of the quality of their loan assets. These group of DT-SACCOs must thus put in more efforts towards their loan recovery initiatives in order to reduce the apparent risk of further deterioration of their loan assets.

The NWDT-SACCOs segment equally had mixed results in the distribution of the NPL ratio among the individual NWDT-SACCOs, with a total of 99-NWDT-SACCOs registering NPL ratios of below 5% in 2024 compared to 101-NWDT-SACCOs which had NPL ratios below the 5% threshold in 2023. Among these 99-NWDT-SACCOs with NPL ratio below 5%, a total of 64-NWDT-SACCOs had their NPL ratio below 2% thus showing very good quality of their loan assets, while the remaining 35-NWDT-SACCOs had their NPL ratio range between 2% and 5%. Conversely, there were a total of 79-NWDT-SACCOs whose NPL ratios were above 5%, out of which 44-NWDT-SACCOs had NPL ratios above 10% thus calling for urgent remedial measures in order to reverse the trend.

Figure 50: The Distribution of the NPL Ratio among Regulated SACCOs (DT-SACCOs and NWDT-SACCOs).

Source: SASRA Database

7.3.7. The Quality of the Loan Portfolio of Regulated SACCOs by Common Bond

Figure 51 provides the quality of the loan assets of the DT-SACCOs based on the categorization by fields of membership (common bonds). The Private sector-based DT-SACCOs had the least aggregate NPL ratio in 2024 at 5.73% against their gross loans amounting to Kshs 59.25 billion, compared to their aggregate NPL ratio of 6.18% recorded in 2023. Despite the growth in their gross loans therefore, the Private sector-based DT-SACCOs were able to ensure that

their NPL ratio decreased and not increased. Similar reduction in the NPL ratios for all the fields of membership categorization of DT-SACCOs was witnessed despite the relative growth in the gross loans for each of the fields of membership, thus contributing to the reduction on the aggregate NPL ratio of DT-SACCOs to 8.56% in 2024 from 8.66% in 2023 as already discussed hereinabove.

Figure 51: Distribution of NPL Ratio for DT-SACCOs based on Fields of Membership.

Source: SASRA Database

The Agriculture-based DT-SACCOs with a gross loan portfolio of Kshs 95.93 billion, continued to have the highest NPL ratio at 18.69% in 2024 but which was nevertheless a marginal drop from an NPL ratio of 18.89% recorded in 2023; followed by the Community based DT-SACCOs which had an NPL ratio of 14.15% in 2024 which was again a drop from an NPL ratio of 15.71% in 2023. The fact that these two (2) clusters of DT-SACCOs continued to have high NPL ratio over the years compared to the other clusters, demonstrate very tough economic environments in which they operate, including the loan collection practices which are not dependent on employer-remittances, as is with the Government based and the Private sector-based DT-SACCOs.

The analysis further show that the Government based DT-SACCOs had an average NPL ratio of 10.13% in 2024, with a gross loan portfolio of Kshs 532.86 billion which is a reduction of their NPL ratio of 11.27% reported in 2023. As indicated elsewhere in this Report, the Government based DT-SACCOs and indeed all Government based Regulated SACCOs are considered systemically important in the Regulated SACCO industry, based on the very high concentration of the industry's assets and deposits in them compared to other clusters. It is in this regard therefore, that further analysis of the Government based DT-SACCOs' NPL ratio is called for using the five (5) sub-clustering of Universities' based; State Corporation based; County Government based; General Services based; and Teachers based as shown in **Figure 52**.

The analysis shows that among the Government based DT-SACCOs, the national government General Services based DT-SACCOs had the least NPL ratio at 4.85% against their gross loans of Kshs 176.78 billion in 2024, which is a marginal improvement from an NPL ratio of 4.96% against a gross loan portfolio of Kshs 152.17 billion in 2023. It is also noted that the County -government based DT-SACCOs had an NPL

ratio of 9.72% in 2024 which was again a marginal improvement from a NPL ratio of 9.97% in 2023, despite the fact that County Governments and Assemblies reportedly owed Regulated SACCOs the highest proportion of non-remitted funds, towards loan repayments as discussed elsewhere in this report. The State Corporation based DT-SACCOs registered the highest improvement in NPL ratio

which improved to 9.96% in 2024 from a high of 19.10% in 2023, buoyed mostly by the implementation of the Authority's *General Advisory Note on Non-Remitted Deductions dated 11th June 2019 (Ref. SASRA/800/2/2019)* which required DT-

SACCOs to utilise their FOSA savings account operations for processing of members' salaries, so as to have a first charge on the same, rather than wait for the employers to make the deductions and remit.

Figure 53 provides the summary of the distribution of the NPL ratio for NWDT-SACCOs segment based on the three (3) field of membership cluster in respect of which NWDT-SACCOs are grouped namely the Community based; the Government -based and the Private Sector based NWDT-SACCOs (noting that there are no Agriculture based NWDT-SACCOs within the industry). The distribution shows that the Community based NWDT-SACCOs continued to have the highest NPL ratio among the NWDT-SACCOs' segment which stood at 13.29% in 2024, which was a marginal improvement from an NPL ratio of 16.83% reported in 2023. Despite the marginal improvement, their NPL ratio is still comparatively high and demonstrates the extent of impairment of

loans disbursed by this cluster of NWDT-SACCOs, is mainly occasioned by the fact that they do not rely on check-off systems for their loan recoveries.

The Private Sector based NWDT-SACCOs on the other hand had their NPL ratio at 6.33% in 2024 reflecting a marginal increase in their NPL ratio of 6.14% in 2023, and which was largely informed by defaulted loans, associated with employees of private sector companies which have undertaken restructuring such as staff rationalization as well as private sector companies which are struggling economically and thus delays in meeting their employees' financial obligations.

Figure 53: Distribution of NPL Ratio for NWDT-SACCOs based on Fields of Membership.

Source: SASRA Database

The Government based NWDT-SACCOs on the other hand had the least NPL ratio at 4.75% in 2024 which is a progressive improvement over the past two years from 5.00% in 2022 and 4.82% in 2023. **Figure 54** provides the distribution of the NPL ratio within the Government based NWDT-SACCOs sub-clusters namely the Universities based; the State Corporation

based; the Government General Services based; and the County Government based NWDT-SACCOs (noting that there are no Teachers based NWDT-SACCOs in the industry). The distribution analysis that the national Government General Services had the highest NPL ratio at 11.54% in 2024 which is a deterioration from an NPL ratio of 9.28% reported in

2023; while the 4-Universities based NWDT-SACCOs (all of which are public entities) had the least NPL ratio at 0.19% in 2024 which itself was an improvement from an NPL ratio of 0.45% in 2023.

The very low NPL ratio for the 4-Public Universities based NWDT-SACCOs is contrasted with the very high NPL ratio for the 6- Public Universities based DT-SACCOs whose NPL ratios stood at 6.89% in 2024 and 10.53% in 2023. It would have been expected

that the 6-Public Universities based DT-SACCOs would have leveraged on their FOSA model of business in accordance with the Authority's *General Advisory Note on Non-Remitted Deductions dated 11th June 2019 (Ref. SASRA/800/2/2019)* as it has been successfully used elsewhere in the collection of loan repayments from their members so as to reduce the NPL ratio to similar margins as their NWDT-SACCOs counterpart, but this is yet to take root.

Figure 54: Distribution of NPL Ratio for Government Based NWDT-SACCOs based on Fields of Membership.

Source: SASRA Database

7.3.8. The Investment Property, Equipment and Other Assets.

The investment in property, plant & equipment (PPE) and other assets is another key component of Regulated SACCOs total assets. **Table 28** provides the distribution of the Regulated SACCOs investments in property, plant & equipment and other assets (PPE) which amounted to a total of Kshs 53.57 billion in 2024 compared to Kshs 51.42 billion in 2023. The analysis shows that the bulk of the PPE and other assets of Regulated SACCOs was made up of property and equipment with a sum of Kshs 25.83

There was however noted to be a significant reduction in the value of “other assets” component of the PPE and other assets which decreased to Kshs

billion representing 48.22% of the total PPE and other assets portfolio. It is observable that this portion of Regulated SACCOs assets remain almost the same as it was in 2023, with a sum of Kshs 25.41 billion which represented 49.22% of the total PPE and other assets. There was however an increase in investment properties to Kshs 14.81 billion in 2024 representing 27.64% of the total PPE and other assets, from Kshs 12.01 billion which represented 23.36% of the total PPE and other assets in 2023.

7.84 billion representing 14.64% of the total PPE and other assets, thereby showing concerted efforts towards reduction of assets being classified as

“other assets”. This is because such classification provides room for fraud and increased impairment of

Regulated SACCOs assets, and as such must be discouraged as an imprudent practice.

Table 28: Composition of Investment Property, Plant & Equipment and Other Assets

FINANCIAL INDICATOR	AMOUNT IN KSHS. BILLIONS				PROPORTION TO TOTAL PPE			
	2021	2022	2023	2024	2021	2022	2023	2024
INVESTMENT PROPERTIES	22.30	11.98	12.01	14.81	40.13%	22.91%	23.36%	27.64%
PROPERTY AND EQUIPMENT	23.31	24.41	25.41	25.83	41.94%	46.68%	49.42%	48.22%

7.4. The Earnings of Regulated SACCOs

The earnings of Regulated SACCOs is another key parameter of the CAEL rating and monitoring framework which is assessed through a statement of comprehensive income submitted to the Authority on a monthly basis for DT-SACCOs and on a quarterly basis for NWDT-SACCOs and monitors the overall profitability of Regulated SACCOs both at individual institutional levels and at the industry-wide levels.

Table 29 provides a snapshot of the Regulated SACCOs Statement of Comprehensive Income and shows that the Regulated SACCOs total income

increased in 2024 by 12.28% to Kshs 153.05 billion compared to a growth rate of 12.94% in 2023. The income of Regulated SACCOs generated from loans increased by 13.81% to Kshs 127.64 billion in 2024 from Kshs 112.15 billion in 2023 but which represented only 7.57%. The means that Regulated SACCOs generated revenue from loans at a higher rate and pace in 2024 than they did in 2023 but is also consistent with the drop in the industry's NPL ratio to 8.39% in 2024 from 8.45% in 2023.

Table 29: Consolidated Statement of Comprehensive Income of Regulated SACCOs (2022 – 2024)

PERFORMANCE ITEMS	AMOUNTS IN KSHS. BILLIONS			PROPORTION TO TOTAL INCOME			Y-TO-Y CHANGE	
	2022	2023	2024	2022	2023	2024	2022/23	2023/24
Income from loans	104.26	112.15	127.64	86.39%	82.28%	83.40%	7.57%	13.81%
Income from Investments	8.17	10.42	15.54	6.77%	7.64%	10.15%	27.56%	49.11%
Other Operating Incomes	8.26	13.73	9.87	6.84%	10.07%	6.45%	66.32%	-28.12%
Total Income	120.68	136.30	153.05				12.94%	12.28%
Interest Expense on Deposits & Dividends	49.14	55.06	59.74	40.72%	40.40%	39.03%	12.06%	8.49%
Interest paid on External Borrowings	2.76	3.07	2.20	2.29%	2.25%	1.44%	11.09%	-28.44%
Other Financial Expense	2.89	3.11	5.40	2.39%	2.28%	3.53%	7.75%	73.46%
Net Financial Income	65.89	75.06	85.71	54.60%	55.07%	56.00%	13.91%	14.19%
Provision for Loan Losses	4.31	5.90	5.18	3.57%	4.33%	3.38%	36.87%	-12.30%
Operating Expenses	39.86	44.52	50.46	33.03%	32.66%	32.97%	11.69%	13.34%
Net Income before Tax	21.72	24.64	30.08	18.00%	18.08%	19.65%	13.42%	22.07%
Taxes and Donations	1.77	2.42	2.99	1.47%	1.78%	1.95%	36.78%	23.33%
Net Income after Tax	19.95	22.22	27.09	16.53%	16.30%	17.70%	11.35%	21.93%

Source: SASRA Database

The increase in the income from loans in 2024 resulted from a corresponding increase in the proportion of income from loans to total income to 83.40% in 2024 compared to a proportion of income from loans to total income of 82.28% reported in 2023 as shown in **Figure 56**. The foregoing underscores the importance of loan assets to Regulated SACCOs as the main source of their revenue and as such the quality of the loan asset must be stringently monitored at all times. On the other hand, the income from investments also registered a sharp increase by 49.11% to Kshs 15.54 billion in 2024 representing 10.15% of the total income. There was however a material drop in the other income component whose proportion to total

income decreased to 6.45% in 2024 from a proportion of 10.07% in 2023.

On the expenses side, the main expenses for Regulated SACCOs remain interests paid on members' deposits and dividends paid on the members' share capital which amounted to Kshs 59.74 billion representing 39.03% of the total income in 2024, thereby underscoring the ever-growing popularity of Regulated SACCOs as viable savings platforms, in addition to credit provision. This represented a marginal decline from a proportion of 40.40% of the total income, which was paid out as interests paid on members' deposits and dividends paid on the members' share capital in 2023, thus showing that the interest expense on deposits and

dividends grew at a decreasing rate in 2024 at 8.49% compared to an increase of 12.06% in 2023. Consistent with the progressive application of the cooperative philosophy of being for service and not for profit, it is projected that the interest expenses on

deposits and dividends will plateau or continue to grow at a decreasing rate, to enable Regulated SACCOs retain sufficient surpluses to build their institutional capital.

Figure 56: Proportionate Composition of Total Incomes of Regulated SACCOs (2022 – 2024)

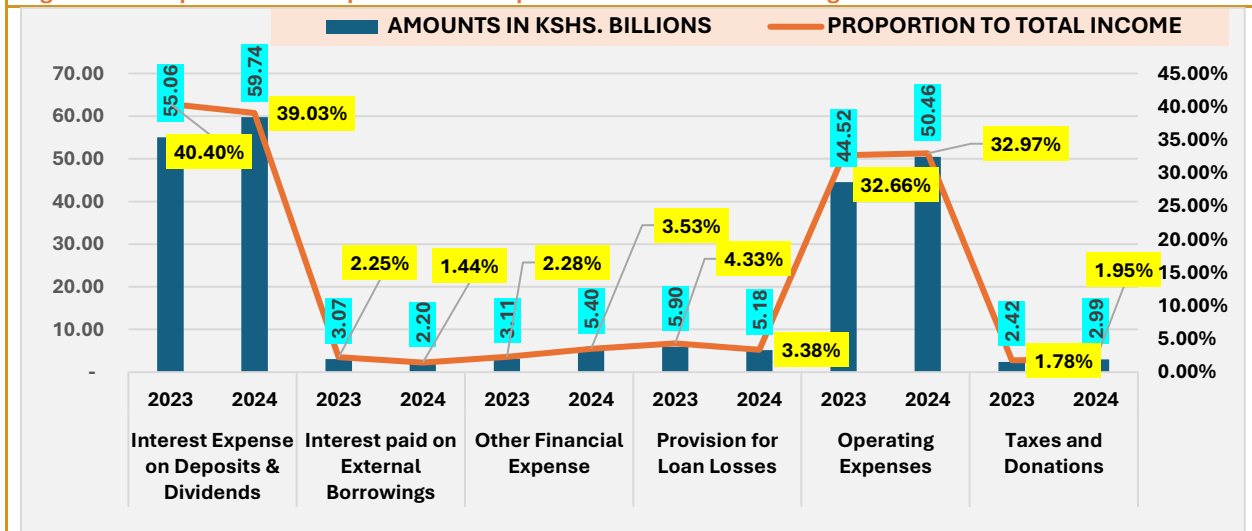

Source: SASRA Database

At the same time the interest paid on external borrowing by Regulated SACCOs also declined by 28.44% to Kshs 2.20 billion in 2024 from a sum of Kshs 3.07 billion in 2023. This shows reduced borrowings by Regulated SACCOs during the year under review, thus implying reliance on internally generated funds to fund their business activities and operations. **Figure 57** provides a global snapshot of

sample selected expenses of Regulated SACCOs as a proportion to the Regulated SACCOs total income during the year ended December 2024 with the provision for loan losses dropping to Kshs 5.18 billion in 2024 from Kshs 5.90 billion in 2023, mainly against the backdrop of improved quality of the loan portfolio.

Figure 57: Sample Selected Expenses as a Proportion of Total Income of Regulated SACCOs

Source: SASRA Database

There were however increase in other financial expenses to Kshs 5.40 billion in 2024 representing 3.53% of the total income from Kshs 3.11 billion reported in 2023, which arose mainly due to increased provisioning for the impaired investments in some of the NACOs. The Regulated SACCOs operating expenses also rose to Kshs 50.46 billion representing 32.97% of the total income in 2024, compared to operating expenses of Kshs 44.52 billion which represented 32.66% of the total income in 2023. Although the increase is reflective of increased costs of doing business, it is imperative that Regulated SACCOs take measures to reduce their operating costs in order to remain profitable and competitive.

A comparative analysis of the earnings of DT-SACCOs and NWDT-SACCOs through their consolidated statements of comprehensive incomes, demonstrates a close correlation in the proportion of income from loans to total incomes which stood at 83.31% for DT-SACCOs and 84.21% for NWDT-SACCOs as summarised in **Table 30** and **Table 31**. The DT-SACCOs however recorded a higher increase in their income from loans in 2024 which on average stood at 15.46% compared to the NWDT-SACCOs segment whose year-to-year increase in the income from loans stood at just about 1.26% in 2024. The income from investments of the NWDT-SACCOs however constituted about 13.73% of their total income in 2024 compared to 9.74% for DT-SACCOs, showing that NWDT-SACCOs have largely diversified their investments to portfolios other than loans, than the DT-SACCOs have.

Table 30: Statement of Comprehensive Income for DT-SACCOs

PERFORMANCE ITEMS FOR DT-SACCOs	AMOUNT IN KSHS. BILLIONS			PROPORTION TO TOTAL INCOME			Y-TO-Y CHANGE	
	2022	2023	2024	2022	2023	2024	2022/23	2023/24
Income from loans	92.06	99.13	114.46	86.44%	82.40%	83.31%	7.68%	15.46%

Taxes and Donations	1.58	2.18	2.74	1.48%	1.81%	1.99%	38.00%	25.48%

Source: SASRA Database

On the expenses side, the comparative analysis shows that the NWDT-SACCOs interest expenses on members' deposits and dividends constituted 51.13% of their total income, while for DT-SACCOs it was 37.65% of their total income. Consequently, NWDT-SACCOs did pay a large proportion of their total income as interests and dividends to their membership when compared to the proportion paid by their DT-SACCOs counterparts and probably

Table 31: Statement of Comprehensive Income for NWDT-SACCOs

PERFORMANCE ITEMS FOR NWDT-SACCOs	AMOUNT IN KSHS. BILLIONS			PROPORTION TO TOTAL INCOME			Y-TO-Y CHANGE	
	2022	2023	2024	2022	2023	2024	2022/23	2023/24

informed by their comparatively relative low cost of doing business. This is indeed reflected in the low operating expenses of NWDT-SACCOs which stood at 24.05% of the total income compared to an operating expense of 33.99% of the total income for DT-SACCOs as depicted in **Figure 58** and **Figure 59** being selected expenses items as proportion to total incomes for DT-SACCOs and NWDT-SACCOs respectively.

7.5. The Liquidity of Regulated SACCOs

7.5.1. General Overview of Liquidity Indicators

Liquidity is another key component of the CAEL rating and monitoring framework deployed by the Authority in the supervision of the Regulated SACCOs. The *Regulations 2010* and *Regulations 2020* for DT-SACCOs and NWDT-SACCOs respectively, prescribed two (2) key components of liquidity measurement of Regulated SACCOs. These are the liquid assets to short-term liabilities to be maintained at not less than 15% for DT-SACCOs and 10% for NWDT-SACCOs; and the external borrowing ratio which must be maintained at not more than 25% for both segments of the Regulated SACCO industry. Other key liquidity measurement indicators include the liquid assets to total deposits; liquid assets to total assets; gross loans to total assets; and gross loans to total deposits.

Table 32 provides the aggregated liquidity indicators for DT-SACCOs while **Table 33** provides the

aggregated liquidity indicators for NWDT-SACCOs respectively. The key liquidity ratio of liquid assets to short term liabilities (statutory liquidity ratio) which is used to capture the liquidity mismatch of assets and liabilities and provides an indication of the extent to which Regulated SACCOs could meet the short-term withdrawal of funds without facing liquidity problems, was maintained by DT-SACCOs at over 61.34% against the minimum of 15%. The NWDT-SACCOs on the other hand maintained their statutory liquidity ratio at over 144.65% against the prescribed minimum of 10%. However, a stressed position with all liabilities showed the statutory liquidity ratio at 16.92% for DT-SACCOs which is still above the prescribed minimum of 15%, while the stressed statutory liquidity ratio for NWDT-SACCOs stood at 16.39% which is also above the prescribed minimum of 10%.

Table 32 The Aggregated Liquidity Indicators for DT-SACCOs

LIQUIDITY INDICATORS FOR DT-SACCOs	PREScribed MINIMUM / BEST PRACTICE	2022	2023	2024
Liquid Assets/Savings Deposits & Short-Term Liabilities	≥15%	64.72%	64.45%	61.34%

Gross loans/Total Deposits	>100%	96.26%	99.34%	100.65%

Source: SASRA Database

7.5.2. The External Borrowing Ratio

The external borrowing ratio measures the proportion of Regulated SACCOs total liabilities that come from external sources mainly from commercial banks and is used to assess Regulated SACCOs' reliance on external debt compared to its internal funding sources, like customer deposits. Consequently, a high external borrowing ratio may indicate increased dependence on external funding, which can expose Regulated SACCOs to risks like exchange rate fluctuations, changes in global interest rates where foreign denominated debts are involved, or geo-political uncertainties or alignment. Conversely, a lower ratio suggests a stronger reliance on internal funding, which may be more stable.

The analysis in **Table 32** shows that the external borrowing ratio for DT-SACCOs dropped to 2.51% in 2024 from a high of 3.02% in 2023, while the analysis in **Table 33** shows that the external borrowing ratio for NWDT-SACCOs dropped to 1.46% in 2024 from a high of 1.62% in 2023. The foregoing therefore shows that Regulated SACCOs have in the aggregate been relying on their internally generated funds to fund their assets, and thus less reliance on externally borrowed funds, which are often subject to interest rates fluctuations. The projected decrease in the commercial banking lending rates, due to the

lowering of the Central Bank Rates (CBR) as discussed elsewhere in this *Report*, should however not be a panacea for Regulated SACCOs to increase their borrowing, but to still put more efforts towards mobilising deposits from members to fund their assets.

At the individual institutional levels of external borrowing a total of 108-DT-SACCOs did not have any external borrowing in 2024, compared to 99-DT-SACCOs which did not have external borrowing in 2023, implying that several DT-SACCOs actually retired their external borrowing during the year 2024 as depicted in **Figure 60**. Additionally, only 4-DT-SACCOs had their external borrowing beyond the 25% statutory maximum in 2024, which is the same as the number of DT-SACCOs whose external borrowing ratio exceeded the prescribed maximum in 2023, technically implying that these 4-DT-SACCOs are heavily reliant on external fundings for their business activities. In between are the DT-SACCOs whose external borrowing ratios ranged between 0.01% and 25% which totalled to 65-DT-SACCOs in 2024 compared to 71-DT-SACCOs with external borrowing ratio of similar range in 2023, thus showing DT-SACCOs continuing to shun external debts.

Figure 60: Number of DT-SACCOs Complying with the External Borrowing Ratio

Source: SASRA Database

Figure 61: Number of NWDT-SACCOs Complying with the External Borrowing Ratio

Source: SASRA Database

Similar trend analysis was also evident within the NWDT-SACCOs' segment with a total of 151-NWDT-SACCOs having no external borrowing in 2024 down from a total of 153-DT-SACCOs which had no external borrowing in 2023 as shown in **Figure 61**. The drop was occasioned by two (2) formerly NWDT-SACCOs which crossed to become DT-SACCOs, and which had no external borrowing. On the other hand, only one (1) NWDT-SACCO reported to have exceed the prescribed maximum ratio of not more than 25%, implying its over-exposure to risks associated with such external debts. At the same time, a total of 23-NWDT-SACCOs had their external borrowing ratio ranging from 0.01% to 10%, while the remaining 3-NWDT-SACCOs had their external borrowing ratio ranging between 10% and the prescribed maximum of 25% in 2024.

The overall trend analysis of external borrowing ratio of the Regulated SACCOs over the years shows a

progressive decline notwithstanding the relative growth in the Regulated SACCOs assets, thereby confirming that with a little adjustment in their business models, the Regulated SACCOs are generally capable of growing their asset portfolios without reliance on external borrowing. For instance, the DT-SACCOs grew their total assets by 13.44% in 2024 from 9.67% in 2023, yet their external borrowing ratio dropped to 2.51% in 2024 from 3.02% in 2023 as shown in **Figure 62**. The NWDT-SACCOs on the other hand, witnessed a decline in their total assets' portfolio in 2024 by negative 5.59%, but this was due to the fact that three (3) formerly NWDT-SACCOs changed to become DT-SACCOs in 2024, and not because they could not fund their assets. There is therefore no correlation between the decline in their external borrowing ratio from 1.62% in 2023 to 1.46% in 2024 with the decline in their total assets.

Figure 62: Trend Analysis of External Borrowing Ratio and Growth in Total Assets for DT-SACCOs and NWDT-SACCOs.

Source: SASRA Database

8.0. OTHER ACTIVITIES AND OPERATIONS OF REGULATED SACCOs

8.1. The Governance of Regulated SACCOs

8.1.1. Introduction

The governance framework and structures of Regulated SACCO Societies as prescribed under the *Cooperative Societies Act* as read with the *Sacco Societies Act* consist of the general meeting of members; the Board of Directors and the Supervisory

Committee both of which are elected by the general meeting of the members; and the Chief Executive Officer appointed by the Board of Directors assisted by the management staff.

8.1.2. The General Meetings

Like with any other corporate body, the general meeting of members of Regulated SACCO Societies is the supreme decision-making organ, subject only to the prevailing law and regulatory frameworks. Regulated SACCOs are therefore required to hold their respective general meetings on an annual basis, on or before 30th April of each calendar year, and *Section 27(5) of the Cooperative Societies Act* provides that the mandatory agenda at the general meetings, shall be to consider and confirm the minutes of the last general meeting; consider any reports of the Board of Directors or the Commissioner for Cooperative Development or the Authority; consider and adopt audited accounts; determine the manner in which any available surplus is to be distributed or invested; elect the SACCO Societies' office bearers for the ensuing year; determine, where necessary, the maximum borrowing power of the SACCO Society; appoint an auditor for the ensuing year; and transact any other

general business of the SACCO Society of which notice has been given to members in the manner prescribed in the By-Laws among others.

The Annual General Meeting for the period ended December 2024, all the Regulated SACCO Societies complied with the requirements of the law and held their annual general meetings to transact the prescribed statutory agenda, except three (3) Regulated SACCOs which were yet to hold their General Meeting at the time of publication of this report. It was however noted that three (3) Regulated SACCOs obtained statutory waivers and exception to hold their annual general meetings outside the prescribed period of 30th April. Despite obtaining such statutory waivers and exemptions, the Authority continues to implore Regulated SACCO Societies to ensure that all annual general meetings are held within the prescribed timelines, in order to avoid members complaints, apathy and discontentment.

8.1.3. The Board of Directors

Regulated SACCO Societies are governed by non-executive Board of Directors elected by members of SACCOs during the annual general meetings. At least three (3) members of the Board of Directors of a Regulated SACCO always retire on an annual basis, and thus subject to election during the annual general meeting of the members.

The Boards of Directors are statutorily responsible for the overall oversight of SACCOs on behalf of members, including but not limited to ensuring that the SACCO maintains proper and accurate records that reflect the true and fair position of the SACCO Society's financial condition; functions effectively and that an adequate and effective internal control system is put in place; makes adequate provisions for known and probable losses likely to occur;

maintains a positive image within the industry and the economy as a whole, among others. The Board of Directors are accountable to members, as well as the Authority in the performance of their duties for which they are held accountable jointly and severally.

During the year ended December 2024, there were a total of 3,019 persons serving in the Board of Directors of the 355-Regulated SACCO Societies in Kenya as summarised in **Table 34** and **Figure 63**. This was a drop from the 3,061 persons who were serving in the Board of Directors of the 357-Regulated SACCO Societies which were in operation during the year 2023 and partly explained by the drop in the number of Regulated SACCOs during the period, as

well as the fact that some Regulated SACCOs were operating with less than the maximum nine (9) members in their individual Board of Directors. The analysis further shows that there was a slight increase in the number of female members of the Board of Directors to 25.44% in 2024, compared to a proportion of 25.02% reported in 2023 and 24.22% reported in 2022. Although there is progressive growth of the number of female members of the Board of Directors, aggregate proportion is still below the recorded constitutional threshold thereby calling upon Regulated SACCOs to increase their affirmative action initiatives to increase the number of women in their Board of Directors.

Table 34: Gender Distribution of Members of Board of Directors of Regulated SACCO Societies

		2024		2023		2022	
		NUMBER	PROPORTION (%)	NUMBER	PROPORTION (%)	NUMBER	PROPORTION (%)

Source: SASRA Database

Figure 63: Proportionate Segmental Gender Distribution of Membership in the Board of Directors of Regulated SACCOs

Source: SASRA Database

Figure 63 depicts the proportionate segmented gender distribution of the members of the Board of Directors of Regulated SACCO Societies and shows that within the DT-SACCOs segment 21.64% of the members of the Board of Directors were female, which is a slight improvement from 20.05% female

members of the Board of Directors reported for the period ended December 2023. The NWDT-SACCOs' segment on the other hand had a slight drop in the proportionate representation of female members of the Board of Directors at 29.44% in 2024 compared to a proportionate representation of 30.03% recorded in 2023.

8.1.4. The Committee of Office Bearers

Upon election at the general meetings, the Board of Directors of SACCO Societies are required to constitute themselves into a Committee of Office bearers consisting of the Chairperson, the Vice-Chairperson, the Secretary and the Treasurer. The Committee of Office bearers play a critical role in the governance frameworks of Regulated SACCOs as they are required to execute legal documents and/or witness the execution of any legal documents under seal of the Regulated SACCO. **Table 35** provides the overall gender distribution of the membership of the

Committees of Office bearers among the 355-Regulated SACCO Societies and shows that with the exception of the office of Chairperson, some Regulated SACCOs operated with vacancies in the offices of vice-chairpersons (9-Regulated SACCOs); secretary (11-Regulated SACCOs); and treasurer (10-Regulated SACCOs). These vacant positions were thus being served by other members of the Board of Directors on a temporary basis pending the formal elections to fill the same.

Table 35: Gender Distribution of the Committee of Office Bearers of Regulated SACCO Societies									
OFFICE BEARER	SACCO SEGMENT	2024				2023			
		Number		Proportion (%)		Number		Proportion (%)	
		Male	Female	Male	Female	Male	Female	Male	Female
CHAIRPERSONS	NWDT-SACCOs	158	20	88.76%	11.24%	161	22	88.00%	12.00%
	DT-SACCOs	166	11	93.79%	6.21%	163	11	93.70%	6.30%
VICE-CHAIRPERSONS	NWDT-SACCOs	124	48	72.09%	27.91%	125	51	71.00%	29.00%
	DT-SACCOs	142	32	81.61%	18.39%	153	22	87.40%	12.60%
SECRETARY	NWDT-SACCOs	80	90	47.06%	52.94%	91	92	49.70%	50.30%
	DT-SACCOs	127	47	72.99%	27.01%	124	48	72.10%	27.90%
TREASURER	NWDT-SACCOs	134	42	76.14%	23.86%	134	45	74.90%	25.10%
	DT-SACCOs	136	33	80.47%	19.53%	143	28	83.60%	16.40%

Source: SASRA Database

Figure 64 provides the proportionate gender distribution of Chairpersons and Vice-Chairpersons, while **Figure 65** provides the proportionate gender distribution of Secretaries and Treasurers among the Regulated SACCOs. The analysis shows that majority of Chairpersons in Regulated SACCOs are male at a proportion of 91.27% in 2024, which is a slight increase from a proportion of 90.76% male chairpersons reported in 2023. This means that the proportion of female chairpersons declined

marginally to 8.73% in 2024 from a proportion of 9.24% in 2023. In addition, it is evident from the analysis that the female members of Committees of Office bearers were relatively better represented at the office of secretaries at 39.83% in 2024, which was an improvement from a proportion of 39.44% reported in 2023.

The office of vice-chairpersons attracted the second highest proportion of female members of the Committee of Office bearers at 35.47% in 2024, and

which was a respectable increase from just 20.80% of the female vice-chairpersons reported in 2023. Thus, even though the majority of chairpersons are overwhelmingly male at 91.27%, it is apparent that more women in the Board of Directors of Regulated SACCOs are increasingly offering themselves as

leaders, as shown with the increase in the proportion of female vice-chairpersons and secretaries. Despite these success stories, Regulated SACCOs are called upon to put more effort on affirmative action activities in order to achieve the expected gender parity thresholds.

Figure 64: Proportionate Gender Distribution of Chairpersons and Vice-Chairpersons

Source: SASRA Database

Figure 65: Proportionate Gender Distribution of Secretary and Treasurer

Source: SASRA Database

8.1.5. The Supervisory Committee

The Supervisory Committee of Regulated SACCO Societies is one of the unique organs which differentiates Cooperative enterprises in Kenya from other corporate entities. It is a three (3) member organ of governance elected by the members at the annual general meetings, with the responsibility of providing oversight over the activities of the Board of Directors such as verifications of transactions and other similar auditing responsibilities. To this extent, the *International Credit Union Regulators Network (ICURN) Guiding Principles on Enhancing Governance of Cooperative Financial Institutions (CFIs)* recommends that the functions normally performed by an audit committee of the Board of Directors, may be performed by a Supervisory

Committee. It is in this regard that the *Regulations 2020* expands the scope of work of the Supervisory Committee to include the duties and responsibilities traditionally performed by an audit committee of the Board of Directors, and the Authority has vide the *Guidance Note on Corporate Governance for Regulated SACCO Societies* required Regulated SACCO Societies to reserve the functions of their respective audit committees to the Supervisory Committee. Indeed, a similar proposition has been made in the *Cooperative Bill, 2024* which is currently pending deliberations before the Parliament of Kenya and is likely to be enacted into law in the coming year.

Figure 66 and Figure 67 provides a summary of the gender distribution of membership of the Supervisory Committees of the 355-Regulated SACCO Societies for the period ended December 2024, with a total of 1,044 persons serving on one position or the other within the Supervisory Committees out of an expected total of 1,065 persons if all the Supervisory Committee positions were filled. This means that some Regulated SACCO Societies were operating with just two (2) member Supervisory Committees, due to casual vacancies

arising during the course of the year, and which vacancies are expected to be filled during the general meetings slated for the first quarter of the year 2025. In particular, the majority of the members of the Supervisory Committee for the period ended December 2024 were male and accounted for 70.69% of all the persons serving in the position, but which are a slight drop from a proportion of 72.41% of male persons serving in the same position for the period ended December 2023.

8.2. The Employment Trends in the Regulated SACCO Industry

8.2.1. General Overview

The Regulated SACCO industry in Kenya continues to provide employment opportunities for Kenyans as part of their contribution towards the realization of the United Nations Sustainable Development Goals (SDGs), as well as the Kenya Vision 2030 economic blueprint as domesticated in its Medium-Term Plan IV (2023-2027) and the Bottom-Up Economic Transformation Agenda (BeTA). **Table 36** provides a snapshot of the employment trends in the Regulated SACCO industry in 2024 with a record of 12,005 persons employed either on permanent or temporary

basis and 2,410 persons as attachées or interns. Indeed, the analysis shows that a progressive increase in the total number of employees over the years among the Regulated SACCOs from 11,883 employees reported in 2023 and 11,188 employees reported in 2022, thereby cementing Regulated SACCO Societies as sustainable employers in the country. The employee internship and attachment opportunities offered by the Regulated SACCO Societies is also a critical contribution towards the empowerment of youth.

Table 36: Employment Trends in Regulated SACCO Societies

SACCO SEGMENT	YEAR	2024			2023			2022		
	TERMS OF SERVICE	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL

Source: SASRA Database

The DT-SACCOs segment had the highest number of employees totalling 10,833 persons in 2024 (90.24% of all employees) compared to an employee base of 10,622 (89.39%) and 9,876 (88.27%) in 2023 and 2022 respectively. The NWD-T-SACCOs segment on the other hand had an employee base totalling 1,172 persons in 2024 (9.76% of all employees) which was a marked decrease from an employee base of 1,261 (10.61%) and 1,312 employees (11.73%) in 2023 and 2022 respectively as shown in **Figure 68**.

The consistent drop in the number of employees by the NWD-T-SACCOs' segment is largely informed by their continued over-reliance on the volunteering members of their Board of Directors to undertake most of their activities, rather than employing full time employees in order to cut down costs. Additionally, majority of NWD-T-SACCOs are also very small in size and thus are unable to support large management staff establishments when compared to their resource endowed DT-SACCOs counterparts. The reduction of the number of NWD-T-SACCOs is also informed by the conversion of at least four (4)

previously NWDT-SACCOs to DT-SACCOs during the last two (2) years, while two (2) other NWDT-SACCOs

ceased operations with their authorizations being withdrawn in 2024

Figure 68: The Proportion of Employees between DT-SACCOs and NWDT-SACCOs Segments.

Source: SASRA Database

Figure 69 on the other hand depicts the terms of employment of the employees within the Regulated SACCO industry. The analysis shows that a majority of the employees accounting for 84.58% within the Regulated SACCOs served on permanent terms of service as at December 2024. This was an increase in the proportion of employees who served on

permanent terms of service in 2023, which stood at 82.55% of all employees and in 2022 which stood at 82.31% of all employees. The proportion of employees on temporary or short-term contracts have however been on a decreasing trend with 15.42% reported in 2024, which was a decrease from a proportion of 17.45% reported in 2023.

Figure 69: Proportional Distribution of Employees of Regulated SACCO Societies based on Terms of Service

Source: SASRA Database

On the gender front, the female employees continue to eclipse the male employees recording a proportion

of 51.49% of all employees in 2024, which was a slight increase from a proportion of 51.39% of all

employees in 2023. The proportion of male employees in 2024 on the other hand recorded a slight decline to 48.51% in 2024, from a proportion of

48.61% of all employees for the period ended December 2023 as shown in **Figure 70**.

Figure 70: Proportional Distribution of Employees of Regulated SACCOs based on Gender

Source: SASRA Database

8.2.2. The Chief Executive Officers

The office of Chief Executive Officer of a Regulated SACCO is a statutory position established by the provisions of *Reg. 63 of Regulations 2010* for DT-SACCOs and *Reg. 64 of Regulations 2020* for NWDT-SACCOs respectively and is responsible for the day-to-day management of the Regulated SACCO. The Chief Executive Officer is appointed by the Board of

Directors, subject to prior approval of the Authority and has specific statutory responsibility to both the Board of Directors and to the Authority. **Figure 71** provides the general distribution of the Chief Executive Officers among the 355-Regulated SACCOs in 2024 by segment and gender.

Figure 71: Segmental and Gender Distribution of Chief Executive Officers in the Regulated SACCOs Industry

Source: SASRA Database

The analysis shows that in the aggregate; the male Chief Executive Officers formed the largest proportion of all Chief Executive Officers accounting for 66.67% in 2024, which was a slight increase from a proportion of 65.50% in 2023. There was therefore a marginal decline in the aggregate proportion of female Chief Executive Officers in Regulated SACCO industry to 33.33% in 2024 from 34.50% in 2023. Despite the slight drop, the proportion of the Chief Executive Officers still remained within the constitutionally recommended threshold, in as much as affirmative actions are still called for in

order to attain gender parity in the management of Regulated SACCOs.

At the segmental level, the NWDT-SACCOs had the best gender proportion of female Chief Executive Officers at 43.21% in 2024, compared to the DT-SACCOs' segment which had a proportion of only 24.29% of female Chief Executive Officers. Despite this, however, there was a marked drop in the proportion of female Chief Executive Officers among the NWDT-SACCOs from 46.11% reported in 2023 to 43.21% reported in 2024.

8.2.3. The Other Key Management Staff of Regulated SACCOs

Other than the position of Chief Executive Officers, the other senior management positions in Regulated SACCOs include the head of key functional departments such as internal audit, ICT, credit, finance, operations, money laundering reporting functions among others. These functional heads are critical for the efficient and effective day to day operations of Regulated SACCOs under the leadership of the Chief Executive Officer.

among the 355-Regulated SACCO Societies and shows that in aggregate 56.28% of all the functional heads were male in 2024, which was a slight drop from a proportionate of 58.25% in 2023. Consequently, the proportion of female senior management staff increased slightly to 43.72% in 2024, from a proportion of 41.75% in 2023 thereby demonstrating that more and more women are being given opportunity to serve in senior management positions among the Regulated SACCOs.

Figure 72 provides an overview of the segmental and gender distribution of the key management positions

At the segmental level, the NWDT-SACCOs had a higher proportion of women at the senior management positions with a proportion of 53.33% in 2024, which was a high increase from a proportion of 50.62% recorded in 2023. This means that the male senior management staff among the NWDT-SACCOs fell to 46.67% in 2024 from 49.38% reported in 2023. Among the DT-SACCOs segment however,

male senior management employees remained most dominant at 60.02% for the period ended December 2024, but which was nevertheless a decline from a proportion of 61.62% reported in 2023. The overall trend analysis over the three (3) year period however shows a progressive bridging of the gender gap in the senior management positions at the industry level, as well at each of the segmental levels.

8.3. The Non-Remitted Funds Owed to the Regulated SACCO Industry

8.3.1. Introduction

A majority of Regulated SACCO Societies operate their business models along the traditional concept of employer deductions and remittances, which are largely premised on *Section 35 of the Cooperative Societies Act*. This provision allows for a tripartite agreement between members of Regulated SACCOs together with their employer-institutions on one hand, and their respective Regulated SACCOs on the other hand. In this tripartite agreement, an employee who is a member of a Regulated SACCO Society expressly instructs the employer-institution to make periodic deductions from the employees' emoluments and remit the same to the employees' designated Regulated SACCO in respect of which the employee is a member. In this respect an employer is defined as *any person, firm, or organization holding remuneration or payment for produce of a member of a Regulated SACCO*, while an employee includes *any person who receives remuneration or payment for produce from such persons or firm or organization*.

The deductions from the remuneration are normally two (2) fold. Firstly, are the traditional periodic deductions meant for savings and popularly known as BOSA deposits. These are usually paid into the employees' non-withdrawable deposits (BOSA)

accounts and are mostly used as collateral or security for loans or credit facilities. These deposits are however refundable, less any obligations owed by a member upon notice of withdrawal from membership of the SACCO Society and therefore have the characteristics of preferential shares or subordinated debt instruments. Secondly, are the periodic deductions from the employees' remuneration aimed at repaying or defraying any loan or credit facilities issued by a SACCO Society to a member, in which case, the members' remuneration acts as security or collateral.

The concept of deductions and remittances in the SACCO industry is therefore largely associated with employee-based SACCO Societies or produce-based SACCO Societies. Although the concept in practice has immense benefits associated with institutionalising the savings culture through the direct deductions from remunerations, and ease of debt collections by SACCOs in respect of loans and credit facilities issued by them, it has had its drawbacks and flaws when the employer-institutions makes the requisite deductions but fails to remit the same to the beneficiary SACCO Society.

8.3.2. The Statistical Report of the Non-remitted Funds to Regulated SACCOs

Table 37 provides the aggregate summary status of the funds deducted from employees' remunerations by various employer institutions, but which remained unremitted to the beneficiary Regulated SACCO in the course of the year 2024. In particular, the total amount of non-remitted funds increased to Kshs 3.49 billion, affecting 85-Regulated SACCOs and 55,603 members of Regulated SACCOs in 2024. This was a marked increase in the total non-remitted funds owed to Regulated SACCOs during the year 2023,

which amounted to Kshs 2.59 billion affecting 82-Regulated SACCOs and 57,721 members of the said Regulated SACCOs. Although the number of individual members affected by the non-remitted funds slightly reduced over the period, the number of Regulated SACCOs affected increased, while the aggregate amount owed equally increased in significant proportions, thereby affecting the financial performance and condition of the affected Regulated SACCOs.

Table 37: Summary of the Non-remitted Funds owed to the Regulated SACCOs (2021-2024)

	Year	No. of SACCOs Affected	No. of Members affected	Non-remitted Funds on account of Loan Repayments (Kshs)	Non-remitted Funds on account of Back office (BOSA) deductions (Kshs)	Total amount of Non-remitted Funds
DT-SACCOs	2021	-	-	1,842,262,482.00	1,172,450,710.00	3,014,713,192.00
NWDT-SACCOs		-	-	313,312,448.00	74,904,884.00	388,217,332.00
TOTAL		-	-	2,155,574,930.00	1,247,355,594.00	3,402,930,524.00
DT-SACCOs	2022	57	57,766	1,752,458,915.25	607,016,353.69	2,359,475,268.94
NWDT-SACCOs		23	85,686	264,274,610.45	73,141,653.34	337,416,263.79
TOTAL		80	143,452	2,016,733,525.70	680,158,007.03	2,696,891,532.73
DT-SACCOs	2023	53	50,193	1,343,933,329.11	817,611,935.23	2,161,545,264.34
NWDT-SACCOs		29	7,528	336,035,744.85	91,879,819.81	427,915,564.66
TOTAL		82	57,721	1,679,969,073.96	909,491,755.04	2,589,460,829.00
DT-SACCOs	2024	62	49,821	2,280,712,302.30	815,549,195.99	3,096,261,498.29
NWDT-SACCOs		23	5,781	318,384,473.49	73,918,024.19	392,302,497.68
TOTAL		85	55,602.00	2,599,096,775.79	889,467,220.18	3,488,563,995.97

Source: SASRA Database

The statistical analysis shows that the highest proportion of the non-remitted funds owed was on account of deductions meant for the repayment of loans and other credit facilities, which the respective Regulated SACCOs had issued to their members which rose to Kshs 2.60 billion in 2024 representing a proportion of 74.50% of the total non-remitted funds, from Kshs 1.68 billion representing 64.88% of the total non-remitted funds reported in 2023 as summarised in **Figure 73**. The foregoing implies that the loans and credit facilities issued by the affected Regulated SACCO Societies to their members are either in default or are substantially impaired and is thus a major contributing factor to the aggregate non-performing loans ratio for the Regulated SACCOs.

Interestingly the non-remitted deductions due for periodic savings (BOSA) registered a marginal drop to Kshs 0.89 billion in 2024 representing 25.50% of the total non-remitted funds, compared to Kshs 0.91

billion reported in 2023, thereby begging the question as to why certain employer-institutions, deduct but only remit a portion of the deductions to the beneficiary Regulated SACCO. That notwithstanding, the continued failure by various employer-institutions to promptly remit the deductions made from employees' remuneration to the beneficiary Regulated SACCOs, continue to seriously hamper the liquidity position of the Regulated SACCOs as well as their ability to meet member obligations with regard to issuance of loans and credit facilities which is their core business. On the members side, failure to remit deducted BOSA deductions have the impact of diminishing the amount of loan or credit facility which the member would otherwise be entitled to, while failure to remit the loan repayment deductions on the other hand puts the member in conflict with their Regulated SACCOs over recovery of the subject loan or credit facility.

Figure 73: Comparative Non-Remitted Funds owed on account of Loan Repayment Deductions and BOSA deductions

Source: SASRA Database

Figure 74 provides the analysis of the distribution of the total non-remitted funds owed to the Regulated SACCOs industry between the DT-SACCOs' segment on one hand and the NWDT-SACCOs' segment on the other hand. The analysis shows that the DT-SACCOs' segment has been consistently bearing the largest proportion of the non-remittance menace, with a total sum of Kshs 3.10 billion representing 88.75% of the total non-remitted funds being owed to them, the

highest proportion of which relates to non-remitted loan repayment deductions. This was a sharp increase from the sum of Kshs 2.16 billion representing 83.47% of the total non-remitted funds which was owed to the DT-SACCOs segment in 2023, and thus a contributing factor to the high proportion of non-performing loans of DT-SACCOs compared to those of the NWDT-SACCOs.

Figure 74: Comparative Non-Remitted Funds Distributed between DT-SACCOs and NWDT-SACCOs

Source: SASRA Database

The NWDT-SACCOs on the other hand recorded a significant drop in the non-remitted funds owed to Kshs 0.39 billion representing 11.25% of the total

non-remitted funds in 2024, from a sum of Kshs 0.43 billion being the non-remitted funds owed to the NWDT-SACCOs for the period ended December

2023. The drop in the non-remitted funds owed to the NWDT-SACCOs may be attributed to the fact that a majority of them still operate on closed common bonds, and drawing their membership from single employer-institutions, unlike their DT-SACCOs

counterparts with open-bond membership and thus exposed to dealing with multiple employer-institutions such as County Governments and Assemblies.

8.3.3. The Distribution of Non-Remitted Funds by Employer-Institutions

Table 38 provides a general overview of various categories of the employer-institutions which owed the Regulated SACCO industry non-remitted funds deducted from their employees and shows that the County Governments and Assemblies owed the highest amount of non-remitted funds amounting to Kshs 1.61 billion representing 46.07% of the total non-remitted funds in 2024 as further summarised in **Figure 75**. This was a marked increase from the amount owed by County Governments and Assemblies in 2023, which amounted to Kshs 865.17 million representing 33.4% of the total non-remitted funds of Kshs 2.59 billion then and therefore shows deterioration in the financial performance of Regulated SACCOs drawing their membership or bulk of their membership from County Government and Assemblies.

The Authority continues to express its concern by the continued and perennial failure by County Governments' and Assemblies to honour their

individual remittances obligations to the beneficiary Regulated SACCOs, more so given that cooperative functions is constitutionally devolved to the counties. It was thus expected that the County Governments and their Assemblies would be at the forefront of promoting cooperatives through prompt remittances made from employees' deductions. It must be stressed that these remittances are usually made directly from the employees' remunerations and therefore any time that the employees of County Governments and Assemblies are paid, then the deducted remittances should equally be forwarded to the beneficiary Regulated SACCOs without fail. Consequently, it is an oxymoron that the employees of the defaulting County Governments and Assemblies get paid, but the portions of funds deducted from such remunerations are not remitted to the beneficiary Regulated SACCOs, with the only plausible explanation being that the deducted funds were diverted for other purposes.

Source: SASRA Database

The Authority will thus continue to push for adequate policy reforms aimed at preventing the County Governments and indeed other government agencies, from diverting deductions made from employees' salaries to other purposes other than the purposes for which the deductions are made. Other government agencies with notoriety of hoarding deducted funds meant for Regulated SACCOs include the –

- Public Universities and Tertiary Colleges which owed a cumulative sum of Kshs 762.27 million representing 21.85% of the total non-remitted funds;
- Public Sector Companies (most of which are owned by County Governments) which owed Kshs 265.77 million representing 7.62% of the total non-remitted funds;

- State Corporations and parastatals which owed a sum of Kshs 164.76 million representing 4.72% of the total non-remitted funds; and
- National Government Ministries and related agencies which owed a total sum of Kshs 129.72 million representing about 3.72% of the total non-remitted funds.

The Authority has equally noted that some of the Regulated SACCO Societies owed funds by various employer-institutions, do not keep an up-to-date record of information and supporting documentation to verify their claims for the non-remitted deductions. This has resulted in the Regulated SACCOs losing litigations associated with claims for non-remitted deductions. In this

regard, the Authority calls upon all the Regulated SACCOs relying on any employer deductions, either on account of BOSA savings deductions and/or loan repayment deductions, to always keep and maintain an updated records of the critical documents relating to each claim of deductions. These should include the employees' instructions to the employer-

institution for such deductions; the amount of deductions expected at any given time, including the employee (member) in respect of whom the deductions are expected; the period the deductions are outstanding among others. These documents and information are critical in any legal recovery proceedings for any non-remitted deductions.

8.4. The Alternative Financial Delivery Channels and Partnerships

8.4.1. An Overview

The Regulated SACCO industry continues to heavily rely on third-party financial institutions mainly the commercial banks, as well as fintech companies to deliver their financial services and products through alternative financial delivery channels. The main alternative financial delivery channels deployed by Regulated SACCOs through commercial banks and fintech companies include mobile money delivery channels, ATM connectivity, Cheque financial services, Pesalink connectivity, digital credit and loans, SACCO agency business among others, which are gaining traction in place of the capital-intensive traditional brick and mortar teller services.

It is important to observe that the continued usage of these alternative delivery channels is driven by customer demand for real-time financial transactions premised on financial technology. To ward-off competition from other financial institutions, Regulated SACCOs must as a necessity embrace these technologically driven financial services delivery channels, while retaining their member-owned, members-managed and member-customer diatribe comparative advantages.

8.4.2. Mobile Money Connectivity

Mobile money refers to financial transactions and services by Regulated SACCOs that can be carried out using a mobile device such as a mobile phone or tablet. The connectivity to mobile money by Regulated SACCOs is either through subscription to

USSD codes or internet-based applications. **Figure 76** provides a comparative analysis of the Regulated SACCOs using USSD codes for the mobile money connectivity financial services by their members.

The analysis shows that out of the 355-Regulated SACCOs in 2024, a total of 245 of them constituting 69.01% of all the Regulated SACCOs had deployed USSD codes for their members to access financial services. This was a sharp increase in the number of Regulated SACCOs using USSD code accessibility services from the 228-SACCO Societies representing about 63.87% of all the Regulated SACCOs, which were offering USSD code accessibility services to their members in 2023 and thus underscores its demand of USSD code enabled financial services by members of Regulated SACCOs. It is noteworthy that majority of the Regulated SACCOs with USSD code accessibility services remain the DT-SACCOs, which had nearly all but 12-DT-SACCOs, already deploying the USSD code accessibility money services and constituting 93.22% of all the DT-SACCOs. The NWDT-SACCOs' segment on the other hand had 44.94% of all the NWDT-SACCOs deploying USSD code accessibility which was a slight increase from a proportion of 39.34% in 2023.

As indicated hereinabove, mobile money connectivity may be made through either USSD code available in both feature and smart phone or through internet enabled devices and applications. **Figure 77** provides an analysis of the number of Regulated SACCOs which had deployed mobile money services through internet enabled devices and applications and shows that just 171-Regulated SACCOs comprising 48.17% of all the Regulated SACCOs, had mobile money financial services through internet enabled devices and applications in 2024. This was a slight increase from the 140-Regulated SACCOs representing 39.22% of all the Regulated SACCOs which had deployed the service. As projected in the previous year, mobile money connectivity is progressively gaining traction in the Regulated SACCO industry, as it is in other sectors of the economy, but Regulated SACCOs are forewarned of the cyber risks associated with these services.

Figure 77: Number and Proportion of Regulated SACCOs with Mobile Money Connectivity through Internet Apps

Source: SASRA Database

8.4.3. The ATM Connectivity

The DT-SACCOs continues to rely heavily on ATM connectivity, payment and settlement services provided by commercial banks in order to enable their members access cash withdrawals and deposits, as well as make other direct payment transactions to third parties. The ATM connectivity services are however available for DT-SACCOs segment only and as shown in **Figure 78** and **Figure**

79 a total of 64.97% of all the DT-SACCOs had ATM connectivity services in 2024 which is a slight increase from a proportion of 64.37% of the DT-SACCOs with ATM connectivity in 2023. The slight increase was largely due to increase in the number of DT-SACCOs using the Interswitch Ltd ATM connectivity platform which increased by one (1) DT-SACCO in 2024.

Figure 78: Level of ATM connectivity of DT-SACCOs

The Cooperative Bank of Kenya remains the most dominant payment and settlement platform being used by DT-SACCOs with a total of 109-DT-SACCOs using the platform in 2024, just as it was in 2023. Other emergent payment and settlement platforms for ATM connectivity services for DT-SACCOs are the ABC Bank Ltd; Family Bank Ltd and Interswitch Ltd. It

Figure 79: Distribution of channels for ATM connectivity for DT-SACCOs.

is also observable from the statistical returns that the DT-SACCOs using the other ATM platforms, other than that of Cooperative Bank of Kenya Ltd, also have the Cooperative Bank of Kenya Ltd as an alternative option for their members' ATM connectivity financial needs.

8.4.4. The Cheque Partnerships

Despite the overwhelming emergence of mobile money and other real-time electronic payment methods in Kenya, cheques are still revered as an important bill of exchange by the Kenyan population

served by DT-SACCOs, just as those served by commercial banks. This is particularly more important in large value third-party payments and transactions, in place of cash or mobile money

transactions. Cheque payments, settlements and clearance like ATM transactions is a function directly embedded in the national payment infrastructure, platforms and with DT-SACCOs having no direct access to such platforms and infrastructure, the DT-SACCOs have over the years been forced to partner with commercial banking institution in the delivery of cheque financial services.

Figure 80 provides a snapshot of the DT-SACCOs which have partnered with one or more commercial banks for purposes of cheque issuance, settlements

and clearance services for their members. The analysis shows that Cooperative Bank of Kenya provided majority of DT-SACCOs with the cheque issuance, settlement and clearance services with a total of 86-DT-SACCOs in 2024, which is an increase from 81-DT-SACCOs in 2023. Other commercial banks which provided cheque services to the DT-SACCOs in Kenya include Family Bank Ltd (18-DT-SACCOs); Kenya Commercial Bank Ltd (11-DT-SACCOs); National Bank of Kenya Ltd (6-DT-SACCOs) among others.

8.4.5. The Pesalink Connectivity

The Pesalink electronic funds transactions and transfer services which is an initiative of the commercial banking industry in Kenya and which enables account holders to make real-time large value cash transfers and payments, from one account held in one institution to another account held in a different institution, has continued to attract members of Regulated SACCOs because of the convenience and safety it brings to customer transactions.

To do so, DT-SACCOs have been partnering with commercial banking institutions as depicted in **Figure 81** which shows that more and more DT-SACCOs are entering into the partnerships with third-party entities to enable their members enjoy the financial services offered through the Pesalink platform. The new entrants in the provision of the Pesalink platform services to DT-SACCOs are the Interswitch Ltd, Stanbic Bank Ltd, KCB Bank Ltd and Safaricom Plc, while the old players like the

Cooperative Bank Ltd (13-DT-SACCOs); Family Bank Ltd (4-DT-SACCOs), and NCBA Bank Ltd (5-DT-SACCOs) have maintained or increased the number

of DT-SACCOs being served by them during the reporting period.

Figure 81: Number of DT-SACCOs Integrated with Pesalink Platform Providers for Settlement and Clearance

8.4.6. The SACCO Agency Operations

The SACCO Agency operations involve the use of agents to transact SACCO business, which is an alternative to both the brick-and-mortar branch teller services or the mobile money delivery channels. It is a cost saving initiative to Regulated SACCOs in the delivery of their financial services but also brings convenience and ease of accessibility to members of Regulated SACCOs, since the agents are normally within the geographical reach of the members.

Figure 82 provides a snapshot of the DT-SACCOs which have deployed agents across the country to provide deposit taking SACCO business to their

membership and shows a slight increase in the number of agents deployed to 4,247 agents in 2024 distributed among 40-DT-SACCOs from an agency network of 4,038 agents distributed among 37-DT-SACCOs in 2023. It is projected that the trend of deploying more SACCO agents to undertake deposit taking SACCO businesses shall continue in the short to medium term, as DT-SACCOs seeks to efficiently provide financial services in a cost-effective manner, but also as they bring financial services closer to their members for convenience and ease of access.

Figure 82: Number of SACCO Agents in the Regulated SACCO Industry

Source: SASRA Database

Table 39 provide a summary of the transactions undertaken through the SACCO Agency networks including the number and the volumes of transactions and shows that the number of transactions dropped to 7.68 million transactions in 2024 from 7.82 million transactions in 2023, but the volume of transactions increased to Kshs 31.65 billion in 2024, compared to a volume of Kshs 27.73 billion which was transacted through the SACCO agency networks in 2023. The cash deposits and cash withdrawal transactions remain the most popular type of transactions undertaken by SACCO agents accounting for 62.15% and 27.98% of the total

number of transactions respectively in 2024. In terms of volume of transactions, the cash deposit transacted Kshs 17.46 billion representing 55.16% of the volume of all transactions compared to a volume of Kshs 15.32 billion transacted in 2023 as cash deposits. The cash withdrawal transactions on the other hand moved a volume of transactions worth Kshs 14.03 billion representing 44.34% of the volume of transactions undertaken by the SACCO agents in 2024, an increase from a volume of transactions worth the sum of Kshs 12.30 billion transacted on the agency network in 2023.

Source: SASRA Database

The other popular transactions undertaken by SACCO agents other than cash deposits and withdrawal transactions include account balance inquiries, requests for mini-statements, transfer of funds and payment of utilities or bills. Although the volume of business transacted by these types of transactions remain low, and inherently so, they are

key bouquet of financial services necessary for SACCOs to maintain their clientele and membership. As a cautionary measure on customer due diligence premised on the anti-money laundering initiatives, only a very small proportion of accounts are opened by SACCOs through their agents' network, thus reducing exposures to money laundering risks.

8.4.7. Digital Credit and Loan Products

The definition of digital credit and loan products largely differs from various jurisdictions, with the only consensus being that digital credit or loans leverages on instant, automated and remote processing of micro-loans, thereby making access to credit fast and convenient. The *Central Bank of Kenya (Digital Credit Providers) Regulations 2022*, defines “digital credit” to mean a credit facility or arrangement where money is lent or borrowed through a digital channel and “digital channel” to mean the internet mobile devices, computer devices, applications, and any other digital systems. These domestic definition of digital credit or loan do not necessarily encompass the amount of credit or loan being lent or whether the same is a micro-loan or not, and consequently, the amounts of loans or credit which would constitute a digital or a micro-credit is left open, with each credit

provider left to design their own. But since the most common platform for borrowers to receive the digital or micro-credit is the phone, the amounts of digital or micro-credit can be referenced through the maximum amount allowable through the mobile money providers platforms used to deliver the credit.

In order to retain their customer base amidst stiff competition from other credit financial institutions mainly commercial banks and digital credit providers licensed by the Central Bank of Kenya, Regulated SACCOs have expanded their bouquet of loan and credit products to include digital and micro-credit. These are the instantaneous, automatic and remotely processed credit delivered to the members' mobile phones and other devices through mobile money providers platforms. **Table 40** provides an overview of the digital and micro-credit products

offered by Regulated SACCOs in 2024, but the majority of the Regulated SACCOs had their digital products range not more than Kshs 50,000 repayable

within two (2) months, with 170-DT-SACCOs and 64-NWDT-SACCOs products falling within this bracket range.

Table 40: Key Features of Digital Credit and Loan Products offered by Regulated SACCOs

8.4.8. Credit Information Sharing Initiatives

Regulated SACCOs continued to share the credit information of their members (customers) through the credit reference bureau framework established pursuant to the *Credit Reference Bureau (CRB) Regulations 2020*, which recognises licensed Regulated SACCOs (DT-SACCOs) as direct subscribers to the licensed Credit Reference Bureau (CRBs). There is however an existing conflict between the *Credit Reference Bureau (CRB) Regulations 2020* and *section 54 of the Sacco Societies Act* which anticipated the enactment of a parallel credit information sharing framework for Regulated SACCOs. In addition, the restriction created in the *Credit Reference Bureau (CRB) Regulations 2020* by reference to licensed SACCOs means that the NWDT-SACCOs which are not licensed under the *Sacco Societies Act*, but authorized pursuant to the *Regulations 2020* made thereunder, are not bound to comply with them. Nevertheless, Regulated SACCOs

have continued to share only negative credit history with the licensed Credit Reference Bureaus (CRBs) largely as a deterrent measure against loan default by members rather than as a loan pricing mechanism.

Table 41 provides a summary of the Regulated SACCOs which makes periodic credit history reports to the licensed CRBs in Kenya with 267-Regulated SACCOs constituting 75.21% of all the Regulated SACCOs making such reports in 2024 compared to 249-Regulated SACCOs which were making such credit information and history reports in 2023. A majority of the reporting Regulated SACCOs were the DT-SACCOs with 158 (89.27% of all the DT-SACCOs) reporting and only 19-DT-SACCOs (10.73%) not reporting; while 109-NWDT-SACCOs (61.24% of all the NWDT-SACCOs) were reporting and 69-NWDT-SACCOs (38.76%) were not reporting in 2024.

Table 41: Distribution of Regulated SACCOs participating in the Credit Information Sharing with Licensed CRBs.

		2024		2023		2022

Source: SASRA Database

Figure 83 provides the distribution of Regulated SACCOs based on the CRBs in respect of which they submit credit reports, with Metropol CRB being the most popular with 256-Regulated SACCOs partnering with it in 2024 compared to 224-Regulated SACCOs in 2023. The majority of Regulated SACCOs reporting to Metropol CRB in 2024 were 151-DT-SACCOS on one hand and 105-NWD-T-SACCOS on the other hand. The Transunion CRB had a total of 28-Regulated SACCOs registered to submit the credit information of their members in 2024, while the Credit Info CRB had 7-Regulated SACCOs registered to submit the credit information of their membership.

The Authority will continue monitoring the level of participation of Regulated SACCOs in the credit information sharing initiatives with a view of inculcating the best practices in which Regulated SACCOs would be reporting uniformly to all the licensed CRBs. The Authority shall also continue to call upon policy and legislative makers to correct the existing conflict obtaining in the legal and regulatory framework for credit information sharing as it relates to Regulated SACCOs as discussed herein above.

8.5. The Inspections, Surveillance and Other Regulatory Initiatives

8.5.1. General Overview

Section 49 of the Sacco Societies Act as read with *Reg. 66 of the Regulations 2010* for DT-SACCOs and *Reg. 79 of the Regulations 2020* for NWDT-SACCOs, provides that the Authority may at any time and from time to time, and shall, if so directed by the Cabinet Secretary, cause an inspection to be made by any person authorized by the Authority in writing of any SACCO Society and of its books, accounts and records. In the prudential supervision of financial institutions conceptual framework, inspections is one of the key activities which a supervisor such as the Authority is required to undertake from time to time to-

- a) **Assess Financial Stability:** the Authority reviews the Regulated SACCOs financial statements, balance sheets, and overall financial health to ensure it has capital and liquidity to operate safely.
- b) **Evaluate Risk Management Practices:** Regulated SACCOs must have systems in place to identify, monitor, and mitigate risks (credit risk, market risk, operational risk, etc.). Inspections assess how well these systems work.
- c) **Check Regulatory Compliance:** Regulated SACCOs must follow various regulations, including those related to anti-money

laundering (AML), know-your-customer (KYC), and capital requirements. Inspections verify whether Regulated SACCOs are meeting these regulatory standards.

- d) **Assess Operational Practices:** This includes reviewing the internal controls, governance structures, management practices, and business practices to ensure efficiency, fairness, and reliability.
- e) **Verify Internal Controls:** Inspections also focus on the Regulated SACCOs internal controls and procedures to prevent fraud, errors, and mismanagement.

The inspection as a supervisory activity is usually done through on-site inspections which entails the physical visits to the Regulated SACCOs' premises by the Authority's officers, who examine documents, speak with staff, and observe operations first-hand; or through off-site inspections where the Authority's officers review data and reports submitted by the Regulated SACCO without physically visiting the institution. These two sets of inspections have foundations in the *Sacco Societies Act* as read with the Regulations made thereunder, which prescribes the general prudential supervision framework of Regulated SACCOs in Kenya.

8.5.2. On-Site Inspections.

The general architecture of the *Sacco Societies Act* as read with the Regulations made thereunder prescribed three (3) types of on-site inspections, which may require the Authority's officers to physically visit the premises of Regulated SACCOs wherever located. These are –

- a) **On-site compliance Inspections:** These are physical inspections undertaken by the

Authority for purposes of continuous monitoring of performance and compliance as provided under *Reg. 66 of the Regulations 2010* for DT-SACCOs and *Reg. 79 of the Regulations 2020* for NWDT-SACCOs. The frequency of undertaking these on-site compliance inspections, is informed by the risk based supervisory policy of the Authority

following the off-site analysis and assessment.

- b) New Branch and Place of Business on-site Inspections: These are physical on-site inspections for purposes of licensing of new branches of DT-SACCOs as provided in *Reg. 16(3) of the Regulations 2010*, which states that the Authority shall undertake the inspection of the branch premises and examine compliance with the standards and the operational readiness of the DT-SACCO for commencing operations.
- c) Licensing and authorization inspections: These are physical on-site Inspections conducted by the Authority prior to licensing of new DT-SACCO, or authorization of new

NWDT-SACCOs at their head offices, to assess their level of compliance for purposes of licensing and authorization in accordance with *Reg. 4(4) of the Regulations 2010* for DT-SACCOs and *Reg. 5(4) of the Regulations 2020* for the NWDT-SACCOs.

To undertake these on-site inspections as part of its supervisory activities, the Authority developed and implements a robust Supervisory Policy backed by a Risk Based Supervision Manual which is used to determine and allocate resources for on-site inspections in institutions where risk is highest or in instances with elevated risk levels. The identification of risks within the *Risk Based Supervision Manual* is undertaken during the off-site inspection or surveillance as discussed in the next section.

8.5.2.1. On-site compliance Inspections

Table 42 provides the number of on-site inspections conducted by the Authority at the physical head offices of Regulated SACCOs in 2024 and shows that the Authority conducted 48 on-site compliance inspections compared to 45 on-site compliance inspections undertaken in 2023. It is important to note that the number of on-site compliance inspections conducted by the Authority still fell below the recommended Supervisory Policy threshold, which requires that all factors being constant, every Regulated SACCO ought to be inspected every three (3) years, and as such would require a visit of about 115-Regulated SACCOs on an

annual basis premised on the current 355-Regulated SACCOs under the Authority's supervisory mandate.

This excludes the financially troubled Regulated SACCOs which the Supervisory Policy expects to be visited more often than the standard once every three (3) years during good times, as well as the statutory on-site inspections for new licensing and the statutory on-site inspections for new branches and places of business. Additional resources are therefore required for the Authority to effectively and efficiently discharge its prudential supervisory framework based on the international best practices.

8.5.2.2. Statutory On-Site Inspections for licensing of new Branches

Table 43 provides a summary of the statutory on-site inspections for purposes of considerations of applications for licensing of new branches by DT-SACCOs in accordance with *Reg. 16 of the Regulations 2010*. These on-site physical visits were conducted by the Authority at various geographical locations of towns and market centres spread across

14-Counties, with a total of 28 such on-site inspections being undertaken and involving a total of 25-DT-SACCOs in 2024. In comparison to the year 2023, the Authority conducted 25 on-site inspections covering 24-DT-SACCOs at different geographic locations of towns and market centres spread across 11-Counties.

Table 43: Number of Statutory On-Site Inspections for New Branch Licensing Applications - 2024

Source: SASRA Database

The outcome of the on-site inspections for consideration of licensing of new branch networks are usually shared with the Board of Directors of the respective DT-SACCOs and utilised by the Authority to determine whether or not to approve and license the operations of a new branch of a DT-SACCO

Society. Although the law allows NWDT-SACCOs to establish new branch networks and other places of businesses, there is no statutory requirement for the same to be inspected by the Authority prior to opening and operation, as it is with the DT-SACCOs.

8.5.2.3. Statutory Onsite Inspection for Authorization

The provisions of *Reg. 5(4) of the Regulations 2020* require the Authority to undertake a physical onsite inspection of the head office of a SACCO Society prior to authorisation. The purpose of the onsite inspection is to ascertain if the SACCO Society has an appropriate institutional infrastructure to undertake specified non- deposit taking business;

confirm the adequacy of its Management Information System, risk management policies and internal controls as well as the suitability of its organizational governance and management structure.

During the reporting period, the Authority conducted one (1) physical onsite inspection in November 2024

for purposes of processing an application for authorisation by *M/S ACK Imani Talent SACCO Society Ltd*, based in Nakuru Town, Nakuru County.

8.5.3. Off-Site Surveillance or Inspections

8.5.3.1. General Off-Site Surveillance

In the context of financial sector supervision, off-site surveillance refers to the ongoing monitoring of financial institutions (such as SACCOs, banks, insurance companies, or other financial firms) using data and information that is submitted to regulators, rather than through physical visits or inspections (which would be on-site surveillance). Off-site surveillance allows supervisory authorities (such as central banks, financial regulators, or other regulatory bodies) to assess the financial health, risk exposure, and compliance of financial institutions without being physically present at their premises. This is done by analysing reports, data, and documents that financial institutions are required to submit regularly, such as financial statement; risk reports; regulatory compliance reports; financial and system audit reports; stress tests results among others.

The *Sacco Societies Act* prescribes several such off-site surveillance data, reports, information and documents which are periodically submitted by

Regulated SACCOs as more particularly detailed in *Appendix I*. These include the capital adequacy, the liquidity and the statement of deposit return forms which are submitted on a monthly basis; the risk classification of assets and provisioning, investments, sectoral lending, bank agency, and SACCO agency returns which are submitted quarterly; the statements of financial position and comprehensive income which are submitted monthly and annually; and other disclosures return which is submitted annually.

The other non-periodic returns and reports which Regulated SACCOs are required to submit to the Authority for purposes of off-site surveillance include the insider lending, the fit & proper test forms for members of the Board of Directors and supervisory committees as well as senior management, the appointments or removal or resignations of Chief Executive Officers, the appointment of external auditors, and any other information as the Authority may demand from the Regulated SACCOs.

8.5.3.2. Corporate Regulatory Approvals

Another key off-site activity undertaken by the Authority as part of the off-site inspection and surveillance of Regulated SACCOs is the consideration of applications for corporate regulatory approvals and requests for no objections in respect of regulated activities of which Regulated SACCOs seek to engage in and/or seek to expand their business lines. **Table 44** provides a detailed summary of the particulars of corporate approvals received and considered by the Authority in 2024, with the mandatory statutory consideration and approval of audited financial statements taking the

largest share of all the corporate approval requests. This is because all Regulated SACCOs are required by *section 41 of the Act* as read with the Regulations made thereunder to submit to the Authority for consideration and approval, their respective audited financial statements for the previous year not later than 31st March of the subsequent ensuing year.

The applications for approval of new loan and credit products including other savings and digital credit services are however the second most popular request for corporate approvals by Regulated

SACCOs, with a total of 99 request being received in 2024 out of which 79 applications were approved, with eight (8) applications being rejected while twelve (12) others were pending finalization for various other reasons. Considerations of applications for new loans and savings products by the Authority is a key market conduct supervisory activity of the Authority aimed at ensuring that the financial products and services offered by Regulated SACCOs meet the

basic consumer protection requirements. It is also an occasion for the Authority to review the risks associated with financial products and services offered by Regulated SACCOs with the aim of proactively designing appropriate internal controls and corrective actions, in order to avoid exposures of members deposits to losses.

Table 44: Summary of the Particulars of Corporate Approvals Received and Considered in 2024									
	TYPOLOGY OF CORPORATE APPROVAL APPLICATION	RECEIVED FOR CONSIDERATION		GRANTED APPROVALS		NOT APPROVED/REJECTED		PENDING REVIEW

Source: SASRA Database									

8.5.4. Complaints Resolution and Management

Supervision of financial institutions such as SACCO Societies entails both prudential and market conduct. Whereas prudential supervision is concerned with the solvency, safety and soundness of the Regulated SACCOs as discussed in [section 7.0 of this Report](#); the market conduct supervision addresses the relationship between the Regulated SACCOs and their members (customers), including how such customers are treated as well as the level of appropriateness of financial products and services offered to the customers, fair treatment of the customers and complaints resolution by the customers. As part of its market conduct supervision activities, the Authority receives and resolves members' complaints and inquiries within the

existing legal and regulatory frameworks, including referral to other appropriate government agencies.

Table 45 and **Figure 84** provides the summary of complaints and inquiries received and processed by the Authority from members of SACCOs and the public during the year 2024 and show that issues relating to claims for refunds of savings or deposits as well as transfer of shares continue to dominate the SACCO industry at 64.27% of all the complaints and inquiries made in 2024. These are complaints and/or inquiries arising from persons who have withdrawn from the membership of their respective SACCOs and thus claim refund of savings (deposits) in accordance with the prevailing legal frameworks.

Some of the key reasons giving rise to these complaints and inquiries are –

- (a) Inadequate awareness by complainants that claims for refunds of savings (deposits) are only due after giving a notice of not less than sixty (60) days of withdrawal from membership.
- (b) Lack of knowledge by complainants of SACCOs that claims for refund of savings (deposits) are not due, where such savings

(deposits) were pledged by the complainants as security for loans or credit facilities to another member, unless that other member has obtained and furnished the SACCO with alternative security.

- (c) Failure by some Regulated SACCOs to adequately provide for liquidity contingency plans to cater for members' withdrawals and claims for refund of savings (deposits) due to several factors mostly associated with liquidity constraints.

Table 45: Summary of the Complaints and/or Inquiries received and processed from members of SACCOs and Public

Source: SASRA Database

On the other hand, complaints associated with transfer of shares mostly emanate from the lack of understanding of members of SACCOs that share subscriptions are equity capital and are therefore not refundable upon withdrawal and exit from membership. Additionally, although theoretically the shares are transferrable, the absence of a ready

market for the sale and transfer of such shares is practically impossible, and this conundrum has often resulted in friction between some SACCOs and their membership. To address these issues, the Authority continues to undertake awareness creation to the members' rights and obligations through its social media platforms but also encourages SACCOs

to always sensitize their members on the same, particularly during the educational meetings.

Additionally, the Authority encourages SACCOs to always maintain their prescribed minimum share capital at minimum levels due to the absence of a market to transfer the same upon members' exit as

well as price discovery mechanisms for their par value. In accordance with the established cooperative tradition and practices, the bulk of the SACCOs' core capital should be made up of institutional capital, built from retained earnings which is comparatively cheaper than from the members' share capital.

Figure 84: Prevalence Levels of Complaints and/or Inquiries Received and Processed by the Authority

8.5.5. Criminal Investigations by the SACCO Societies Fraud Investigations Unit.

The SACCO Societies Fraud Investigations Unit (SSFIU) was established in 2020, with the mandate of detection, prevention, and apprehension of offenders perpetrating fraud within the Regulated SACCO industry. They also investigate and make appropriate recommendations to the Office of the Director of Public Prosecution concerning fraud within the SACCO industry. **Table 46** provides the

summary and status of criminal investigations being undertaken by the SSFIU with 8-cases pending under investigations, 6-cases pending before various criminal courts across the country, 1-case pending decision by the office of the Director of Public Prosecutions, and 4-cases pending arrest and arraignment in court.

8.5.6. Regulatory Initiatives

Regulatory initiatives in the context of the supervision of Regulated SACCOs refer to the development and formulation of policies, frameworks, and actions to ensure that Regulated SACCOs operate in a sound and stable manner, maintain market confidence, and

protect the interests of depositors in the Regulated SACCOs, as well as larger financial system. During the year 2024, the Authority developed and issued the regulatory tools and instruments summarised in **Table 47** for the Regulated SACCO industry.

Table 47: Summary of the Regulatory Tools and Instruments Issued by the Authority for the Regulated SACCO Industry in 2024

	NAME OF THE REGULATORY TOOLS OR INSTRUMENTS	REFERENCE NUMBER AND DATE OF ISSUANCE	THE MAIN PURPOSE AND OBJECTIVES OF THE REGULATORY TOOL OR INSTRUMENTS
1.	Guidelines for Regulated SACCOs on Combating Money Laundering, Terrorism Financing and Countering Proliferation Financing	Guideline No. SASRA/GG/1/2024 dated 24 th June 2024	Provide guidance and assistance to Regulated SACCOs on compliance with their Anti-Money Laundering, Combating Terrorism Financing and Countering Proliferation Financing obligations. It also highlights the legislative and regulatory framework for Anti-Money Laundering, Combating Terrorism Financing and Countering Proliferation Financing and their administration as it relates to Regulated SACCOs.
2.	Guidance Note on The Revised Procedure for Application for Renewal of Deposit-Taking Licenses For DT-SACCOs and Data Collection Template	SASRA/GG/1/2022 (Revised October 2024)	Provides general guidance to DT-SACCOs on the revised procedures and Requirements for application for the renewal of their respective deposit taking licenses, including the prescribed timelines, the mandatory supporting documents, as well as the minimum annual data disclosures on their operations and activities.
3.	Revised Guidance Note on The Revised Procedure for Application for Renewal of Authorization For NWDT-SACCOs and Data Collection Template	SASRA/GG/3/2022 (Revised October 2024)	Provides general guidance to NWDT-SACCOs on the Procedures and Requirements for application for the renewal of their respective authorizations, including the prescribed timelines, the mandatory supporting documents, as well as the minimum annual data disclosures on their operations and activities.

Source: SASRA Database

At the same time, the Authority continued to maintain collaboration and partnerships with international players in the cooperative financial supervision and regulatory space, in order to continuously build its knowledge repository as well benchmark on international best practices in

supervision and regulation of SACCO Societies. In this respect, the Authority hosted several knowledge exchange programmes with other international financial sector regulators in 2024 as summarised in **Table 48**. The highlight of the knowledge exchange events was the successful hosting of the

International Credit Union Regulators Network (ICURN) annual general meeting and training workshops which was held in Naivasha from 17th July 2024 to 20th July 2024 and included a session for African Credit Union Supervisors Forum. ICURN is a network of governmental bodies or agencies responsible for the supervision and regulation of

SACCOs (Credit Unions) in their respective countries and jurisdictions, and the Authority as the government's agency responsible for supervision and regulation of SACCOs in Kenya is a member of the ICURN. The full details of membership of ICURN and its activities are available on its website www.icurn.org.

Table 48: Particulars of International Delegations hosted by SASRA on Regulatory Initiatives in 2024.

	COUNTRY OF ORIGIN	PARTICULARS OF DELEGATION	DATE	LOCATION AND VENUE	NUMBER OF PARTICIPANTS
1	Zambia	Virtual meeting with Ministry of Housing and Zambia National Building Society official on the role of SACCOs in the Mortgage Refinancing Scheme	15 th January 2024	VIRTUAL	Fifteen (15) senior officers from the ministry
2	Ghana	Study visits for delegation from University of Ghana Cooperative Credit Union on supervisory regime in Kenya	14 th February 2024	SASRA BOARD ROOM	six (6) management and senior staff from the University of Ghana
3	ICURN Member Countries	International Credit Union Regulators Network (ICURN) member organizations	17 th to 19 th July 2024	NAIVASHA	47 participants drawn from the different countries namely: - Uganda, Kenya, Ukraine, Malawi, USA, Haiti, Mongolia, India, South Korea, Lesotho, Seychelles, South Africa, Portugal, Brazil, Trinidad, Singapore, United Kingdom
4	Botswana Tanzania South Africa Uganda Zimbabwe	Executives from the Bank of Uganda, Dept of Cooperatives Botswana, Reserve Bank of Zimbabwe and Tanzania Cooperative Development Commission and ICURN – South Africa	22 nd August 2024	SASRA BOARD ROOM	Ten (10)
5	Malawi	Central Bank of Malawi	2 nd to 6 th September 2024	SASRA BOARD ROOM	one (1) Technical regulatory compliance officer from the Reserve Bank of Malawi
6	Nigeria	Federal Ministry of Agriculture & Food Security	4 th to 8 th November, 2024	SASRA BOARD ROOM	One (1) Technical Assistant to the Minister on Cooperative Matters

Source: SASRA Database

During the ICURN meeting, the Authority's technical staff together with the global delegates from other governmental supervisory agencies were taken

though key supervisory and regulations frameworks and thematic areas as summarised in **Table 49**.

Table 49: Summary of Technical Topics and Thematic Regulatory Issues Presented to Delegates at the ICURN 2024 Conference in Naivasha, Kenya

	TECHNICAL TOPICS AND THEMATIC REGULATORY ISSUES PRESENTED TO DELEGATES	PRESENTERS AND FACILITATORS	
1	Leveraging Artificial Intelligence, digital technology, and social media to enhance supervisory interaction	Joao Pacheco , Supervisor, Banco Central do Brasil Jayant Kumar Dash , Executive Director, Reserve Bank of India Moderator: Dele Adeleye, Head of Division, Bank of England, UK	
2	Implementing and Updating Deposit Protection Systems for Credit Unions	Speaker: Dave Grace, Executive Director, ICURN Moderator: Woodginy G. Etienne, Financial Analyst - Chief of Service, Central Bank of Haiti	
3	Climate Change: Action and Implications for Supervisors	Speaker: Teresa Louro, Assistant Commissioner, Depository Supervision, St of MD, Office of Financial Regulation, USA Speaker: Franchesca Melanie, Financial Surveillance Analyst, Central Bank of Seychelles Moderator: Bulbul Kubyekha, Financial Regulatory Commission of Mongolia	
4	Designing a Risk-Based Supervisory Framework	Speaker: Dele Adeleye, Head of Division, Bank of England, UK Speaker: Peter Owira, Director, Compliance and Market Conduct, Sacco Societies Regulatory Authority, Kenya Moderator: Franchesca Melanie, Financial Surveillance Analyst, Central Bank of Seychelles	
5	Supervising Second Tier Cooperatives: Strategies for Effective Oversight	Speaker: Kelly Lay, NCUA – Director, Office of Examination and Insurance, National Credit Union Administration, USA Moderator: Lebogang Kgosiemang, Divisional Head of Prudential Authority, South African Reserve Bank, South Africa.	
6	Implementing Deposit Insurance	Speakers: Dave Grace, Executive Director, ICURN Moderator: Patrick Mhango, Executive Director, Regulations, Reserve Bank of Malawi	
7	Translating International Standards (AML/CFT, liquidity, market conduct, etc.) for Small SACCOs	Speaker: Bank of Uganda Moderator: Nelson Mutatiina, Director Supervision, Uganda Microfinance Regulatory Authority	
8	Managing Stakeholder relationships in the context of Legislative Developments as Supervisors	Speaker: Peter Njuguna, Chief Executive Officer, Sacco Societies Regulatory Authority, Kenya Moderator: Edith Tusubira, Executive Director, Uganda Microfinance Regulatory Authority	
9	Managing Payment System Access for SACCOs	Speaker: Jayant Kumar Dash, Executive Director, Reserve Bank of India Moderator: David de Jong, Director of Membership, ICURN

8.5.7. Capacity Building Initiatives for the Regulated SACCO Industry

Continuous capacity building, sensitization and training of officers of Regulated SACCO Societies is a critical component of the Authority's supervisory efforts towards ensuring regulatory compliance. In addition, such fora provide the Authority with

appropriate platforms for knowledge management and information on the best cooperative financial business practices, while affording Regulated SACCOs with opportunities to network and learn from their peers.

The Authority has adopted two (2) generic models of undertaking such capacity building, sensitizations and trainings namely those initiated by the Authority to the entire SACCO industry based on emergent supervisory and regulatory needs on the one hand, and those specifically initiated by the individual

Regulated SACCOs themselves and premised on their individual needs. **Table 50** provides the summary of capacity building, sensitizations and training initiatives undertaken for the Regulated SACCO industry in 2024.

Table 50: Summary of Capacity Building & Trainings conducted for the Regulated SACCO Industry in 2024

	DATE	LOCATION & VENUE	TARGET AUDIENCE	SUBJECT MATTER OF CAPACITY BUILDING, SENSITIZATION & TRAINING	FACILITATORS	PARTICIPANTS
1	4 th June 2024	Lake Naivasha Resort, Naivasha Town	Chief Executive Officers and Board of Directors of DT-SACCOs	Integrating Environmental, Social and Governance in SACCO Business Climate and Green Financing Initiatives	Ms. Lucy Kaburia Treasurer, MAGADI SACCO Society Ltd	335 delegates drawn from 167 DT-SACCOs
				Diagnostic Study on the Role of SACCO's in International/Diaspora Remittances	Financial Sector Deepening (FSD) Kenya	
				Sacco Assurance and Insurance Agency	Insurance Regulatory Authority (IRA)	
				Unclaimed Financial Assets and Impact on SACCOs	Unclaimed Financial Assets Authority (UFAA)	
2	5 th June 2024	Lake Naivasha Resort, Naivasha Town	Chief Executive Officers and Board of Directors of DT-SACCOs	Discussion on System migration, Challenges and Success factors	Dr. Gamaliel Hassan Chief Executive Officer, STIMA DT-SACCO Ltd.	321 delegates drawn from 165 DT-SACCOs
					Mr. Simon Njenga, Chief Executive Officer, K-UNITY SACCO.

8.5.8. The Anti-Money Laundering Initiatives

The *Proceeds of Crime and Anti-Money Laundering Act (POCAMLA)* and the Regulations made thereunder provides the domestic legal framework for combating money laundering, terrorism financing and proliferation financing. The POCAMLA legislative framework designate SACCOs as reporting institutions while the Authority is designated as a Supervisory Body with specific supervisory duties with regard to AML/CTF/CPF for SACCO industry. Consequently, and in accordance with its *Strategic Plan 2023-2027*, the Authority has continued to mainstream AML/CTF/CPF initiatives in its supervisory processes including continuous collaboration with the Financial Reporting Centre (FRC) in such initiatives.

For instance, Regulated SACCOs are required by the Authority to disclose their registration status as reporting institutions under POCAMLA with the FRC

as part of the pre-requisite consideration of their applications for renewal of licenses and authorization for the ensuing year. In this regard, **Table 51** provides the status of the registration of the Regulated SACCOs as reporting institutions and shows that a total of 320-Regulated SACCOs had fully been registered with FRC as reporting institutions in 2024, which is an increase from just 212-Regulated SACCOs which had registered in 2023. Thus, there were only 35-Regulated SACCOs which had not fully registered as reporting institutions mainly on the grounds that they had submitted incomplete applications, or some documents were not availed to enable the completion of the registration process. The Authority shall be following up with these individual SACCOs to ensure that they are fully registered as reporting institutions as required by law in the shortest time possible.

Table 51: Number of Regulated SACCOs Registered with FRC as Reporting Institutions for Purposes of POCAMLA

STATUS OF REGISTRATION	REGULATED SACCO SEGMENT	2024		2023	
		No. of SACCOs	Proportion	No. of SACCOs	Proportion
REGISTERED	DT-SACCOs	172	48%	116	32.49%
	NWD-T-SACCOs	162	46%	96	26.89%
	TOTAL	334	94%	212	59.38%
NOT REGISTERED	DT-SACCOs	5	1%	58	16.25%
	NWD-T-SACCOs	16	5%	87	24.37%

		No. of SACCOs	Proportion	No. of SACCOs	Proportion
	TOTAL	21	6%	145	40.62%

Source: SASRA & FRC Database

Other than mainstreaming their registration as reporting institutions as required by the provisions of *section 50(5) of the Sacco Societies Act* as read with *section 36C (1) (d) of POCAMLA*, the Authority as the primary supervisory body of SACCO Societies in Kenya also developed and issued the *Guidelines for Regulated SACCOs on Combating Money Laundering, Terrorism Financing and Countering Proliferation Financing (Guideline No. SASRA/GG/1/2024 dated 24th June 2024)*. The main objective of the Guideline is to provide guidance and assistance to Regulated SACCOs on compliance with their Anti-Money Laundering, Combating Terrorism Financing and Countering Proliferation Financing obligations with the specific objectives of –

- Highlighting the legislative and regulatory framework for Anti-Money Laundering, Combating Terrorism Financing and Countering Proliferation Financing and their administration as it relates to Regulated SACCOs;
- Identification, assessment and mitigation of Money Laundering /Terrorism Financing

/Proliferation Financing risks in the SACCO industry; and

- Providing guidance on detection, deterrence and reporting framework in relation to Anti-Money Laundering /Combating Terrorism Financing /Countering Proliferation Financing.

The Guidelines which were issued after stakeholder consultations with the Regulated SACCO industry and the FRC are available for download for ease of reference from the Authority's website www.sasra.go.ke. A summary of the key requirements of the Guidelines is discussed in *Chapter III of this Report*.

As part of its collaboration initiatives with the FRC, the Authority continued to promptly disseminate the FRC circulars to the Regulated SACCOs in accordance with the prevailing legal frameworks, and also in undertaking training and capacity building. **Table 52** provides a summary of the key circulars received from FRC and disseminated to the Regulated SACCOs in 2024.

Table 52: Summary of FRC Circulars relating to Regulated SACCOs on AML/CTF/CPF issued in 2024

	DESCRIPTION OF CIRCULAR FROM FRC	CIRCULAR NUMBER AND DATE ISSUED	PURPOSE OR OBJECTIVE OF THE CIRCULAR
1	Amendments to entries in the 1718 sanctions list	FRC Circular No. 2 of 2024 dated 6 th January 2024	The circular on amendments of entries in the 1718 sanction list, where two entities and groups were added, namely: General Bureau of Atomic Energy (GBAE) and Academy of National Defence Science, both from the People's Republic of Korea.
2	Amendments to entries in the ISIL (DA'ESH) and AL-QAEDA sanctions list	FRC Circular No. 3 of 2024 dated 11 th January 2024	The circular on amendments of the list in the ISIL and AL-QAEDA , where thirteen (13) individuals and two (2) entities were added to the sanction list.
3	2022 annual review of the ISIL (DA'ESH) and AL-QAEDA sanctions list	FRC Circular No. 4 of 2024 dated 8 th February 2023	The circular on amendments of the list in the ISIL and AL-QAEDA , where eighty-five (85) individuals and two (2) entities were added to the sanction list with travel bans and arms embargo as outlined in paragraph 1 of Security Council resolution 2610 (2021)

Table 52: Summary of FRC Circulars relating to Regulated SACCOs on AML/CTF/CPF issued in 2024

	DESCRIPTION OF CIRCULAR FROM FRC	CIRCULAR NUMBER AND DATE ISSUED	PURPOSE OR OBJECTIVE OF THE CIRCULAR
4	Amendments to an entry in the 1718 sanctions list	FRC Circular No. 5 of 2024 dated 9 th March, 2024	The circular amended the sanctions list by adding an entity, namely, the Ministry of Defence from the People's Republic of Korea.
5	Amendments to an entry in the 1718 sanctions list	FRC Circular No. 6 of 2024 dated 16th April 2024	The circular amended the sanctions list by adding an entity, namely, the National Aerospace Development Administration from the People's Republic of Korea.
6	Amendments to an entry in the ISIL (DA'ESH) and AL-QAEDA sanctions list	FRC Circular No. 7 of 2024 dated 26th April 2024	The circular amended the sanctions list by adding individuals and striking some from the earlier sanctions list
7	Removal of an entry from the ISIL (DA'ESH) and AL-QAEDA sanctions list	FRC Circular No. 8 of 2024 dated 24th August, 2024	The circular amended the sanctions list by removing two (2) individuals, namely: 1: YASSINE 2: CHEKKOURI, from the Republic of Morocco.
8	Amendments to an entry in the 1718 sanctions list	FRC Circular No. 9 of 2024 dated 18th September, 2024	The circular amended the sanctions list by adding two (2) individuals, namely: 1: RI 2: PYONG CHUL, from the People's Republic of Korea.
9	Amendments to an entry in the ISIL (DA'ESH) and AL-QAEDA sanctions list	FRC Circular No. 10 of 2024 dated 3rd December, 2024	The circular amended the sanctions list by adding the individuals' names to the sanctions list.
10	Annual Compliance Report	FRC Circular No. 11 of 2024 dated 10th December, 2024	The circular was a reminder to all reporting institutions to file the annual compliance report by 31 st January of the following calendar year (2025) as per prescribed formats.

Source: SASRA & FRC

On the training and capacity building collaborative initiatives, the Authority organised two (2) main trainings and sensitizations workshops for Regulated SACCOs both of which were facilitated by technical officers drawn from the FRC and the Authority. **Table 53** provides details of the training and capacity building workshops held in respect of AML initiatives

for the Regulated SACCO industry in 2024, which were attended by officers of Regulated SACCOs as well as technical officers drawn from the Authority and charged with overseeing the implementation of the AML/CTF/CPF supervision framework for Regulated SACCOs.

Table 53: Summary of Collaborative Capacity Building and Training Initiatives on AML/CTF/CPF for Regulated SACCOs in 2024

	SUBJECT MATTER OF TRAINING	TECHNICAL FACILITATORS	DATE	LOCATION	NUMBER OF PARTICIPANTS AND AUDIENCE
1.	Training of Regulated SACCOs (DT-SACCOs and NWD-T-SACCOs) on the FRC's goAML registration filing and reporting system.	FRC	12 th July 2024	Virtual (9.00 AM to 12.30 PM)	424 participants
2.	The Role of Regulated SACCOs in Anti-Money Laundering, Counter Terrorism Financing and Combating Proliferation Financing; and Feedback of Draft Guidelines.	FRC	6 th June 2024	Lake Naivasha Resort, Naivasha Town	299 SACCO officers representing Chief Executive Officers, Board of Directors & Supervisory Committees of 165-DT-SACCOs.
3.	Annual Conference of MLROs of Financial Reporting Institutions including Regulated SACCOs.	FRC and UNODC	11 th and 12 th September 2024	Safari Park Hotel, Nairobi	MLROs from Regulated SACCOs (in addition to MLROs from other Financial Reporting Institutions), and three (3)

CHAPTER III

DEVELOPMENT IN THE SACCO INDUSTRY

9.0. POLICY DEVELOPMENTS

This section provides a discussion on the key policy developments which took place at the domestic and international sphere with impact or potential impact on cooperative enterprises, but with specific regard to the SACCO industry. It also analyses the findings

and recommendations of key research and reports undertaken at the national level by different players, with the aim of shaping policy conversations in the cooperatives sector and SACCO industry.

9.1. FinAccess Household Survey 2024

The year 2024 saw publication and release of the seventh (7th) edition of the *Kenya FinAccess Household Survey 2024*, with the previous publications having been made in 2006, 2009, 2013, 2016, 2019 and 2021. The FinAccess Household Survey was initiated to enhance the measurement of financial inclusion and provide better understanding of the financial inclusion landscape indicators to track financial inclusion dynamics over time. The financial inclusion measurement cuts across the four dimensions of *access, usage, quality, and impact/welfare*.

The 2024 survey revealed that the formal financial access in Kenya stood at 84.8% in 2024, which is an increase from a formal financial access of 83.7% in 2021. The survey further unpacks the contribution of the SACCO industry in financial inclusion conversation, with usage of SACCOs' financial services and products growing to 11.7% in 2024 from a usage of 9.6% in 2021 as shown in **Figure 85**. Interestingly, this is almost the same usage rate which was recorded in the *2019 Kenya FinAccess Household Survey* which stood at 11.3%.

Figure 85: Usage of Financial Services and Products by Providers (%)

Source: 2024 FinAccess Household Survey

Regulated SACCOs like any other financial services provider, uses different types of channels to deliver financial services to their customers. The traditional financial services delivery channels are the brick-and-mortar physical offices mostly the head offices and branch networks, while other alternative distribution channels mostly through mobile money and other electronic platforms as discussed in *Chapter II of this Report* have continued to emerge. The *2024 FinAccess Household Survey* unpacked the level of usage between the traditional delivery channels and the mobile phone enabled delivery channels by gender, dwelling and age brackets. In the overall, the survey showed that more and more members of SACCOs prefer to use the mobile

delivery channels with 70.6% of the users of SACCO financial services, while 66.1% still used the traditional service delivery channels as summarised in *Figure 86*. In the gender divide, 72.5% of the male users prefer mobile based delivery channels and 65.6% still used the traditional delivery methods, while among the female users of SACCOs' financial services 68.1% preferred the mobile based delivery methods with 66.6% still preferring to use the traditional methods of financial services delivery by their SACCOs. These findings of the *2024 FinAccess Household Survey* are very much consistent with the increased usage of mobile money financial services by Regulated SACCOs as discussed comprehensively in *section 8.4 of this Report*.

Figure 86: Traditional SACCO Usage (Physical premises) Vs Mobile SACCO Usage (%) by gender, dwelling and age brackets, 2024

Based on the dwelling of the users of SACCO financial services, the survey showed that a majority of rural users preferred the traditional physical offices at 75.1% of all users compared to 60.7% of the rural users of SACCO services who preferred the mobile SACCO services. This is consistent with the relatively low mobile network availability among the rural population compared to the urban population which had a majority of the users of SACCOs' financial services preferring mobile SACCO services at a whopping 85.9% of the users compared to 51.7% of the users who preferred the traditional physical

delivery service channels. Among the different demographic age brackets, the survey's findings stood out with regard to those aged above 55 years whose preference was largely the traditional delivery channels at 80.2% of the users, compared to just 41.8% of the users within the age bracket of 55 years and above who preferred the usage of mobile services.

The survey also analysed the usage of SACCOs financial services and products by branches in comparison to other mobile phone accessibility

services as depicted in **Figure 87**, and which shows that physical branches accounted for 59.9% of the users of SACCOs' financial services and products, with just about 1.1% accessing the services through the SACCOs' head offices. The rest of the accessibility were through other mobile phones and internet enabled services with the mobile phone

apps accounting for 26.1% of the users, mobile phone USSD code access accounting for 23.8% of the users, SACCO paybills accounting for 19.8% of the users, SACCO agents accounting for 18.9% of the users, internet users accounting for 4.7% and ATM users accounting for 2.7%.

Figure 87: Percentage of SACCO Usage by Financial Delivery Channels (%)

Source: 2024 FinAccess Household Survey

The survey report which was a joint initiative of the Authority in partnership with the other members of the Joint Financial Sector Regulators(JFSR) forum, together with other government agencies and development partners is available for download for ease of reference from the Authority's website www.sasra.go.ke. The findings of the survey form a rich critical read for Regulated SACCOs and other

players in designing and rolling out appropriate financial products and services to their members and customers. It is also a critical policy formulation and analysis tool for financial inclusion supervision in the country and thus commended for reading and utilization by the financial supervisory agencies, policy makers, and researchers alike.

9.2. Research on the Role of SACCOs as International Remittances Providers

Remittances are a crucial part of Kenya's economy and according to the *Central Bank of Kenya's Bank Supervision Annual Report 2023*, the remittance inflows in 2023 amounted to Kshs 363 billion. These remittance inflows were channelled into the country mainly through the financial institutions licensed and regulated by CBK and thus exclude Regulated SACCOs yet Regulated SACCOs play a very critical role in the domestic financial services sector. It is in

this context that the Authority in collaboration with *Financial Sector Deepening – Kenya (FSD-Kenya)* and the *International Fund for Agricultural Development (IFAD)* commissioned and undertook a study to unpack the potential role of SACCOs in the remittances space, and the study report was published in the last quarter of 2024 and is available for download from the Authority's website www.sasra.ke. Additionally, many of the Regulated

SACCOs were noted to be serving the diaspora market membership, who remit funds to the country for various purposes, yet despite their membership in Regulated SACCOs, they still have to use other financial institutions and not their SACCOs to remit the funds from abroad.

The study noted that many SACCOs with such diaspora membership have already embraced money remittances financial products, but through other financial service providers, mainly commercial banks, money transfer operators and mobile money service providers, all of which present SACCOs missed opportunity to serve their members, as well as increase costs. The study equally found that the

existing legal and regulatory frameworks are the greatest hindrance to SACCOs' direct participation in the remittances space with the key bottlenecks being prohibition of SACCOs handling forex; exclusion of SACCOs from direct access to the national payment and settlement infrastructure; limitation of money remittance operators to companies and be named as such amongst others. The study is thus an important referential tool for government and policy makers as the Regulated SACCOs in Kenya seek to enter the maturity phase of their development, just like their counterparts in the United States of America, Brazil, Canada, Ireland and other countries with developed SACCO (Credit Union) financial systems.

9.3. Revision of the Core Principles for Effective Banking Supervision

The Core Principles for effective banking supervision (Core Principles) are the de facto minimum standard for sound prudential regulation and supervision of banks and banking systems. The Core Principles are considered universally applicable and should be applied by national authorities in the supervision of banks within their jurisdictions, irrespective of the complexity of banks and banking systems. It is important to note that the Core Principles recommends that they should also apply to non-bank financial institutions (NBFIs), which provide deposit and lending services similar to those of banks. Such NBFIs engaged in deposit and lending services include Credit Unions and SACCOs, and to this extent the application of these Core Principles was extended to the supervision and regulation of Credit Unions and SACCOs (Cooperative Financial Institutions though the *Guiding Principles for Effective Supervision of Financial Cooperative Institutions*, which were issued by the *International Credit Union Regulators Network (ICURN)*).

The Core Principles for effective banking supervision (Core Principles) were revised in April 2024, being the first comprehensive update since 2012, to reflect the evolving financial landscape and incorporates feedback from a wide range of stakeholders including Basel Committee on Banking Supervision (BCBS)

members, non-member countries, the International Monetary Fund (IMF), and the World Bank Group (WBG). The revision further responded to regulatory developments and structural changes within the banking industry over the last decade and addresses the lessons learned over the last 10 years, including from the pandemic and the March 2023 banking turmoil; key findings from assessments under the Financial Sector Assessment Program (FSAP); and new challenges posed by ongoing structural transformations, notably digitalization and climate change.

The revisions emphasize the importance of operational resilience, systemic risk management, and the adoption of a proportional approach to supervision, catering to the global diversity of banks and banking system. They put emphasis on the need to strengthen the requirements of supervisors, approaches to supervision and supervisors' expectation of banks to accommodate the wide spectrum of banks and banking system, in view to reinforce the concept of proportionality. These revisions thus champion the strengthening of the standards for prudent regulation and effective supervision of banks and banking systems, thereby contributing to overall financial stability and securing continued relevance of the standards while

supporting legitimate financial innovation. The main areas of revision to the Core Principles are summarised in **Table 54**.

Table 54: Summary of the Main Revisions to the BCBS Core Principles			
NO	THEMATIC AREA	CORE PRINCIPLE INVOLVED	CHANGES INTRODUCED/ AMENDMENTS
1	Financial Risks	Capital Adequacy (CP16)	A non-risk-based measure to constrain the buildup of leverage in the banking sector.
		Credit Risk Management (CP17)	Emphasis on risks related to securitization exposures and counterparty risk margining and clarification of broad scope of credit risk i.e. all sources of credit risk should be included.
		Problem Assets, Provisions and Reserves (CP18)	CP18 was updated to include expected credit loss provisioning and to align definitions with BCBS guidance.
2	Operational Resilience and the Digitalization of Finance	Operational Risk and Operational resilience. (CP25)	The CP25 retains key requirements on operational risk, while enhancing the focus on governance, operational risk management, business continuity, interconnections, and interdependencies, third party dependence management, cybersecurity, and information and communication technology.
3	Systemic Risk and Macroprudential Supervision	Cooperation and Collaboration (CP3) and CP Home-Host Relationships (CP13)	Emphasize on the importance of close cooperation between the authorities responsible for banking supervision and macroprudential policy and financial stability.
		Supervisory Approach (CP8) and Supervisory Techniques and Tools (CP9)	Amended to clarify the role of the supervisor in assessing and mitigating risks to banks and the banking system and implications for financial stability, and to require that supervisors have a process to assess and identify systemically important banks in a domestic context.
4	Risk Management Practices	Corporate Governance (CP14)	Emphasis in considerations related to corporate culture and values, board independence, as well as processes to identify and assign responsibility and accountability.
		Risk Management Process (CP15)	Reinforced risk culture and risk appetite frameworks, introduction of specific requirements on risk data aggregation and explicit reference to business model sustainability.
		Transactions with Related Parties (CP20)	The definition of related parties and the approval process for granting and managing related party transactions and associated reporting requirements were strengthened and introduction of Provisions on exemptions for certain transactions between entities within a banking group.
		Disclosure and Transparency (CP28)	Introduction of Pillar 3 disclosure requirements in the case of internationally active banks
		Abuse of Financial Services (CP29)	Amendments to maintain consistency with the Financial Action Task Force (FATF) standards
5	New Risks—Climate Change and Digitalization	Supervisory approach (CP8) and Supervisory Reporting (CP10)	Introduction of a definition of climate-related financial risks, require supervisors to take into consideration climate-related financial risks in their supervisory methodologies and processes and to have the power to require banks to submit

Table 54: Summary of the Main Revisions to the BCBS Core Principles

NO	THEMATIC AREA	CORE PRINCIPLE INVOLVED	CHANGES INTRODUCED/ AMENDMENTS
			information that allows for the assessment of the materiality of such risks.
		Risk Management Process (CP15)	Require banks to have comprehensive risk management policies and processes for all material risks (including climate-related financial risks)
		Internal Control and Audit (CP26)	Require banks to consider climate-related financial risks as part of their internal control framework.
		Responsibilities, Objectives and Powers (CP1)	Amendments were made to ensure that supervisors can continue to access relevant information (irrespective of where it is stored) and review the overall activities of the banking group, including those undertaken by service providers.
6	Non-bank Financial Intermediation	Responsibilities, Objectives, and Powers (CP1)	Amendments reinforce the need for a group-wide approach to supervision
		Risk Management Process (CP15)	Amendments highlight step-in risk more explicitly
		Credit Risk (CP17)	Adjustments were made to give greater emphasis to the management of counterparty credit risk.

Since the ICURN's *Guiding Principles for Effective Supervision of Financial Cooperative Institutions* are largely premised on the said *Core Principles for Effective Banking Supervision* (Core Principles), it is expected that the ICURN membership shall in the

coming years put in motion the process of revising their Guiding Principles for Effective Supervision of Financial Cooperative Institutions, so as to conform with the 2024 Basel's revision of the Core Principles.

9.4. Launch of the Celebration of the UN International Year of Cooperatives 2025

Following the declaration by the 47th plenary session of the United Nations proclaiming the year 2025 to be observed as the second UN International Year of Cooperatives (2025), the International Cooperative Alliance (ICA), designated the *2025 United Nations International Year of Cooperatives (IYC2025) theme* to be "*Cooperatives Build a Better World*" to showcase the enduring global impact cooperatives have everywhere. The theme also puts a spotlight on how the cooperative model is an essential solution to overcome many global challenges and continues to play an important role in accelerating efforts to implement the Sustainable Development Goals (SDGs) by 2030. The official launch of *2025 United Nations International Year of Cooperatives* was held

at the ICA Global Cooperative Conference and General Assembly, in New Delhi, India in November 2024, which focussed on four (4) pillars of action, christened the *New Delhi Action Agenda 2024*, namely –

- a) *Reaffirming the cooperative identity through:*
 - (i) Living Principles: Promote, protect, and communicate the cooperative identity.
 - (ii) Cooperative Education: Inspire and expand access to cooperative education for all.
 - (iii) Heritage and Creativity: Establish a global cooperative program to safeguard

- cultural heritage and foster creative expression.
- (iv) Showcasing Impact: Highlight cooperatives' tangible contributions to inclusive growth and sustainable development
- b) *Enabling policy and entrepreneurial ecosystems through –*
- (i) Supportive Frameworks: Develop legal and regulatory systems that recognise the cooperative model and its governance.
- (ii) Access to Finance: Strengthen cooperative financial tools, including cooperative banks and credit unions.
- (iii) Educational Partnerships: Promote cooperative entrepreneurship in business schools and research institutions.
- (iv) Market Access: Enhance cooperatives' access to markets and infrastructure to support entrepreneurial growth.
- c) *Nurturing purposeful leadership through -*
- (i) Inclusive Leadership: Empower women, youth, and marginalised groups to lead change within cooperatives.
- (ii) Strategic Leadership Development: Prioritise executive leadership programs tailored to cooperatives.
- (iii) Cooperative Uniqueness: Position cooperatives as a key player in the global economy, leveraging their distinct identity.
- (iv) Knowledge Sharing: Foster local and international learning opportunities to drive innovation and collaboration.
- d) *Building a sustainable and Cooperative future through –*
- (i) Sustainability Solutions: Implement cooperative-driven climate action and sustainable development initiatives.
- (ii) Technology Integration: Leverage cooperative technology, AI, and digital tools to empower growth and branding.
- (iii) Resilient Networks: Strengthen cooperative value chains, circular economies, and platform cooperatives.
- (iv) Impactful Partnerships: Collaborate on research, education, and benchmarks for sustainability within planetary boundaries.
- The Kenyan Regulated SACCO industry being the largest within the national cooperative movement is therefore expected to take lead in implementation of the call-to-action initiatives under the New Delhi Action Agenda so as to realise the gains expected during the *2025 United Nations International Year of Cooperatives*. In particular, Regulated SACCOs are expected at their individual levels to –
- a) Empower their members: Prioritise education, gender equality, and youth leadership development.
- b) Innovation for resilience: Embrace technologies and new business models to remain competitive.
- c) Strengthen unity: Collaborate with other cooperatives for shared branding, advocacy, and partnerships.
- d) Build networks: Pool resources for scale, finance, and advocacy while contributing to cooperative research and education.
- The Authority and other government agencies are also expected to implement the *New Delhi Action Agenda 2024* towards the observance of the 2025 UN International Year of Cooperatives by -
- a) Creating a favourable policy environment and legal frameworks to support entrepreneurial ecosystems for cooperatives: Support cooperative development through a comprehensive approach that comprises financial, legal, and educational initiatives and take into account adequate tax incentives, regulatory reforms and access to finance.

- b) Recognising cooperatives as key partners: Involve cooperatives in the development and implementation of national policies and legislation.
- c) Mainstreaming cooperative education: Invest in programs that teach people about cooperative principles and practices.
- d) Investing in cooperative research: Support studies demonstrating cooperatives' socio-environmental and economic impact.

It is imperative to observe that a majority of the key pillars enshrined in the *New Delhi Action Agenda 2024* have been incorporated in the *Cooperative Bill, 2024* which was passed by the National Assembly and currently pending before the Senate for enactment. It is therefore envisaged that its eventual enactment and implementation shall heavily contribute towards the realization of the objects of the *New Delhi Action Agenda 2024*.

10.0. LEGAL AND REGULATORY DEVELOPMENT

This section discusses some of the key legislative, legal and regulatory developments which took place in the domestic and international arena, with direct

or indirect impact or potential future impact on the cooperative sector, but with specific regard to the SACCO industry.

10.1. The Cooperative Bill, 2024

The government published the *Cooperative Bill, 2024* as the *National Assembly Bill No. 7 of 2024* on 9th February 2024. The Bill was subjected to debate at the National Assembly and passed with amendments on 3rd December 2024. Cognizant that the cooperative function is devolved pursuant to the *Fourth Schedule of the Constitution of Kenya 2010* thereby making the Bill a matter concerning the counties, the Bill was forwarded to the Senate for debate. It is projected that the *Cooperative Bill, 2024* as passed by the National Assembly, shall therefore be introduced in the Senate for debate in the course of the year 2025 and it is available on the Parliament of Kenya website for ease of reference.

It is important to note that the *Cooperative Bill, 2024* as passed by the National Assembly seeks to repeal the existing *Cooperative Societies Act (Cap 490)*, which has been in existence since 1997, albeit with several amendments thereto. In this regard and cognizant that the current *Cooperative Societies Act* is actually the registration and incorporation statute for all cooperative enterprises in Kenya including the Regulated SACCOs, it is obvious that the proposed repeal thereof by the *Cooperative Bill, 2024*, will substantially change the manner in which cooperative enterprises are incorporated in Kenya. Some of the major changes and key issues proposed by or emergent from the *Cooperative Bill, 2024* include –

a) Guiding Principles in implementation.

The Bill provides that the implementation thereof shall be guided by the seven (7) cooperative principles as well as the national values and principles of governance provided in Article 10 of the *Constitution of Kenya, 2010*. It is also important to

emphasize that for the first time the Bill is introducing a requirement that external auditors of a Cooperative shall among others report on the Cooperative's level of compliance with cooperative principles, values and ethical beliefs (Clause 54(8)(b)).

b) Establishment of the offices of the national government.

The Bill establishes the office of the Commissioner for Cooperative Development as an office in the public service, with the key mandate of registering and maintaining a national register for all cooperatives. The Commissioner is additionally responsible for facilitating the growth, development and regulation of Cooperatives among other responsibilities.

c) Establishment of the Offices of the National Government

The Bill establishes the office of County Director of Cooperatives in each County, and which shall be an office in the County Public Service. The County Directors of Cooperatives shall thus be appointed by the relevant County Public Service Boards to serve on such terms and conditions as the Boards may prescribe.

d) Establishment of the Inter-Governmental Cooperatives Relations Technical Forum.

The Bill has established an Inter-Governmental Cooperatives Relations Technical Forum (IGCRTF) consisting of the Commissioner for Cooperative Development; the County Directors of

Cooperatives drawn from the 47 county governments; the Chief Executive Officer of the Authority; and an officer appointed by the Council of Governors; as well as a representative of the Apex Cooperative in Kenya. The IGCRTF shall be responsible for providing a platform for consultations among the county governments on the one hand and between the county and the national government on cooperative matters including considerations and approvals of technical and policy proposals in the cooperative sector. The IGCRTF is planned to meet at least twice annually with the Commissioner for Cooperatives providing secretarial and technical services.

e) Professionalizing Cooperative Technical Officers.

The Bill proposes that a person cannot serve as Commissioner for Cooperative Development or technical officer serving under the Commissioner; and as a County Director of Cooperatives and technical cooperative officers serving under the County Director of Cooperatives, unless the person has the necessary academic qualifications, competencies and experience in cooperative management and practice. This clause will strengthen the professionalization of technical officers serving in cooperative offices in the national and county governments, with expertise drawn from cooperative management trainings and practice.

f) The Structure and Typology of Cooperatives in Kenya

The Bill recognises the vertical organisational structure of Cooperatives in the Country to include the -

- (i) Primary Cooperatives to mean a cooperative formed by individual persons for purposes of promoting members' common socio-economic needs and aspirations. At

least twenty (20) natural persons will be required to form a Primary Cooperative instead of ten (10) natural persons as is with the existing *Cooperative Societies Act*.

- (ii) Secondary Cooperatives which mean a cooperative whose membership is restricted to primary Cooperatives only. At least five (5) primary Cooperatives will be required to form a Secondary Cooperative and not two (2) as is with the existing *Cooperative Societies Act*.
- (iii) Cooperative Federations which draw membership from primary or secondary cooperatives in a particular value chain, business lines or subsector. This is unlike the current legal framework which does not recognise Cooperative Federations; and
- (iv) Apex Cooperative which is defined to mean the cooperative established at the national level of government to promote cooperative development and represent the interest of cooperatives locally and internationally.

In addition, the Bill specifically provides the types of cooperative enterprises which may be formed in Kenya, thereby allowing definition of their supervision and regulations through appropriate legislative or regulatory frameworks aligned to the business. In particular, the Bill provides for the following types of primary cooperatives –

- (i) Producer Cooperatives – these are cooperatives registered with the objects of producing, processing, or marketing of the members' produce.
- (ii) Housing Cooperatives – these are cooperatives registered with the objects of facilitating their members

- to acquire housing for the benefit of members.
- (iii) Savings and Credit Cooperatives (SACCOs) – these are the cooperatives registered with the objects of mobilization of savings and granting of loans and advances to their members and connected purposes.
 - (iv) Savings and Investment Cooperatives (SICOs) – these are cooperatives registered with the objects of receiving funds from the members, strictly for making common investments of the funds on behalf of the members or a section of the members.
 - (v) Transport Cooperatives (TRANS-COOP) – these are cooperatives registered with the objects of organising their members to operate public transport services and connected purposes.
 - (vi) Worker Cooperatives – these are cooperatives registered with the objects of organizing professionals to offer specialised services or groups of services.
 - (vii) Consumer Cooperatives – these are cooperatives registered with the objects of organising consumers to acquire consumer goods and services in bulk or wholesale for sale to members at competitive costs and to achieve economies of scale.

The Bill has gone further to protect the usage of the words Cooperatives, SACCOs, SICOs and Trans-Coops to genuinely registered entities, and criminalise the usage thereof by unauthorised entities.

g) Transforming Supervisory Committee into a Supervisory Board

The Supervisory Committees of Cooperatives which are currently established pursuant to the *Cooperative Rules 2014*, are proposed to be transformed under the Bill into a Supervisory Board consisting of three (3) members elected during the annual general meeting (*Clause 56(2)(a)*). In addition, the Bill has proposed the expansion of the mandate of the Supervisory Board to include the functions traditionally performed by Audit Committee of the Board of Directors (*Clause 65*), and consequently, upon enactment, there shall be no need for constitution of an Audit Committee of the Board of Directors.

In addition to submitting their reports to the annual general meeting, the Bill further requires that the Supervisory Board shall in addition submit their reports to the Commissioner; the relevant County Director of Cooperatives; and the Authority (for Regulated SACCOs). It is also important to emphasise that the Bill proposes that the Internal Auditor of a Cooperative shall report to and provide technical support to the Supervisory Board.

h) Establishment of a Nomination Committee for Cooperatives

The Bill in *Clause 66* thereof, proposes a requirement that each cooperative shall have a Nomination Committee consisting of between three (3) and five (5) persons, whose responsibilities shall be to vet and clear persons seeking elections as members of the Board of Directors or Supervisory Board. The members of the Nomination Committee shall be identified in accordance with the Cooperative's By-Laws and Electoral Policies and presented to the members annually for approval at the general meeting with representations from –

- (i) County Director of Cooperatives or representative who shall be the Chairperson.

- (ii) Chief Executive Officer of the Cooperative who shall be the secretary.
- (iii) Any three (3) other persons drawn from any of the associations of professional bodies in Kenya, government officials or religious communities within the areas of operation of the cooperative.

Although some cooperatives especially Regulated SACCOs are already having Nomination Committees in one form or the other, it is apparent that upon enactment of the Bill, all cooperatives shall be required to amend their By-Laws to incorporate the Nomination Committee therein and also develop and implement appropriate Electoral Policies.

i) Expansion of the Jurisdiction of the Cooperative Tribunal

The Bill proposes to expand the mandate and jurisdiction of the Cooperative Tribunal as well as its composition. In particular, the Bill expands the composition of the Tribunal to include a chairperson; two (2) deputy chairpersons instead of the current one (1); and six (6) other members instead of the current three (3) members (*Clause 123*). The expansion of the composition of the Tribunal will allow it to constitute at least three (3) panels at any given time, since the quorum of the Tribunal is three (3) members chaired by the chairperson or any of the deputy chairpersons. The members of the Tribunal will however be appointed and remunerated by the Judicial Service Commission since tribunals falls under the Judiciary, and the Tribunal shall sit in such places where it has registries.

In terms of the jurisdiction of the Tribunal, the Bill in *Clause 128* has proposed the expansion of the realm of parties which can

refer a dispute to the Tribunal to include disputes between the –

- (i) Commissioner and a Cooperative.
- (ii) Commissioner and an officer of a Cooperative.
- (iii) County Director for Cooperatives and a Cooperative.
- (iv) County Director for Cooperatives and an officer of a Cooperative.
- (v) Authority and a Cooperative.
- (vi) Authority and an officer of a Cooperative.
- (vii) Among members, past members and persons claiming through members, past members and deceased members.
- (viii) Members, past members or deceased members, and the board of directors of the Cooperative, or any officer of the Cooperative.
- (ix) Cooperative and another Cooperative.
- (x) Cooperative and an employer within the definition of this Act.
- (xi) Liquidator and past members, creditors or other third parties.
- (xii) Cooperative and any other third-party entities that are not a Cooperative concerning the Cooperative business

The Bill expands the definition of a dispute as currently provided in *Section 77 of the Cooperative Societies Act* to include –

- (i) a claim in respect of a surcharge imposed against any person pursuant to this Act.
- (ii) a claim by a SACCO against a refusal to grant or a revocation of licence or any other matter with the Authority pursuant to the provisions of the *Sacco Societies Act*.
- (iii) a claim by the Commissioner or County Director for Cooperatives or the Authority or liquidator against a Cooperative or an officer of a

- Cooperative in respect of any surcharges, fines, or financial penalty imposed under this Act or any other written law.
- (iv) any claim by a Cooperative against the Authority in respect of any administrative action commenced or instituted or imposed by the Authority pursuant to the *Sacco Societies Act* or any other written law.
- (v) any claim by a Cooperative or an officer of a Cooperative in respect of any administrative action commenced or instituted or imposed by the Commissioner or the County Director for Cooperatives under this Act.
- (vi) claims by members, past members and persons claiming through members, past members and deceased members arising from breach or violation of contractual obligations.
- (vii) claims for any debt or refunds or deposits or any other due.
- (viii) a claim by a Cooperative against an employer for non-remitted deductions arising from an agreement between the Cooperative and the employer on remittance deductions.
- (ix) a claim by a Cooperative against a member, past members and persons claiming through members, past members and deceased members in respect to a breach or violation of contractual obligations.

In addition, the Bill has proposed additional mandate to the Tribunal concerning Cooperatives under liquidation including special powers to set aside certain transactions entered into by a Cooperative prior to being placed under liquidation as provided in *Part XIV* thereof.

10.2. The Guidelines on Combating Money Laundering & Terrorism Financing

The Authority in collaboration with the Financial Reporting Centre (FRC) developed and issued the *Guidelines for Regulated SACCOs on Combating Money Laundering, Terrorism Financing and Proliferation Financing, 2024 (Circular No. SASRA/GG/1/2024 dated 24th June 2024)* to be complied with by all Regulated SACCOs which are themselves reporting institutions under *POCAMLA*. It is important to note that the provisions of *POCAMLA* as read with the Regulations made thereunder designates the Authority as a supervisory body for purposes of combating money laundering, and countering terrorism financing and proliferation financing. In particular *Section 2A, 36A and 36C of POCAMLA* assigns the Authority as a supervisory body the responsibilities of regulating, supervising, and enforcing compliance for AML/CTF/CPF purposes by all SACCOs supervised and regulated by

the Authority and in respect of which the *POCAMLA* applies. This includes issuance of guidelines and circulars by the Authority in that respect.

The principal objective of the Guideline is to provide guidance and assistance to Regulated SACCOs on compliance with their AML/CTF/CPF obligations. The Guidelines further provides SACCOs with the –

- a) key highlights of the legislative and regulatory framework for AML/CFT/CPF and their administration as it relates to Regulated SACCOs.
- b) procedure for identification, assessment, and mitigation of ML/TF/PF risks in the SACCO industry.
- c) guidance on detection, deterrence and reporting framework in relation to AML/CFT/CPF.

- d) summary of the offences under the POCAMLA, POTA and the Regulations made thereunder.
- e) summary of the red flags of ML/TF/PF risks in the SACCO industry.

These Guidelines therefore provide a one-stop shop reference point to players in the SACCO industry on the AML/CFT/CPF issues and will therefore bridge the existing capacity and knowledge gap for officers charged with the implementation of AML/CFT/CPF legal and regulatory framework in Kenya. The

Guideline will also serve as a critical supervisory reference tool to hold Regulated SACCOs to account during compliance checks and are available for download from the Authority's website www.sasra.go.ke. Like with any other Guideline, caution should always be exercised at all times in the application of this Guideline, and in case of doubts or challenges, reference should be made to the prevailing laws which must take precedence, or advisory sought from the Financial Reporting Centre (FRC) or the Authority or experts where applicable.

11.0. FUTURE OUTLOOK

This section considers the key and material issues which are likely to impact the future performance of Regulated SACCOs in the short and long term. It also unpacks the various risks attendant to the business operations and activities of Regulated SACCOs, drawing largely from the macro-economic environment in which Regulated SACCOs operate as

well as the trend analysis of critical data and information. It calls upon Regulated SACCOs to take cognizance of the issues as well as the risks both at the macro-level and at their individual institutional levels, and to put in place adequate mitigation measures in their respective business strategies.

11.1. Macro-Economic Factors

The changes in weather and climate patterns, employment especially within the private sector, and inflation are projected to be the most critical macro-economic factors which will affect the performance, growth and stability of Regulated SACCOs both at the individual and industry levels in the short, medium and long term, and in respect of which Regulated SACCOs must be aware. For instance, the favourable weather and climatic conditions experienced in 2024 ensured that there was improvement in the growth and stability indicators of the 48-Agriculture based Regulated SACCOs, as well as increased disbursement of loans and credit advances towards the agricultural sector over the same period. Any adverse changes in the weather and climatic conditions, especially diminished rainfall may

therefore claw back the gains in the growth of Agriculture based Regulated SACCOs as well as reduce lending towards the agricultural sector of the economy.

With regard to inflation **Figure 88** provides the inflation trends in the economy and shows the same to have been largely on a downward trend in 2024, starting at a high of 6.3% in the first quarter of 2024 and then dropping to 2.8% in the last quarter of 2024. This had the effect of increased savings by members of Regulated SACCOs on the backdrop of increased disposable incomes, and with the projected continued reduction in the inflation rate in 2025, the Regulated SACCOs is earmarked for continued growth in members' deposits.

Figure 88: Overall Domestic Inflation Trends in 2021 to 2024

Source: Central Bank of Kenya's Quarterly Economic Reviews

11.2. Member Exits and Claims for Refunds

Regulated SACCOs, like all cooperatives are members based socio-economic enterprises, and which largely transact business strictly with such members. Although member exits through withdrawal from membership is a right under the open and voluntary membership cooperative principle, it is always important to remember that such member exits have the effect of undermining the customer base of such Regulated SACCOs which in turn negatively affects their performance and stability. Consequently, it is important that Regulated SACCOs devise ways and means of member retention as much as possible, and that at any time, any exit is matched with new recruits of the same or higher proportion.

The Authority has however observed a trend in which many Regulated SACCOs are losing their membership at a faster rate than they are recruiting new ones, thus resulting in their diminishing financial strength including inability to compete with other institutions, meet members financial obligations or even maintain statutory compliance with the prescribed prudential requirements. **Figure 89** presents the trend analysis of the rate of members' exits from Regulated SACCOs without replacement and depicts that 75-Regulated SACCOs had a total of 68,555 members exiting without replacement in 2024. In contrast to members' exit in 2023, with a total of 76-Regulated SACCOs had members exiting without replacement.

Figure 89: Trend Analysis of Rate of Members' Exits from Regulated SACCOs

The exit from membership comes with the demand for refund of deposits by such exiting members, which itself result in a fresh demand for liquidity to be met by the affected Regulated SACCOs, in addition to putting such SACCOs to a position of near self-liquidation. **Figure 90** presents the summary of the total number of Regulated SACCOs which were forced to refund members their deposits in 2024

without replenishment of equal or higher proportion. The analysis shows that a total of 61-Regulated SACCOs recorded negative growth rates in their deposits in 2024, implying that they shed-off more saving deposits than they were able to mobilise, compared to a total of 60-Regulated SACCOs which had negative growth rates in their saving deposits in 2023.

The analysis further shows that a sum of Kshs 0.52 billion was shed-off by the said Regulated SACCOs in 2024, from their total deposits without replacement, compared to a sum of Kshs 1.59 billion which was shed-off from the Regulated SACCOs deposits in 2023. Although the cumulative increase in the

savings deposits refunded dropped in 2024, the fact that the number of Regulated SACCOs involved increased shows that the trend portends serious risks to these SACCOs' sustainability and stability, and as such the affected SACCOs must put in place appropriate mitigation measures to revert the trend.

Figure 90: Trend Analysis of Rate of Members' Exits from Regulated SACCOs

Source: SASRA Database

11.3. Global Geo-Political Policy Changes

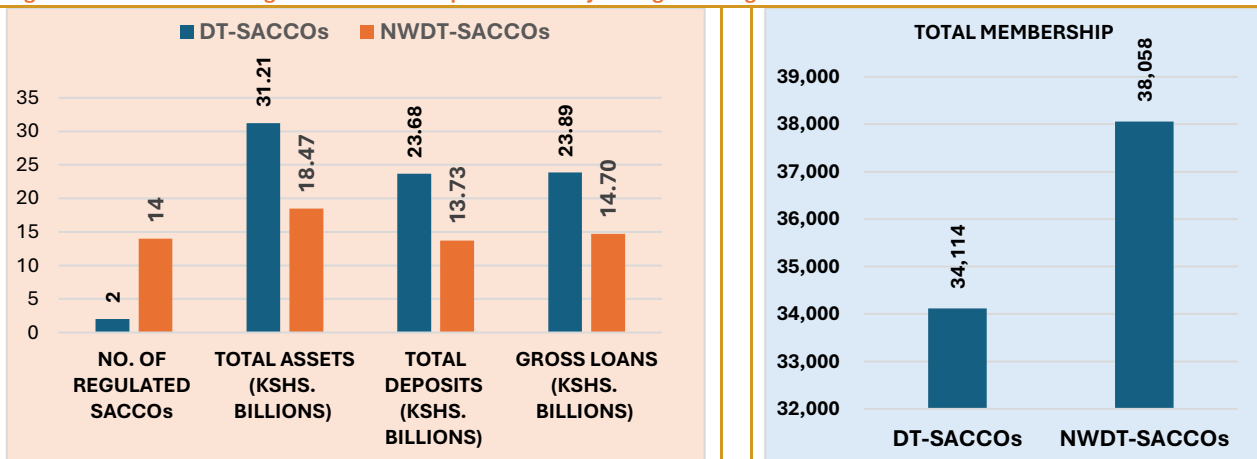

The major policy changes in the world's geo-political sphere driven by the results of the elections in United States in November 2024, as well as the continued conflicts in Europe and the Middle East, will continue to have far-reaching implications to the Kenya's domestic economy with direct overflow to the Kenya's Regulated SACCO industry. These policy changes are projected to have or continue having the effect of reduction or cessation of external or donor funding of local projects, institutions or programs, from which several Regulated SACCOs draw their membership.

The Authority projects that a total of 16-Regulated SACCOs consisting of 2-DT-SACCOs and 14-NWDT-SACCOs will be directly affected by these policy changes, and thus likely to experience sharp reduction in their membership with increased

member exits and demands for deposits (savings) refunds, coupled with reduction in the growth of loan assets or deterioration of the quality of loans due to potential default. **Figure 91** present the statistical summary of the distribution of the SACCOs which are and will continue to be directly affected by the global geo-political policy changes consisting of 2-DT-SACCOs and 14-NWDT-SACCOs with 34,114 members and 38,058 members respectively.

In total therefore a total of 72,172 members drawn from the 16-Regulated SACCOs are exposed to the effects of changes arising from the global geo-political developments around the world, with total assets amounting to Kshs 49.68 billion and deposits amounting to Kshs 37.41 billion. The NWDT-SACCOs are noted to be more exposed to these adverse effects than their DT-SACCOs counterparts.

Figure 91: Particulars of Regulated SACCOs exposed to Policy Changes arising from Global Geo-Politics

Source: SASRA Database

These Regulated SACCOs whose membership were principally or to a large extent drawn from donor or externally funded projects, institutions or programs, have been individually identified and appropriate supervisory advisory issued for implementation in order to mitigate against these changes. Additionally,

such Regulated SACCOs have been urged to explore other business driven strategic decisions such as mergers and consolidation with other Regulated SACCOs, as well as opening of common bonds in order to diversify their membership, customer base and revenue sources

11.4. Interest Rates

Several Regulated SACCOs still rely on external borrowings from commercial banks with a total amount of Kshs 25.64 billion being reported as owed by the Regulated SACCOs at the end of December 2024. The external borrowing by Regulated SACCOs will continue to be impacted by Central Bank of Kenya base lending rates (CBR).

Figure 92 provides the comparative movement of interest rates in the domestic economy between 2022 and 2024. It is apparent from the analysis that the CBR has been on a down trajectory with effect from the last half of the year 2024, and as such it is expected that the average lending rates by commercial banks will equally drop in 2025 thereby easing the costs of external borrowing for Regulated SACCOs. Despite the projected improvements in the lending environment in the short to medium terms, Regulated SACCOs are still encouraged to avoid reliance on commercial bank loans but rather rely on

their own internally sourced funds to finance their asset portfolios.

On the other side of the spectrum, the down trends in the cost of borrowing as being signalled by the Central Bank of Kenya base lending rates, with the resultant consequence of low lending rates by other credit financial institutions, has the implication of bringing an additional layer of competition in the credit market. Regulated SACCOs will thus have to contend with the cheaper credit facilities offered by other credit financial institutions to Kenyans especially the MSMEs as an alternative to their own credit facilities which are traditionally considered to be comparatively cheaper. In this regard, Regulated SACCOs must take stock of their credit products and align them to the emergent members' needs to avoid losing their memberships' credit needs to other credit financial institutions.

Figure 92: Trend Analysis of Interest Rates (2022 – 2024)

Source: The Central Bank of Kenya Quarterly Economic Reviews.

11.5. Foreign Exchange Risks

The Regulated SACCOs which engage in foreign currency denominated transactions with their members or other third-parties, will continue to be impacted in one way or the other by the foreign exchange risks. The last three (3) quarters of the year 2024 saw a general stability of the Kenya shillings to the three major foreign currencies thereby bringing stability to Regulated SACCOs which had foreign denominated debt from third party lenders, but which was on-lent to members in the local currencies.

Figure 93 provides the comparative performance trends of the Kenya shillings against the world's major currencies and even though it is projected that the stability of the Kenya shillings against these major currencies will continue in the short to medium term, Regulated SACCOs are forewarned that due to external macro-economic factors and geo-political alignments, the foreign currency fluctuations risks remain real and should be taken into account at all times.

APPENDICES

APPENDIX I: STATUTORY RETURNS & REPORTS USED FOR OFF-SITE SURVEILLANCE

	DESCRIPTION OF THE RETURNS	FREQUENCY OF SUBMISSION		OBJECTIVE/PURPOSE
	PERIODIC REPORTS AND RETURNS			
		DT-SACCOs	NWDT-SACCOs	
1.	Capital Adequacy Return	Monthly	Quarterly	Monitors if the Regulated SACCO maintains at minimum the prescribed minimum capital and associated ratios.
2.	Liquidity Statement	Monthly	Quarterly	Monitors if the Regulated SACCO is able to meet its short term obligations, particularly to depositors
3.	Statement of Deposit Return	Monthly	Quarterly	Monitors the deposits and the spread of deposits within the Regulated SACCO.
4.	Risk Classification of Assets & Provisioning	Quarterly	Quarterly	Assess the overall performance of the loan portfolio of a Regulated SACCO and flags off the non-performing loans for immediate action.
5.	Investment Return	Quarterly	Quarterly	Monitors the levels of investments by Regulated SACCOs in other institutions and also the fixed assets.
6.	Statement of Financial Position	Monthly & Annually	Quarterly & Annually	Monitors the financial position of Regulated SACCOs in terms of assets held against capital and liabilities.
7.	Statement of Comprehensive Income	Monthly & Annually	Quarterly & Annually	Monitors the performance in terms of incomes generated against expenses incurred to earn them.
8.	Other Disclosures	Annually	Annually	Monitors the capital strength, liquidity, insider lending, non-performing loans, investments and off-balance sheet items.
11.	Sectoral Lending Report	Quarterly	Quarterly	Provides data on the economic sectors financed by the loans and other credit facilities issued by Regulated SACCOs
12.	SACCO Agency Return	Quarterly		Provides the number and the volume of transactions undertaken by agents of Regulated SACCO Societies.
13.	Bank Agency Return	Quarterly		Provides the number and the volume of transactions undertaken by Regulated SACCO Societies on behalf of the Banks.
	NON - PERIODIC REPORTS AND RETURNS			
14.	Insider Lending Reports	Within 14 days after approval or ratification of the loan	Monthly (on 15 th of the subsequent month)	Reduce the risks associated with insider dealing, conflicts of interest in insider lending, and abuse of insider information
15.	Fit & Proper Test Form	Immediately upon appointment of officer		Tool for assessment of the suitability of Directors and other senior officers serving or seeking to serve in Regulated SACCOs
16.	Appointment, resignation, or removal of Chief Executive Officer	Within 15 days of the appointment, resignation or removal.		Enables the Authority to determine reasons for removal/resignation, and verify suitability of the new officer, and update the database
17.	Appointment of external auditors	Within 30 days of the appointment by the AGM		This enables the Authority to verify that the auditor is approved, and that the Regulated SACCOs accounts shall be audited within time.

	DESCRIPTION OF THE RETURNS	FREQUENCY OF SUBMISSION	OBJECTIVE/PURPOSE
18.	Information requested by Authority	As advised by the Authority	Any other information that the Authority may need in the course of its supervision mandate

APPENDIX II: REGULATORY AND SUPERVISORY GUIDELINES AND CIRCULARS

REGULATORY & SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	REFERENCE AND ISSUE DATE	PURPOSE AND OBJECTIVES
1	Guidelines on Management Information Systems (MIS) for Deposit-Taking Sacco Societies	SASRA/GG/2/2013 July, 2013	Guide DT-SACCOs on implementation of MIS
2	General Procedures for opening and closing of Branches and other places of business	SASRA/GG/1/2013 May, 2013	Provide a procedure for compliance with Section 32 of the SSA concerning the opening, closure and relocations of DT-SACCOs branches and other places of business.
3	Circular on submission and approval of audited financial statements	SASRA/GG/1/2015 January, 2015	Provide the procedure and timelines for submission and approval of DT-SACCOs' audited financial statements.
4	Circular on Approval of Agency Banking by DT-SACCOs	SASRA/Circular No. 14/2011 May, 2011	Provide the procedure for application and approval of agency banking by DT-SACCOs under Reg. 17 of the Regulations 2010
5	Circular of Application of Cooperative Societies Act to DT-SACCOs.	SASRA/Circular No. 16/2011 June, 2011	Expound on the application of the Co-operative Societies Act to DT-SACCOs pursuant to Section 67 of the SSA
6	Directives on the raising of capital through offers of sale of shares through media and other public advertisement	SASRA/5/V.1 (83) September 2012	Ensure that DT-SACCOs complies with the regulatory frameworks on raising capital from the public
7	Circular on the role of Directors of DT-SACCOs	MCDM/2/32/VO L.1/157 April 2011	Expounds on the oversight role and responsibility of Directors of DT-SACCOs to limit conflict of responsibility with management.
8	Circular on procurement of goods and services by DT-SACCOs	SASRA/Circular No. 11/2011 April, 2011	Reinforces the duty of DT-SACCOs to comply with Public Procurement and Disposals Act, 2005 and Regulations made thereunder while undertaking all procurements.
9	Guidelines on Risk Management Practices for Deposit-Taking Sacco Societies	SASRA/RG/03 June 2015	Provides the Board of Directors and Senior Management Staff of the Sacco societies with minimum standards in terms of policies, procedures and structures for effective risk management practices in the Sacco societies.

REGULATORY & SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	REFERENCE AND ISSUE DATE	PURPOSE AND OBJECTIVES
10	Circular on imposition of levies and financial penalties prescribed in the law	SASRA/GG/2/2015 July, 2015	Provides details of the circumstances under which the Authority may impose a levy or financial penalty for any violations or breaches in accordance with Section 51(p) of the Sacco Societies Act.
11	Circular authorizing the limited use by DT-SACCOs of the Authority's name and acronyms	SASRA/GG/1/2016 January, 2016	To differentiate DT-SACCOs from other Sacco Societies, the Authority allowed DT-SACCOs to use the words " <i>Regulated and/or Licensed by SASRA</i> " in their advertisements, correspondences, brochures, and other marketing materials.
12	Circular on the application of ISA No. 701 (<i>Communicating Key Audit Matters in the Auditor's Report</i>) to DT-SACCOs.	SASRA/700/721/VOL. 1 (1310) 21 st November 2016	The circular extends the application of ISA No. 701 to DT-SACCOs. Henceforth, external Auditors of DT-SACCOs must communicate all Key Audit Matters (KAM) in their opinions on Financial Statements.
13	Circular and Guidance Note on the Application of the International Financial Reporting Standard (IFRS) 9 to Outstanding Loans and Credit Advances Issued by Deposit-Taking Sacco Societies in Kenya	SASRA/700/721/VOL. I (134) 2 nd October 2018	General guidance to DT-SACCOs on the application of <i>IFRS - 9</i> to outstanding loan portfolios with effect from Financial Statements for the period commencing in January, 2018
14	Circular and Guidance Note on the Withdrawal of the Old Generation Kshs 1000 currency note and introduction of new currency notes	SASRA/800/GG/1/2019 7 th June 2019	Advisory and sensitization note to SACCOs to comply with the CBK's directive on withdrawal of the old generation Kshs 1,000 note by 1 st October 2019; the introduction of new generation currency notes as per the Kenya Gazette Notice No. 4849 dated 31 st May 2019; and the need to fully comply with the AML/CTF requirements during the exercise.
15	General Advisory Note on Non-Remitted deduction due to SACCOs from various employer-institutions	SASRA/800/2/2019 11 th June 2019	An advisory to SACCOs on measures to take and/or put in place to reduce and/or mitigate against the perennial risks of default by various employer-institutions to promptly remit deductions due to SACCOs.
16	Circular on the Sectoral Lending Reporting Framework for SACCO Societies in Kenya	SASRA/GG/2/2019	Guidance to SACCOs on the quarterly reporting of the economic sectors in respect of which the loans and credit facilities issued by the SACCOs are aimed at financing. The Circular lists the sectoral areas in respect of which the loans and credit advances by SACCOs shall be reported,

REGULATORY & SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	REFERENCE AND ISSUE DATE	PURPOSE AND OBJECTIVES
		10 th December 2019	including the respective codes and sub-codes for each sector and subsector.
17	Revised Guidance Note on The Revised Procedure for Application for Renewal of Deposit-Taking Licenses For DT-SACCOs and Data Collection Template	SASRA/GG/1/20 22 (Revised October 2024)	Provides general guidance to DT-SACCOs on the revised procedures and Requirements for application for the renewal of their respective deposit taking licenses, including the prescribed timelines, the mandatory supporting documents, as well as the minimum annual data disclosures on their operations and activities.
18	Guidance Note on Registration & Approval of External Auditors for Regulated SACCOs; and Procedures for Appointment of External Auditors	SASRA/GG/2/20 22 23 rd September 2022	Guidance to SACCOs and their external auditors on a uniform and standard framework and criteria for the approval and registration of external auditors for Regulated SACCOs, as well as preparation and publication of the list of approved and registered auditors.
19	Revised Guidance Note on The Revised Procedure for Application for Renewal of Authorization For NWDT-SACCOs and Data Collection Template	SASRA/GG/3/20 22 (Revised October 2024)	Provides general guidance to NWDT-SACCOs on the Procedures and Requirements for application for the renewal of their respective authorizations, including the prescribed timelines, the mandatory supporting documents, as well as the minimum annual data disclosures on their operations and activities.
20	Minimum Requirements for Engagement with Third-Party System Integrators and Vendors	SASRA/GG/1/20 23 6 th June 2023	Provides minimum requirements which Regulated SACCOs must observe when engaging in the services of Third-Party ICT systems integrators and vendors, particularly for the mobile money and other electronic financial services delivery.
21	Guidance Note on Corporate Governance for Regulated SACCOs in Kenya	SASRA/GG/2/20 23 June 2023	It codifies the best international corporate governance practices and their application to Regulated SACCOs in contemporary times. The Guidance Note replaces the previous Guidelines on Good Governance which was issued by the Authority in 2015.
22	Guidelines on Complaints Management by Regulated SACCOs	SASRA/MC/1/20 23 15 th June 2023	Provides the manner and procedures for complaint management by Regulated SACCOs, including the reporting framework of the complaints to the Authority.
23	Guidelines for Regulated SACCOs on Combating Money Laundering, Terrorism	Guideline No. SASRA/GG/1/20 24	Provides guidance and assistance to Regulated SACCOs on compliance with their Anti-Money Laundering, Combating Terrorism Financing and

REGULATORY & SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	REFERENCE AND ISSUE DATE	PURPOSE AND OBJECTIVES
	Financing and Countering Proliferation Financing	Dated 24th June 2024	<p>Countering Proliferation Financing obligations with the specific objective of –</p> <ul style="list-style-type: none">a) Highlighting the legislative and regulatory framework for Anti-Money Laundering, Combating Terrorism Financing and Countering Proliferation Financing and their administration as it relates to Regulated SACCOs.b) Identification, assessment and mitigation of Money Laundering /Terrorism Financing /Proliferation Financing risks in the SACCO industry.c) Providing guidance on detection, deterrence and reporting framework in relation to Anti-Money Laundering /Combating Terrorism Financing /Countering Proliferation Financing.
